Fall of Eagles is a part British television drama aired by the BBC in The series was created by John Elliot and produced by Stuart Burge.

His mother, Archduchess Sophie , is determined to ensure the Habsburg line and favours her niece Helene as the future empress. However, the young Bavarian princess struggles to deal with her new position as empress of Austria, motherhood, and with her domineering mother-in-law. Endeavouring to create her own space, she re-friends her old Hungarian mentor Count Majlath, and begins an unwelcome fixation with his country. However, despite her love for the heir apparent, and her growing family, the British princess is unprepared for the constraints her new life in Berlin , where her liberal views, and influence over her husband, clash with those of Otto von Bismarck , and the Prussian doctrine of iron and blood. The ageing Chancellor seeks support from Vicky, but she spurns him, and blames his meddling for the estrangement between her and her son. In Vienna, and at Mayerling, imperial officials contrive to hide the true events to prevent a massive public scandal, misleading the Emperor and Empress about the true nature of the deaths. The episode, narrated in hindsight, ends with news of the assassination of the Empress in Geneva in 1898. The young Tsarevich is similarly apprehensive, and despite his longstanding affair with St. Catherine. Meanwhile, the autocratic conservatism of the Imperial Government is breeding discontent within the factories, under the aegis of the revolutionary Vladimir Lenin. Now married and in London, Lenin is founding his own, more radical, brand of Marxism and manoeuvres to divide the Russian Social Democratic Labour Party and its publication Iskra from his primary rival Julius Martov. One by one, moderates and liberals are side-lined or expelled, leaving the party split into Bolsheviks and Mensheviks. Meeting at the grave of Karl Marx , many former comrades bid him farewell. A rising tide of discontent among St. Petersburg. Both Sergei Witte and Empress Alexandra also have grave concerns about him and his methods, albeit for different reasons. Nevertheless, with unrest fermenting and the memory of Bloody Sunday still fresh, he is appointed after seeking additional authority from the Tsar. Nicholas grants some concessions, including the creation of the Duma , as Rachkovsky begins using his forces in a deadly purge of troublemakers and revolutionaries in St. Petersburg. He quickly finds himself outplayed by Alois Lexa von Aehrenthal when Austria rapidly annexes the Turkish territory of Bosnia and Herzegovina , precipitating the Bosnian crisis. However, he soon gets news of the assassination of Franz Ferdinand and his lower-ranked wife, Sophie Chotek , in Sarajevo. Initially he accepts the "providence" of the event, and refuses calls to mobilise the army and to punish Serbia. However, the Kaiser quickly insists on immediate and decisive action against Serbia, dismissing the preparedness and will of Russia, and downplaying the military threat from France, setting a chain of events in motion that leads to the outbreak of World War I. His son Alexei soon joins him, but his frail constitution soon leads to another health scare. Alexandra, becoming increasingly unpopular and insecure, has come to rely heavily on the advice and cures of faith healer Grigori Rasputin , who also advises the Empress on which religious people should be in government. As a result, Alexander Protopopov is appointed as a minister, but his ineptitude leads other politicians, such as Mikhail Rodzianko and Alexander Trepov , to scheme for change. With Rasputin now dead, Alexander Kerensky incites open revolt in the Duma, who support his insistence on the abdication of the Tsar. The Kaiser, fearful of creating a "Bolshevik nemesis", reluctantly allows Lenin and his compatriots to travel through Germany from exile in Switzerland. With the help of industrialist Dr Helphand , the Russians finally arrive to a heroic homecoming in St. Petersburg. German troops move west from the now peaceful Russian front, but the Spring Offensive fails, with the Allies making surprising advances across France and Belgium. 2: The Fall of Eagles: The Death of the Great European Dynasties by Cyrus Leo Sulzberger II

I was very impressed with Fall of Eagles. And what a distinguished cast of British actors!! (Including the German Curt Jurgens in a masterful performance as Prince.

Telling stories of the politics, both internal and international from the late 19th century, until the end of World War I. This work provides examples of: Emperor Franz Josef I: Chancellor Otto von Bismarck. Vladimir Lenin also qualifies given the manner in which he ruthlessly outmaneuvers rivals in the Russian Social Democratic Labour Party to seize control and transform it into a disciplined band of radicals poised to take power in the chaos of the Russian Revolution. Dumbass Has a Point: During his grand council of , Kaiser Wilhelm is told of how his Commanders and politicians plan to win. Using unrestricted naval warfare in the North Atlantic and to install a Bolshevik Government in Russia. Wilhelm points out that unrestricted navel warfare will bring the Americans on the Allied side, and that the Bolsheviks will not be able to be controlled. He meekly goes along with the plans anyway though. From Nobody to Nightmare: Its clear from the start that no one really expects much to come from Prince "Willie" aka Wilhelm II. Otto von Bismarck, the mastermind behind the rise of the German Empire, dismisses him as a preening imbecile who can be easily molded into another Puppet King. General Ludendorff, who pronounces the war lost after his offensive fails and dramatically fainting at a General Staff meeting Chief of Staff Erich Ludendorff: He explains, after everyone call him a dictator and walk out, that he put doctrine and organization together to form the party as a fist. Lev Trotsky walks out of the party and calls him out with this line, but Lenin delivers one of his own. Field Marshal Paul Von Hindenburg: We cannot save the Emperor, but we can save the army. We must save Germany. It is our sacred duty. Austria sets out to be independent to Germany and ends up being tied more firmly to her coat-tails than ever before, Russia looks for some slight prestige after her humiliation by Japan and ends up by being humiliated all over again, Germany starts off by supporting Turkey at the expense of Austria and ends up by supporting Austria at the expense of Turkey, does it make sense to you? It seems to me, the more surely we set course north-east, the more surely we end up by going south-west. Foreign Secretary Edward Grey: There seems to be a lot of it in Germany, given how the German Imperial ministers and officers behave in the second episode. Russia has a great example in Father Georgiy Gapon, who stirs up the St. Peterburg strikes with a fiery Rousing Speech. You were born to be the cattle of the rich, and as cattle they will use you to the last part - blood, bones and hides! After the strikes, Gapon leads the workers to the Winter Palace to make a personal petition to Tsar Nicholas II, which leads to the Bloody Sunday massacre, and this beautiful piece of ham. Otto von Bismarck and Vladimir Lenin. For most of the series, his personality seems largely stuck in a state of adolescence even when he is well into his mids as the leader of a world power. It is only when he witnesses the terrible consequences of plunging his country into World War I that he shows signs of becoming more mature and reflective, by which time it is ultimately too late. Officer and a Gentleman: He is portrayed until his death as a well-mannered, agreeable Nice Guy , despite coming from traditional militaristic Prussian culture. He absolutely dislikes war, but he will not hesitate to serve his country. If I should reign I would never make it.
