

1: Funko announces end of Disney Treasures subscription box, moving them to an exclusive retailer

*The Disney Treasures [Robert Tieman] on www.enganchecubano.com *FREE* shipping on qualifying offers. Selected from the vast archives of the Walt Disney Company, this historic collection includes handwritten letters and notes of Walt's.*

It is accompanied by a certificate of authenticity. The edition is limited to pieces. Item measures approximately 10" x 20". Michael knew his destiny was to draw and paint, and when his family moved to Long Beach, California, his artistic abilities blossomed. Throughout high school, Michael sought every opportunity to observe nature and create art. Upon his return, Michael continued his art education at the Art Center College of Design in Pasadena, California, where he currently teaches. His attention to detail draws viewers into his paintings and compels them to stay awhile. Michael resides with his wife and daughter in Studio City, California. 2: Disney Treasures - Hello Subscription

Walt Disney Treasures promotional title card "The Ultimate Disney Treasure Chest" - Re-packaged titles, without the tin cases Walt Disney Treasures is a series of two-disc DVD collections of Disney cartoons, television episodes and other material.

Leonard Maltin plays curator and host once again for an evening of films that should all be quite obscure to many Disney fans. In fact, you may have never even heard of it. However, this was produced in at the long gone studio on Hyperion Avenue during the production of Snow White and the Seven Dwarfs. Making it even more of a treasure, it was never intended for public release. Instead, he had this short produced for them, which later ended up used as promotional material for Snow White. A fitting segue, it opens with footage of Walt Disney with animals from various episodes of The Wonderful World of Color. Six of these features have previously been part of Treasures from the Disney Vault. In just minutes, footage from all thirteen subjects are presented. The shocking thing is that it has excellent flow and pacing. It plays as both a nature documentary and a documentary about the True-Life Adventure series. The Legend of Lobo is one of the better films of its kind and follows the story of a wolf named Lobo from birth through adulthood. They find a new home near a cattle ranch that offers easy food resources, but also great danger. Lobo learns all he can from the human hunters, using these skills to good use as an adult. Narrated by Rex Allen, the film also features a rousing theme song that makes several appearances, a fun ditty from the Sherman Brothers. The Legend of Lobo is better paced than most films of this variety, although it is still marred by pacing issues despite a short 67 minute runtime. Mickey Mouse and Pluto are out of their element when Mickey puts his pup in a sophisticated dog show. But when Pluto enters the trick dog competition, he makes his master proud. Bobby is a farm dog who has taken an exceptional liking to an elderly shepherd, Auld Jock. When the shepherd is let go, he leaves the farm following by Bobby and passes away soon after. The community rallies around the terrier in an effort to change the law so that Bobby can spend his days with the person to whom he is most loyal. The film was shot entirely in the United Kingdom, including location shooting at Greyfriars Kirkyard, the source of this legendary tale. It suffers from some pacing issues, but is mostly enjoyable and touching. Of all the films on the scheduled tonight, this is my favorite. The night is still young. Click on page 2 to see the rest of the lineup. Alex Reif Alex has been blogging about Disney films since after a lifetime of fandom.

3: TCM's Treasures from the Disney Vault: June - www.enganchecubano.com

The Disney Treasures by Robert Tieman Selected from the vast archives of the Walt Disney Company, this historic collection includes handwritten letters and notes of Walt's, rare character sketches from the '30s and '40s, replicas of Disneyland's opening-day tickets, photos, movie theater programs, comic strips, greeting cards, commissary.

As the title implies, Maltin interviews the present voice of Goofy, Bill Farmer, who had been voicing Goofy since Farmer reveals his origins and how he came to voice Goofy. It is revealed that Farmer had voiced Goofy in more than different Disney projects, not only cartoons, but also albums, telephones, commercials and many others. Many of the posters of the Goofy shorts are presented here. This gallery shows off various Goofy memorabilia, such as books and albums. Maltin does do the commentary here. Goofy Through the Years Gallery: This gallery reveals storyboard sketches, animation drawings and background paintings of many of the Goofy shorts presented. Behind the Scenes at the Walt Disney Studios[edit] This set provides a history of the Walt Disney Studios and of animation from the days of the caveman to the present. Along with a tour of the studios, some Disney animators are introduced and the process of producing films at Disney is covered. Most of the contents are from Walt Disney anthology series. It offers a look at the film as well as a behind-the-scenes visit to the Disney Studio for an introduction to the artists and animators and their process. The Reluctant Dragon He explores an art class, dialogue and sound effects stages, the multiplane camera department, the paint department and, finally, the story and animation departments until finally he discovers Disney has already finished the cartoon version of the story. Maltin provides a history of the studio, from the days of the Alice Comedies to the present day. Behind the Boards on Baby Weems: An interview with longtime Disney story man and artist Joe Grant. Maltin discusses how Grant got his start at the studio and the unusual story-reel format of the "Baby Weems" short seen in The Reluctant Dragon. The Reluctant Dragon Gallery: Promotional black-and-white stills of the film and its actors. Photos of the old Hyperion lot. Disc two[edit] The Story of the Animated Drawing: On this episode of the Disney anthology series, Walt serves as the delightful host as he discusses the history of animation from the days of the caveman to the days of some primitive mechanical animation contraptions in the 1920s that were used to experiment with the art form. Then it moves on to more advance types of animation experiments, such as in J. On this episode of the anthology series, Walt explains how his animators make the impossible seem realistic through various cartoons with Mickey and Donald. This episode also includes a pencil-test form of one scene from Snow White that was ultimately not used in the final film. Tricks of our Trade: On this episode of the anthology series, Walt dwells on how animators study real life to create their illustrations. The groundbreaking multiplane camera is shown off, demonstrating how it is used to mimic real landscapes, since plain animated backgrounds seem to be too plain and create a false effect. Bonus Features Kem Weber Gallery: This gallery has architectural concept art for the Burbank lot. Tour of the Disney Studio: This is a rare half-hour radio broadcast from Australia in 1955, in which studio personnel Homer Brightman, Harry Reeves, Eric Larson and Walt himself offer general information on the making of the animated films at the time.

4: Walt Disney Treasures - www.enganchecubano.com

The Disney Treasures is a book written by Robert Tyman featuring never-before-seen information, history and pictures of the Walt Disney Studios. Selected from the vast archives of The Walt Disney Company, this historic collection includes handwritten letters and notes of Walt's, rare character.

With the exception of three animated shorts scattered throughout the night, every feature film was made without his direct supervision, although his influence can certainly be felt in most of these features. In this Technicolor film, Mickey plays a magician to a packed vaudeville house. Magician Mickey has a simple premise, but gets by on an endless series of gags. This is Mickey just nine years after his creation, more toned down than his black and white days, but still a little mischievous. When an apprentice witch becomes ward to three displaced children during World War II, the kids learn that Eglantine Price intends to use magic to stop the war. But when the last spell is missing from her book, she enchants a bed knob to take them on a quest to find her professor and the missing spell that she desperately needs. Released six years after *Mary Poppins*, *Bedknobs and Broomsticks* was originally a backup plan when it appeared that P. The Sherman Brothers first worked with Don DaGradi on the songs and story while on a break from *Poppins* and when the studio resurrected the project post-Walt, they sought Julie Andrews for the lead part and ended up casting one of the original actresses considered for the role of Mary, Angela Lansbury. The film uses many of the same special effects tricks employed in *Mary Poppins*. This includes sodium vapor screens that allow the cast to spend time in an animated world. The visual effects in the film were celebrated with an Academy Award win. *Bedknobs and Broomsticks* is often slow paced and for the most part, unexciting. The animated sequences are delightful, directed by Disney Legend Ward Kimball. He agrees to do yard work in exchange, but a tiny tornado wreaks havoc on the pile of leaves Mickey scooped. When the daddy tornado shows up, Mickey is in for some real trouble. Effects animators would have been responsible for the leaves, but possibly the tornados as well, which act more like characters in this short. They bend around his hat rather than poking through and appear to stay fixed to his sides in opposition to their previous proclivity for always facing the camera. They even have a purple tinted interior. This short was released just one year after *Fantasia*, but Mickey looks quite different again. It represents a shift away from the predictable fare of the Ron Miller era and the influence of Steven Spielberg can be felt all over the place. While walking in the woods at night, young David Freeman is knocked unconscious. He is investigated by NASA, who discovers that his brain waves contain complex star charts from other galaxies. This film is credited with a breakthrough in computer-generated imagery, using reflection mapping on the ship as it flies over clouds and through the Florida Everglades. A cast of puppets fills the ship, including the mechanical puppet rig for Max. In the HD restoration, strings are very apparent on the adorable Pukmaren. Max is voiced by Paul Reubens, who also voiced Rex, the robot pilot of the original iteration of *Star Tours*. The night is still young. Click on page 2 to see the rest of the lineup.
