In , the Commonwealth will provide the States with \$ billion in total payments, including payments of \$ billion for specific purposes like schools and hospitals and general revenue assistance of \$ billion.

We are committed to maintaining the highest standards for responsible marketing. Responsible marketing General Mills will ensure that our marketing messages are inclusive and respectful. We will not produce marketing that is vulgar, insulting, or demeaning, or that undermines the role of parents and family or respect for community authorities. When placing paid advertising for our brands, General Mills will take steps to ensure that the advertising will air only on programming General Mills deems suitable, audience-appropriate, and relevant for the brand. The responsibilities of the RMC include: Drafting and annually issuing the General Mills Marketing Policies; b. Ensuring full compliance with the Policies through training initiatives; and c. Holding annual advisory reviews of all new product development plans and brand marketing plans for products that will be marketed to children. Advertising in schools Regardless of the nutrition profile of the product, General Mills does not directly advertise food or beverage products in schools, pre-K through 12th grade. Advertising to children under six Regardless of the nutrition profile of the product, General Mills will not engage in any product advertising on programming or media primarily directed to children under six years of age. We are a founding member of CFBAI and a variety of analogous self-regulatory programs around the world. In any market where we are a member of such a program or where specific regulatory requirements exist , we apply the Nutrition Standards that are applicable in that jurisdiction in lieu of applying the CFBAI Nutrition Standards. If a product does not meet the Nutrition Standards: COPPA and other privacy compliance i. Email marketing General Mills does not engage in email marketing directed to individuals under 18 years of age. Online behavioral advertising As required by law, General Mills does not engage in online behavioral advertising techniques i. Social media, blogs, chats, and user-generated content i. Third-party social media platforms Through its own websites or other communications, General Mills will not encourage children to participate in third-party social media services where the participation of children at these ages is not consistent with the terms of use of those services, and will not create promotions directed to children involving the use of these third-party social media services. Blogs, chats, and similar interactive communications General Mills will not operate any blogs, message boards, chat rooms, or other similar online forums directed to children under the age of Social sharing tools No social sharing tools such as means for sharing material on Facebook may be included on any General Mills website directed to children under the age of Encourage families and children to understand and follow nutritional guidelines for a balanced diet of healthy and nutritious foods. Advocate and reinforce the importance of higher levels of physical activity. Over-consumption may not be depicted. Representations of kids In child-directed marketing, children must be depicted as active and energetic, engaging in physical activity in support of the General Mills BME strategy. Physical activity General Mills actively seeks ways to promote physical activity within interactive media.

Commonwealth of Pennsylvania and Mills v. Board of Education - addressed the issue of education for children with disabilities. At the time, millions of children with disabilities were refused enrollment in public schools, were inadequately served by public schools, or were sent to institutions.

What is a constitution? A national constitution is a set of rules for governing a country. Such rules may be based on tradition or may be written down in the form of a law or a number of laws. In some countries laws forming the constitution are ordinary laws which can be changed just like any other law, but in most countries the laws forming the constitution have a special status. The Constitution of Australia has a special status—it cannot be changed in the same way as other laws can be changed and it is a supreme law, that is, it overrides other laws. Before the present Australian States were separate colonies of the then British Empire. When the colonies decided to join together in a federation, representatives from each colony were elected to attend meetings called constitutional conventions to draw up a constitution for the new nation. The draft constitution was later approved by a vote of the people in referendums held in each colony. What does the Australian Constitution do? Australia is a federation of States which each have their own constitution, government and laws. The Australian Constitution originated as an agreement under which the former colonies came together as States in a federation. In brief, the Constitution establishes the form of the federal government that is, the Commonwealth, national or central government and sets out the basis for relations between the Commonwealth and the States. What does the Constitution cover? Chapter 1—The Parliament This chapter, the longest, covers the structure and powers of the federal Parliament, including: General the legislative or law-making power of the Commonwealth. Each State is represented equally and there must be at least six Senators from each State. The Parliament may make laws setting out how Senators are elected and also to change the number of Senators there are now 12 from each State ; frequency of elections. Elections for half the Senate take place every three years. The House of Representatives represents the people of each State in proportion to their numbers—that is, there are more Members from the States with the largest populations. Each of the original States must have at least five Members. The total number of Members must be, as nearly as practicable, twice the total number of Senators. The Parliament may make laws setting out how Members are elected see Infosheet No. After election the House of Representatives may last not more than three years, but can be ended dissolved sooner by the Governor-General; qualifications of Members of the House of Representatives; elections to fill vacant House of Representatives places by-elections ; Both Houses of the Parliament matters disqualifying Members and Senators; the settling of disputed elections; parliamentary privilege see Infosheet No. The federal Parliament can make laws only on certain matters. On some matters the Commonwealth is given exclusive powers—that is, the States are not able to legislate in these areas. On other matters the Commonwealth and the States have what are called concurrent powers—that is, both the Commonwealth and the States may legislate. In other respects the Senate has the same law-making powers as the House of Representatives including the power to reject any legislation ; special requirements for financial legislation see Infosheet No. Chapter 3—The Judicature The structure and powers of the federal judicial system, including: Chapter 4—Finance and Trade Commonwealth finances and trade between the States, including: Chapter 6—New States Deals with the creation of new States and gives the Commonwealth power to make laws for the government and representation of the Territories. Chapter 7—Miscellaneous Covers the establishment of the Seat of Government i. Chapter 8—Alteration of the Constitution Sets out how the Constitution may be changed outlined below. These include the position of Prime Minister and the group of senior Ministers called the Cabinet, who make major policy and administrative decisions and in effect govern the country. The Parliament does this by passing legislation. For example, the first national elections were held under State laws. Later elections were conducted under the provisions of the Commonwealth Electoral Act. Another example is the number of Senators and Members, which may be changed by an Act of

THE FINANCIAL RELATIONS OF THE COMMONWEALTH AND THE STATES R. C. MILLS pdf

Parliament as long as the specific conditions set by the Constitution are met. The High Court does this only when a specific case is before the court requiring a ruling on a provision of the Constitution; it does not give advisory opinions. Interpretation of the Constitution has been needed not only because of disagreements over the meaning and application of particular provisions, but also because of developments which were not foreseen when the Constitution was written for example, aviation and television. Through interpretation the effect of the Constitution has been changed over the years. How can the Constitution be changed? The Parliament can change ordinary laws by passing amending laws, but it can only initiate proposals for changes to the Constitution. The approval of the people of Australia is necessary for any change to the Constitution, just as the approval of the people of Australia was a step in the process of creating the Constitution in the first place. The Constitution itself sets out the way in which it can be changed. A proposal to alter the Constitution starts as a bill in either House of the Parliament and can be introduced by any Member or Senator. A constitution alteration bill goes through the same stages and follows the same procedures in each House as any other bill see Infosheet No. When a constitution alteration bill has passed both Houses it is voted on by the people of Australia in a referendum held after two months but within six months. A constitution alteration bill does not have to be passed by both Houses of Parliament. If one House refuses to pass a constitution alteration bill which has been passed by the other House, the bill may be submitted to a referendum if the first House passes the bill a second time. If a proposal affects an individual State rather than all States generally, the proposal must also obtain majority approval in the State concerned. Many proposals for constitutional change have been discussed over the years, but most have not got as far as referendum or have been rejected at referendum. Forty-four proposals to alter the Constitution have been passed by the Parliament and submitted to referendum, but only eight have been successful.

In the end, however, we are left only with the defendant's view that it was a financial interest in continuing to be appointed to cases and speculation that Cacchiotti had an incentive to hire Mills, regardless of Mills's work product.

Pre-colonization[edit] Massachusetts was originally inhabited by tribes of the Algonquian language family such as the Wampanoag , Narragansett , Nipmuc , Pocumtuc , Mahican , and Massachusett. The event known as the "First Thanksgiving" was celebrated by the Pilgrims after their first harvest in the New World which lasted for three days. The Pilgrims were soon followed by other Puritans, who established the Massachusetts Bay Colony at present-day Boston in The Massachusetts Bay banished dissenters such as Anne Hutchinson and Roger Williams due to religious and political disagreements. In , Williams founded the colony of Rhode Island and Hutchinson joined him there several years later. Among those who objected to this later in the century were the English Quaker preachers Alice and Thomas Curwen , who were publicly flogged and imprisoned in Boston in His first victory was the Siege of Boston in the winter of 1766, after which the British were forced to evacuate the city. Although the documentation is incomplete, about 1, letters of marque , issued on a per-voyage basis, were granted during the American Revolution. Nearly vessels were commissioned as privateers and are credited with capturing or destroying about British ships. Adams was highly involved in the push for separation from Britain and the writing of the Constitution of Massachusetts in which, in the Elizabeth Freeman and Quock Walker cases, effectively made Massachusetts the first state to have a constitution that declared universal rights and, as interpreted by Supreme Judicial Court Chief Justice William Cushing , abolished slavery. David McCullough points out that an equally important feature was its placing for the first time the courts as a co-equal branch separate from the executive. Vermont became a state in but did not fully ban slavery until with the Vermont Personal Liberty Law. The Pennsylvania Gradual Abolition Act of [] made Pennsylvania the first state to abolish slavery by statute. Later, Adams was active in early American foreign affairs and succeeded Washington as the second United States President. During the 19th century, Massachusetts became a national leader in the American Industrial Revolution , with factories around cities such as Lowell and Boston producing textiles and shoes, and factories around Springfield producing tools, paper, and textiles. Canals and railroads were used for transporting raw materials and finished goods. Anthony in Adams, Massachusetts. Massachusetts was the first state to recruit, train, and arm a Black regiment with White officers, the 54th Massachusetts Infantry Regiment. Watson in the next room. By the s, competition from the South and Midwest, followed by the Great Depression , led to the collapse of the three main industries in Massachusetts: Commonly known as "the Big Dig " , it was, at the time, the biggest federal highway project ever approved. Kennedy , Massachusetts native and 35th President of the United States 21st century[edit] On May 17, , Massachusetts became the first state in the U. Boston Marathon bombing Two pressure cooker bombs exploded near the finish line of the Boston Marathon on April 15, , at around 2: The explosions killed three civilians and injured an estimated others. The ensuing manhunt ended on April 19 when thousands of law enforcement officers searched a block area of nearby Watertown. Dzhokhar later said that he was motivated by extremist Islamic beliefs and learned to build explosive devices from Inspire , the online magazine of al-Qaeda in the Arabian Peninsula.

Note: The Intergovernmental Agreement on Federal Financial Relations provides an overarching framework for financial transfers between the Commonwealth and the States and related collaboration on policy development and service delivery.

Brooke became military governor of Puerto Rico. Spain subsequently ceded the island to the United States by the Treaty of Paris , which was signed in December and ratified by the U. Senate in February The military administration, which lasted until May , successfully policed the island, established a public school system, managed government finances, and built sanitation networks, highways, and other public works. However, the military ruled with little regard for political or cultural sensitivities. Congress instituted civil government in Puerto Rico with the Foraker Act May , under which the United States continued to exercise the controlling power, a condition that proved distasteful to many Puerto Ricans; as a consequence, the law was subsequently amended to give Puerto Ricans a wider role in the government. The Olmsted Act, approved by the U. Congress in July , gave the U. However, the majority of Puerto Ricans eventually demanded a larger measure of local control and many other changes. During World War I the U. Congress responded to these pressuresâ€”and to the threat of German submarines prowling Caribbean watersâ€”by passing the Jones Act , which came into effect in March Under its terms U. However, the act failed to grant the measure of self-determination that Puerto Ricans had demanded in light of the democratic tradition of the United States, because key officials, including the governor, remained presidential appointees and were thus beyond local control. In spite of the legal limitations on political autonomy , Puerto Ricans slowly developed a sense of greater liberty as a result of the change of sovereignty. At first this new order was sometimes mistrusted, resented, and misunderstood, but in the long run it was recognized as beneficial. The powers of church and state were separated, resulting in open competition for religious adherence , and government programs began to deal directly with the vital needs of the people, including education, health and sanitation, and the regulation of working conditionsâ€”changes designed to remedy centuries of neglect. Socioeconomic concerns Early U. Puerto Rican agricultural products, particularly sugarcane , were included within U. Puerto Rico, aided by the adoption of U. Three-fourths of the population became directly or indirectly dependent on sugarcane as land under cultivation expanded sevenfold between and , new disease-resistant plants were imported, new styles of corporate management were implemented , and transportation facilities and large and efficient sugarcane-grinding mills were built. The population increased from about , in to more than 1., in Courtesy of the Organization of American States The new focus on large-scale production sharpened social and political tensions as wealth was concentrated into fewer hands and formerly independent farmers lost their lands and became plantation employees. In addition the island was forced to import much of its food, and the government focused most of its aid on disaster relief and transportation problems rather than helping small-scale coffee growers. Tobacco production increased until about , when most smokers in the United States shifted from cigars to cigarettes which are produced from a different type of tobacco plant. The population seemed likely to double within two generations. The worldwide Great Depression struck in the midst of these changes, and U. Recurring hurricanes and declining exports aggravated the economic distress of the island. Political developments Most Puerto Rican political parties since had attempted to modify the political relations between the island and the U. The Nationalist Party arose in the s and argued for immediate independence. Puerto Rico was aided somewhat in the mids by Pres. The newly formed Puerto Rican Reconstruction Administration PRRA attempted to redistribute economic power on the island, primarily by placing a restrictive quota on sugarcane production and enforcing a long-neglected law that limited corporate holdings to acres hectares. The program provoked open opposition by the sugarcane companies, which were strongly represented in the Republican Party, but the Socialists tacitly accepted the program. Two unconnected factors jeopardized the success of the New Deal program. The second factor was related to a rise in violence

by the Nationalists: The offer of independence, made when the island was facing adverse economic conditions, served to realign the political parties into pro- and anti-independence groups and again distracted them from pressing economic issues. The colonial governor, Rexford Guy Tugwell, allowed the PPD to initiate such economic reforms as redistributing land, enforcing labour laws notably those regarding minimum wages and maximum hours, instituting a progressive income tax, and establishing an economic development program. The PPD partially fulfilled its aims and was overwhelmingly backed by the electorate in Two years later Pres. Congress allowed Puerto Rico to elect its governors by popular vote. Library of Congress, Washington, D. LC-USFZB During the period 1968 Puerto Rico experienced a major economic change, shifting from agricultural dominance to an economy based on industrial production, largely through Operation Bootstrap, a government program that promoted economic development and social welfare. The program initially promoted cooperative farming and labour-intensive industries, but when these efforts failed, the government invested heavily in transportation infrastructure and attracted privately owned factories through tax breaks and government-supported start-up costs. These factors, together with low wages on the island, induced hundreds of U. Workers increasingly left the sugarcane and coffee fields and moved into the coastal cities where wages, working conditions, and social services were improved. However, many also migrated to large metropolitan centres in the United States.
