

1: "The Doctor" | Tardis | FANDOM powered by Wikia

Aug 28, Â· Another surprising benefit to online medical visits: "Patients like that the doctor is actually looking at them," said Dr. Eric Topol, director of Scripps Translational Science Institute in La Jolla.

This is a situation where the health care sector has taken advantage over the internet and IT. They provide many health services and consultation through online portals. However the concept may seem to be new, but the growing number of investors and users suggest the positive adoption of the online doctor service. The idea itself is quite convenient and efficient. Here in this article are the merits of online doctor consultation; 1. Access First of all, this is the primary reason for such a service. The ability to have access to a number of medical consultants especially for people living in areas where there are limited professionals is a great opportunity. This proves to be one of the most convenient ways of getting medical assistance from anywhere you wish you want help. Cost-effectiveness Sometimes when taking a visit to a doctor for consultation leads to one incurring hefty bills. However, with an online consultation, it is cheaper compared to OPD visits. Privacy Many people are impressed with the online doctor consultancy service because privacy is one thing this service offers. This is well appreciated especially by individuals who suffer from chronic diseases, or they are just in need of discussing any medical condition. Also, those patients that fear stigma and fear of rejection from the society if they are discovered of what they are suffering from so they find the online doctor visit useful. They can be able to get help in the comfort of their confinement from the rest of the people. There are times we research medical information which may be to a certain symptom , disease or medical condition through Google. Self-diagnosis might seem straightforward and easy but can lead to severe health conditions if done wrong. It is crucial to determine the fundamental cause of your health status with the help of correct diagnosis. In such cases consulting with a specialist online can help clear doubts safely and more efficiently. Also, the internet is filled with many sites providing information on various health issues, but some are not reliable at all. So having a trusted source to offer the right guidance is highly recommended. One of the major concerns among patients is that doctors often end the session in a hurry and do not give them a chance to remove all their doubts. With online consultation, you get the exclusivity to spend maximum time discussing all your issues patiently. There are no distractions or any hurry to finish the session quickly. If a consultation time of minutes has been allotted to a patient, he gets to spend the entire time with the specialist.

The Doctor Is Online: The Emerging Role of Telehealth Dec 15, By Gary Fitzgerald. Jonas Miller, 12, leaned back on his living room couch, iPad in one hand, Asthma Action Plan in the other.

Webber , a staff writer who had been brought in to help develop the project. In the first serial, *An Unearthly Child* , two teachers from Coal Hill School in London, Barbara Wright and Ian Chesterton , become intrigued by one of their pupils, Susan Foreman , who exhibits high intelligence and unusually advanced knowledge. Pushing their way inside, the two find that the exterior is camouflage for the dimensionally transcendental interior of the TARDIS. The old man, whom Susan calls "Grandfather", kidnaps Barbara and Ian to prevent them from telling anyone about the existence of the TARDIS, taking them on an adventure in time and space. The first Doctor, says cultural scholar John Paul Green, "explicitly positioned the Doctor as grandfather to his companion Susan. In *The Deadly Assassin* , the concept of a regeneration limit is introduced, giving Time Lords a fixed number of twelve regenerations, meaning that every Time Lord had a total of thirteen incarnations including the original. The plot of " *The Time of the Doctor* " involves the Doctor receiving a new cycle of regenerations from the Time Lords before his expected demise, triggering the regeneration into the Twelfth Doctor , played by Peter Capaldi. This ability would seem to have limitations which have yet to be fully explained, as the Doctor is harmed by radiation in *The Daleks* , *Planet of the Spiders* and *The End of Time*. Certain stories imply that the Time Lord is resistant to cold temperatures " 42 ". To counter extreme trauma, such as exposure to the poisonous fungus in *The Seeds of Death* and after being shot in *Spearhead from Space* , the Doctor can go into a self-induced coma until they recover. The Doctor has shown a resistance to temporal effects and has demonstrated telepathic ability, both the ability to mentally connect to other incarnations of themselves they have encountered *The Five Doctors* , and an ability to enter into the memories of other individuals " *The Girl in the Fireplace* ". The Doctor can apparently reverse this process, sharing their memory with another, as shown in " *The Big Bang* ". However, in " *Kill the Moon* ", the Twelfth Doctor claims that there are "grey areas", points in time for which he cannot see the outcome. Like many other alien species in the programme, the Doctor is able to sense when their own species is within proximity through an inherent telepathic connection. The Doctor exhibits some weaknesses uncommon to humans. For example, according to *The Mind of Evil* , a tablet of aspirin could kill him. In " *Cold Blood* ", a process meant to decontaminate him of bacteria from the surface of Earth causes him intense pain, and he says it could have killed him if allowed to proceed to completion. In his final serial , the Second Doctor states that Time Lords can live forever, "barring accidents. It is stated in *The Deadly Assassin* that Time Lords can only regenerate a total of twelve times, giving a theoretical final total of thirteen incarnations. It is possible to exceed this limit: In *Death of the Doctor* , a serial from spin-off programme *The Sarah Jane Adventures* , the Eleventh Doctor flippantly responds to a child that he can regenerate "" times; writer Russell T. Davies intended this line as a joke. The Time Lords used a crack in the universe to give him a new cycle consisting of an unknown number of regenerations in " *The Time of the Doctor* ", triggering the regeneration into the current Twelfth Doctor Peter Capaldi. His skill with hypnosis requires only a glance into the eyes to put the subject under a trance. The Doctor can read an entire book cover to cover in a second by thumb-flipping the pages before his eyes *City of Death* , " *Rose* ", " *The Time of Angels* ". Though reluctant to engage in combat against living opponents, this is not for lack of skill; the Doctor is conversant with both real and fictitious styles of unarmed combat most obviously the "Venusian Aki-Do" practised by the Third Doctor , has won several sword fights against skilled opponents, and is able to make extremely difficult shots with firearms and, in *The Face of Evil* , with a crossbow. When addressed by Ian with this name, the Doctor responds, "Eh? The story arc was resolved in " *The Time of the Doctor* ", wherein it was revealed to be projected by the Time Lords across all of time and space through a "crack in the skin of the universe" as a means of contacting the Doctor and seeing whether it was safe to leave the parallel universe in which their planet, Gallifrey , had been left following the events of " *The Day of the Doctor* ". In *The End of Time* " it is mentioned that after he smote a demon in the 13th century, the residents of a convent called the Doctor the "sainted physician". In other words, we got it

from him. The anonymity of the Doctor is the theme of series 7 of the revived programme. After faking his death, the Doctor erases himself from the various databases of the universe. In "Nightmare in Silver", the collective consciousness of the Cybermen informs the Doctor that he could be reconstructed from the "hole" – the missing records – that he has left behind, a mistake which the Doctor intends to rectify. The events of "The Time of the Doctor" make it clear that his people, the Time Lords, know his true name, despite referring to him by his chosen alias as "the Doctor", even in formal settings such as court. For example, in *The Gunfighters* the Doctor assumes the name of Doctor Caligari [25] and subsequently responds to the question "Doctor who? Question marks adorning his costuming in the s seem to imply the "Who" moniker. The name "Doctor Who" is used in the title of the serial *Doctor Who* and the *Silurians*, but this was a captioning error rather than an in-story mention. The only other time this occurs is in the title of episode five of *The Chase*, which is titled "The Death of Doctor Who". But I think we might be able to hear it, at a certain frequency. This is repeated by companion Peri Brown in the radio serial *Slipback*. The character played by Peter Cushing in the films *Dr. Who and the Daleks* and *Daleks – Invasion Earth: However*, these films are not considered part of the same narrative continuity as the television programme, as they were based upon two television serials featuring William Hartnell and made considerable alterations to the characters of the Doctor and his companions. Alias "The Doctor"[edit] Quite apart from his name, why the Doctor uses the title "The Doctor" has never been fully explained on screen. The Doctor, at first, said that he was not a physician, often referring to himself as a scientist or an engineer. In *The Moonbase*, the Second Doctor mentions that he studied for a medical degree in Glasgow during the 19th century. The Fourth Doctor was awarded an honorary degree from St. In *The Mutants* an official asks the Third Doctor if he is, in fact, a doctor, to which the Doctor replies "I am, yes"; when asked what he is qualified in, the Doctor replies, "Practically everything. The Fifth Doctor claims to be a doctor "of everything" in *Four to Doomsday*, and a message to the same effect is related from the Tenth Doctor in "Utopia". The definite article, you might say. In "The Sound of Drums", the Tenth Doctor remarks to the Master that they both chose their names, with the Master calling him sanctimonious for identifying himself as "the man who makes people better. Never giving up and never giving in. To make up for his lack of a practical name, the Doctor often relies upon convenient pseudonyms. W" in *The Underwater Menace*. The Master was utilising Latin translation in the same serial, posing as "Mr Magister". Bowman" in the *Doctor Who* television movie. The Doctor subsequently adopts this alias numerous times over the course of the programme, sometimes prefixing the title "Doctor" to it. In the audio adventure, *The Sirens of Time*, when the Fifth Doctor is asked his name, this conversation ensues: This is first mentioned in the novelisation of *Remembrance of the Daleks* by Ben Aaronovitch and subsequently taken up in the spin-off media, particularly the *Virgin New Adventures* books and the *Doctor Who Magazine* comic strip. In *Remembrance of the Daleks*, the Seventh Doctor produces a calling card with a series of pseudo- Greek letters inscribed on it as well as a stylised question mark. The question mark motif was common throughout the s, in part as a branding attempt. Beginning with season eighteen, the Fourth through Seventh Doctors all sported costumes with a red question mark motif usually on the shirt collars, except for the Seventh Doctor – it appeared on his pullover and in the shape of his umbrella handle. In the serial *The Invasion of Time*, the Fourth Doctor is asked to sign a document; although the signature itself is not directly seen on screen, his hand movements clearly indicate that he signs it with a question mark. A similar scene occurs with the Seventh Doctor in *Remembrance of the Daleks*. On-screen credits[edit] In the early years of the franchise, the character was credited as "Doctor Who" or "Dr Who", up to the final story of season 18, *Logopolis*, which was the last story featuring Tom Baker as the then-incumbent Fourth Doctor. Beginning with the debut of Peter Davison as the Fifth Doctor in *Castrovalva*, the character was credited as "The Doctor", which he had been referred to in-universe since the tenure of William Hartnell. This credit remained from season 19 to season The resurrection of the programme credited Christopher Eccleston – playing the Ninth Doctor – as "Doctor Who" again in series 1. John Hurt plays a mysterious past incarnation of the Doctor in the 50th anniversary special "The Day of the Doctor", with minor roles in "The Name of the Doctor" and mini-episode "The Night of the Doctor", created as a "mayfly Doctor" by Steven Moffat. Tom Baker did reappear, but as "the Curator", an ambiguously different character who he was not credited for playing. A voice actor, John Guilor, recorded a line of audio

impersonating the First Doctor , for which he was credited as "Voice Over Artist". In other multi-Doctor stories, the multiple actors are all credited as "The Doctor", the exception being *The Three Doctors* (1973) , which credited William Hartnell, Patrick Troughton and Jon Pertwee as "Doctor Who" as the serial preceded the practice of crediting the character as "The Doctor". In "*Human Nature*" , the plot involves the Tenth Doctor altering his biology and becoming a human to avoid detection. As a human, he takes the name "John Smith".

As recently graduated medical students are on the verge of beginning their residency programs, the Social Media Health Network is pleased to offer a resource to encourage awareness of and.

Sudhir Kumar from DoctorSpring panel. Pandy was very clear in what he was saying and why. It is something I can take to a doctor and feel confident in expressing concern for the need for certain tests. This was such a fair price for inquiring to a specialist. I do understand this is not a diagnosis but it is a step in the right direction and it more than I had before. A thoughtful, studied and intelligent response to a anxious situation. Thank you, I appreciate the service and would recommend highly. I think I like Dr. That speaks for everything. Sree Bhushan gave us a good insight into the situation for my son and was very patient and caring. I will definitely want to consult him again in the future. DrSpring services is an excellent service for people like us who want a second opinion. This totally solved my issue without me having to spend hundreds of dollars and waiting weeks to go to a doctor in person. I am so glad there is a service that saves me all that trouble when I have a simple, non-serious health issue. Saphtharishi for a well thought out, complete response. In fact, I was very pleased that you did not shy away from my question as did the nurse on the Enbrel hotline I called initially. This was a really good experience. I am an employee benefits insurance broker and I will feel confident recommending your services. Thanks so very much! I feel alone, scared and depressed about my condition and DoctorSpring offered me a place to turn for advice and comfort. I heard about this site so I thought, why not give it a shot? I asked questions about my conditions and an internal medicine specialist got back to me within a couple of hours. Thank you so much to Dr. Deepu Sebin Sebastian for taking the time to listen to my symptoms and provide amazing feedback. I know I will use this site again for future questions about my conditions. Dr Perigela provided me with pretty much the same information as a private physician who saw me this eve. Gave me antibiotics, anti-inflammatory and painkillers. Thoroughly recommend Dr Perigela and the service for peace of mind and rapid response! Sebastian for your help with this question. It sets my mind at ease to know that you do not think these bites are necessarily related to a bug in my home. Mahajan to my specific questions and would surely consult him again in the future. I could upload only one report and not more than one during the follow-up session. I had alot of problem signing into my account though I had to sign in through by clicking the link on my email instead of opening the page and logging in from there but Brilliant service! Thankyou so much Rated: Due to the fact that I needed quicker assistance, I decided to close the consult. He made sure I got numerous tests for ruling out. Rajiv Goel has been very patient with all my queries and he responded very promptly giving me all possible information. He really tried his best to give me all insight of the situation and whats the best way forward. It was great to have him as consultant. Thanks a lot Dr. Pathak, as well as DoctorSpring was very helpful in providing sensible information about given situation health situations. I think this is a wonderful option for those who do not have insurance, or perhaps someone who has a non-threatening condition that needs some answers but cannot go see the doctor. The service provided by Doctorspring is excellent and having a second opinion on a medical issue from a qualified and experienced doctor is very rewarding. I should know better than to believe what people say just to upset you! I just decided to go to you who I trust for an opinion! It helped us think completely different about the diagnosis and gave us a lot more info than any of my local doctors had given me. Thank you for providing such invaluable insights. Learn How Online Doctors Can Write Prescriptions. Prescription drugs remain an amazing innovation, saving countless lives and promoting the health and wellbeing of millions of people all over the world.

A few moments later, his mom Elizabeth sat beside him. Time for their 8 a. Within minutes, Jonas was describing his persistent cough to the allergist, face-to-face via FaceTime videochat. The allergist examined his eyes and throat and ruled out a cold or virus. Jonas pulled out his digital peak flow meter, took a deep breath and blew into the mouthpiece. The reading “ 85 percent of his previous best result, up from 80 percent the day before ” signaled his symptoms were in the green zone and that his asthma was improving. With one click, the peak flow meter data was instantly forwarded to the allergist. The allergist encouraged Jonas to monitor his breathing with the peak flow meter at least twice a day and continue taking his daily corticosteroid medication. An hour later, Jonas was in school “ he had missed just 10 minutes of first period. This is the promise of telehealth. A recent report predicts the number of people worldwide using telehealth will jump to 7 million in , up from less than , in Secure online portals and carebooks allow you to upload and access personal medical information at any time and communicate with your doctor via email service or two-way texting. Healthcare apps, including many that specialize in asthma and allergies, allow you to submit data and obtain feedback from your doctor. Some are free, some require a fee. Asthma Storylines , for example, is a free app that allows you to document daily symptoms and health trends, and then work with a healthcare professional to develop a personalized plan for prevention and treatment. Video calls via smartphone or tablet allow you to connect one-on-one with your doctor from anywhere. The Women Breathe Free program helps women gain better control of their asthma through a series of minute telephone calls with an asthma educator. Or we can advise them whether or not they need to go to the ER. These are real, useful visits. At Your Convenience Some telehealth arrangements still require patients to go to a healthcare facility “ just not the same one as their doctor. It has outreach clinics and offices in Missouri and Kansas, drawing patients from small rural towns that sometimes cannot support their own allergist or pediatrician. During the visit, a nurse telefacilitator is present with the family while an allergist appears via live streaming on a kiosk or computer monitor. Digital devices connect to the kiosk or monitor and the assessments are forwarded, in real time, to the doctor. The allergist and patient talk, just as they would in person. On occasion, connectivity issues during power outages or Internet service provider problems can interrupt telehealth appointments “ a frustration for both doctor and patient. Despite the hiccups, early studies suggest telehealth improves patient outcomes. Allergist and immunologist Jay M. The Future Is Now When Gary Steven, MD, went to medical school in the s, he never dreamed he would one day treat patients using a computer screen or handheld phone. Sounded too much like Star Trek. Steven thinks telehealth may not be moving fast enough. They are also working to establish a secure mobile and web-based portal to connect with patients one-on-one from their home. New patients can even see them via telehealth, as long as they are able to provide lung function test results. Food Allergy E-Counseling Fallon Schultz has worked with many food allergy patients and families both in person and online through Food Allergy E-Services, a counseling company she founded in Through Food Allergy E-Services www. All of that can be done via telehealth. Some private insurance companies offer similar telehealth platforms to members. In those cases, patients should go to the hospital emergency department. For all its promise, payment and insurance coverage remain one of the biggest hurdles for telehealth. Patients and healthcare providers may encounter a patchwork of insurance requirements and different payment streams that do not allow them to fully take advantage of telehealth. Many private insurance companies now provide at least some telehealth coverage. On the federal government level, it appears technology is also well ahead of public policy. Medicare will pay for telehealth only if it is used in rural or underserved areas “ and only when video appointments are involved. The Medicare Telehealth Parity Act of , or HR, would expand coverage of telehealth services under Medicare by putting it on the path toward parity with in-person visits. It would remove geographic barriers for telehealth coverage and expand the list of eligible providers to include respiratory therapists, among others. How to Prepare For a Telehealth

Appointment? Check with your health insurance provider to find out if telehealth is covered under your policy. Keep your insurance information with you during the appointment. Write down a list of your current medical conditions and medications, and any questions you want answered. Think about your healthcare goals: What do you want to accomplish in this telehealth visit? Find a quiet place for the appointment, away from children or pets.
