Belated Messages When I was in high school, I dated this marvelous girl. She was charming, sweet, and had THE perfect smile. Sadly, she got in an ATV accident and passed away due to head trauma. This destroyed me and I was a wreck. But exactly a week later, IIRC, I got an e-mail from her saying that she was so excited to hang out with me that summer. It strangely made me feel better. About 5 seconds into this deep meditation, the room got incredibly bright as far as I could tell with closed eyes as if I was looking at the sun with my eyes closed. My therapist stopped mid sentence just then. I still have no idea what happened. Snow Globes My Mom always bought snow globes for my grandma, when my grandma passed away my mom took them back to our house. My mom put them all up on the shelves that go around the entire living room. A few weeks had passed and my mom found a video that she wanted my brothers and I to watch because it reminded her of our grandma. We all sat down to watch it and of course near the end of the movie our mom was crying. Right when the movie ends all of the snow globes went off at the same time. My mom suddenly felt really uncomfortable and had all of us run and get into the car and she drove us to our god mothers house. He was the first of my grandparents to die, and the rest sort of fell like dominoes behind him. I was out of town when he passed " he had been in the hospital a while stable , so it was very unexpected. Wiped tears away and stood strong for my dad, helped with the arrangements, supported everyone as best I could. All that passed without incident. A couple of years later " my maternal great grandmother, a true diamond, fell and broke her hip. She was closing in on , and ultimately made up her mind to just let go. We understood, and took turns sitting with her until it was time. The last time I saw her, she told me that she was ready to go and imparted her last words on me. I leaned into her with a hug, and asked her for a favor: We cried a little and I went home " she passed that night, about 3 in the morning. I sat there listening, it was all pretty neat. The panel was uneventful. It ended, and I lingered around for a while. I was going to leave, but I cant until I tell you this.

Looking for the name of a song? Visit our Playlist Archives: Hosted by local folk musician Buffie Groves, this show will feature a wide range of performers and musical styles, from heritage artists like Robert Johnson and Big Mama Thornton up through the singer-songwriters of the Boomer generation, and all the way to contemporary folk and acoustic musicians who are carrying on these traditions for a modern audience. These changes will take place on May 1st and beyond. You can tune in each Sunday Morning from 8am. Starting May 7th host Dave Palmater will sit down and discuss influences and more with local and national musicians and industry folk. Basically musicians get to play Guest DJ. These minutes features will spotlight the reach of Folk Music. Why was Pete Seeger important? Why is he still important today? How has Lead Belly influenced the music of Jack White? Scott will answer these and much more. Many of you have asked us to turn it into a podcast. So if you miss it Saturday Mornings from 8am you can catch it Sunday evening from 8pm. Jane was a passionate music radio DJ, very knowledgeable about the artists she cared about, and without trying to be very funny! Sometimes I hear her voice talking about lyrics. How I admired the people in high school who knew the lyrics to songs. I had a hard time even understanding the words in the songs I heard on the radio. And I hold on to it. What an amazing skill for a writer. I thought of that song the first time I saw Susan Cattaneo play at a little club in Union Square, Somerville about five years ago. The first line of the song has eight words. The way she delivered them I got it. The line just came out and whacked me upside the emotional solar plexus. I took a drink then it took me. My imagination got with the program, so to speak, and filled in the rest ahead of the following line. All in eight words. That skill blows me away.

The Fabulous Furry Freak Brothers is an underground comic about a fictional trio of stoner characters, created by the American artist Gilbert www.enganchecubano.com Freak Brothers first appeared in The Rag, an underground newspaper published in Austin, Texas, beginning in May , and were regularly reprinted in underground papers around the United States and in other parts of the world.

Two men broke down my front door This whole event happened when I was 9 years old. My parents went out for the night and they left me with my 2 older brothers and a couple of their friends. My oldest brother was probably 17 or 18 at the time. My other brother had to be about 11 almost So all together, it was my 2 brothers, 2 of my oldest brothers friends, and me. It was around 7: I had been playing in my room. Out of nowhere, I heard a lot of banging and yelling. There were 2 men in my living room yelling and flipping out. I quickly went back to my room and shut off the lights and hid under a bunch of toys in my closet. After about 5 minutes of hiding, someone came into my room. I had a sheet over my closet at the time, so I could kind of see out of it. It was one of the men. He took a quick look around and left out. After he left out, he locked my other brother into my parents room. There was a lot of yelling still coming from the other man in the living room. After awhile I got up and walked down the hallway a bit to see what was going on. My brother and a man were fighting on the floor. At this point I took this opportunity to get my other brother out of my parents room. My brother got the phone and called the cops. About 10 minutes later, the cops showed up. They arrested both of the men. Now you probably want to know why they broke in. Both of these men were drug dealers. My brothers friend had gotten mixed up in it. They somehow found out he was at my house that night and decided to come after him. I have no idea why they chose at that time, but they did. Luckily no one was hurt too badly. Man tried to break into my house, scared him away with sick beats This happened about 2 weeks ago to me and my brother and it still is freaking us out. My brother is 14 and I am We live in BC,Canada in a farming area, not much happens here. My brother was trying to play rap songs on the sound system but kept fucking about so i took a little nap. At around 6 my brother violently wakes me up and says he hears someone laughing by the back porch. So being the big bruh I had to go check it out. It was really creepy it got louder and louder and we started freaking the fuck out. He grabbed a Thor war hammer replica made out of steel. I panicked and picked up a 3 day old plate with nacho cheese stains on it Yes i could have gotten a knife I am dumb. When we got out their we saw nothing, ran back inside and called our parents, Whom swiftly turned their car around and headed back home. My brother called and we ran up stairs, but the area we live in has no surrounding community really it would take a while to get here. Was the loudest beat drop i ever heard the cops eventually heard it and found us but it was too late he was long gone he got scared i guess. Fast forward to last week they found the same guy trying to break in to another persons house and they pin pointed it to our case with his weird ass knocking technique. He was clinically insane and had walked out of a mental facility and found our house. The cops told us he heard Spongebob playing on the t.

The Fabulous Furry Freak Brothers The Bus Line and Other Tales (Freak Brothers #11) by Gilbert Shelton 11 The Fabulous Furry Freak Brothers #12 by Gilbert Shelton.

Their debut was in an advertising flyer for a winter film short called *The Texas Hippies March on the Capitol*. The first compilation of their adventures, *The Collected Adventures of the Fabulous Furry Freak Brothers*, had its first printing in and has been continually in print ever since. In addition to underground and college weekly newspapers, new adventures appeared in magazines such as *Playboy*, *High Times*, and *Rip Off Comix*; these too were collected in comic book form. Shelton continued to write the series until, in collaboration with Dave Sheridan and Paul Mavrides since. The works enjoy a sizable cult following and the magazines are widely available in comic stores. The majority of the comic books consist of one or more multi-page stories together with a number of one-page strips. Some of the titles also contain a small number of strips featuring completely unrelated characters. Characters[edit] The Freak Brothers are not siblings. They are a threesome of freaks similar to, but distinct from, hippies from San Francisco. Apparently he has always been on the streets and it appears that he is several years older than the others. He is certainly old enough to be troubled at times by impotence. In one story he reveals that he grew up in an orphanage and never knew his parents. Tall and skinny, he has a big bulbous nose, a waterfall mustache and a ponytail. He wears cowboy boots and a cowboy hat. In one strip, he runs into an ex-girlfriend who has a child that bears a striking resemblance to him. He does his best to evade them and is relieved when she does not recognize him. In another strip, when he meets his own possible father, the same storyline is inverted. Phreakears is the intellectual and idealist of the group. He has enough mastery of chemistry to create new drugs and takes an avid interest in politics. Of the three, he is the most committed to social change and environmental issues. He is from Texas and while his mother is relaxed and open-minded, his father is a card-carrying member of the John Birch Society. He is the hairiest of the brothers - tall and skinny with a thick bush of black hair, a beard, and glasses. He is the stereotypical left-wing radical, bearing a superficial resemblance to Abbie Hoffman or Jerry Rubin. Fat Freddy Freekowtski is the least intelligent of the trio and is most likely to be preoccupied with food. He is fat, with curly yellow hair. His compulsion to eat is the subject of several of the adventures of the group. Fat Freddy frequently gets "burned" during drug transactions; when he does "score" he typically contrives to lose the drugs in various ways, such as by dumping them out of a shopping bag in front of a cooling fan, which then blows them out the window onto a police car. Fat Freddy comes from an unexceptional, large family in Cleveland. He is driven away by an angry mob as soon as they hear the name Freekowtski. Other recurring characters include: He also has several multi-page stories devoted to him. Many of his strips parallel a storyline in the corresponding *Freak Brothers* story, and often have themes of a scatological nature. He has several "nephews" who refer to him as "Uncle F. He is far smarter than his owner whom he frequently refers to as "the obese one" and regards the *Freak Brothers* with amused contempt. He is also the subject of several spin-off collections of stories. Hiram "Country" Cowfreak, a hippy who grows vast quantities of marijuana at his isolated farmstead. He is often mentioned in the strips but rarely appears in person. Governor Rodney Richpigge, a stereo-typically rich, corrupt politician whom the *Freak Brothers* hold in general contempt. Story-lines and themes[edit] Fat Freddy, with his cat Drug use is the predominant theme that runs throughout all volumes of this title. The protagonists "live in a state of blissful torpor relieved only by bursts of paranoia or stimulant-induced frenzy. Heroin is usually missing from the list. In one adventure, Franklin is shown to turn down an offer of "smack" when hitching a ride. These stories most often involve Fat Freddy and his marijuana-induced "munchies" increased appetite. Several stories satirize governments, particularly the U. These stories invariably show politicians and their agents as corrupt, incompetent, or both. The theme of foreign travel is sometimes explored, most notably in the three-part *Idiots Abroad* series. It is common for the story-lines to begin with an air of realism, but rapidly descend into comic pantomime. *Freak Brothers* stories include: They snort it all in

The Fabulous Furry Freak Brothers The Bus Line And Other Tales (Freak Brothers #11) Published by Knockabout Comics Author(s).

Glenn Chadbourne, who is well known for his "extraordinary horror art", has also illustrated several Stephen King novels. Yes, and adult themed coloring book! What better way to have fun than with Zombies when you are already a noted horror artist? This coloring book is a lot of fun! There are all sorts of characters, scenarios, and themes throughout the book. The art is so detailed it is amazing to look at even before you start coloring. Once you begin coloring, the pictures really come to life There is a nice intro from Glenn Chadbourne himself, and a short bio on the back. Your inner child will thank you. Now, here is my exclusive interview with, Mr. What was it like for you growing up in Maine, and how old were you when you discovered you loved drawing? In ways it was a more innocent place, with a sort of Norman Rockwell feel There was a lot of abuse that went on and never got reported or brought into the light of day. A lot of alcoholism, a lot of commonplace violence You could see it on the faces It was more isolated back then and folks dealt with their own situations as best they could. As for my artwork, I just drew things from the time I could hold a crayon pretty much. Who were some of your inspirations? Two of my heroes as a kid: I think my style morphed into a sort of hybrid of those styles, and then it stitched its own footing as time crept along. I was big into underground comics as a kid. Also all the Warren magazines and the Ec comics--into their third or fourth reprints in those days. You get the picture. Some of your art reminds me of the artists from MAD Magazine, were any of the artists for that publication inspirations as well? Oops, shame on me--of course MAD makes the list! What was your first professional job as an artist? My first pro nibble was when I won a contest in Cerebus comics. They hosted an armature style "submit some comic art" contest. I sent a comic in called Closing Time. It showed two people hooking up at a bar. They were both hammered. The final panel showed them waking up the next morning looking like monsters as they pried their eyes open and saw each other in the light of day. Have you met him? Another real sweetheart of a fella. Bev is the "go to" guy for any and all SK trivia. Dave and I met through a mutual friend, Rick Hautala I do a slew of projects for Dave. We talk on the phone all the time; might as well be an old married couple. As for Richard Chizmar, and Cemetery Dance, they really put me on the map with some incredible projects over the years, and they too are like family. In all, this specially spooky book bizz is a fairly small stable of characters. How is it you decided upon How did you choose which made the book? In all honesty, I just let things drip out of my head onto the page. I get an idea, think it would make a fun drawing, and go for it. It helps to have a twisted sense of humor in this line of work. Actually a twisted sense of humor helps with most avenues of life these days. From start to finish, how long did it take you to do each drawing? The zombie drawings take me on average three to five hours, depending on detail. I just got carried away with a few detail-wise. Detail stuff just comes natural to me. Where can collectors purchase this book? Your art is truly amazing, would you ever do a comic book now that you have done a coloring book? Comics were how I got my start. Will you be doing any other adult coloring books in the near future, say, a Stephen King coloring book? I know others will as well. Soooo, nice talking with you.

Share Tweet Submit Pin The album—down to the title itself—was a celebration of unselfconscious passion and a huge step forward musically: Outlaws Are you from the South? Do you own a musical instrument? This is one of those bands whose first album the first of 17 or so over the last 43 years was its very best. The Southern Harmony and Musical Companion After the commercial success of their solid and straightforward debut Shake Your Money Maker, the Atlanta hippy throwbacks took a giant leap forward with their second effort, plugging in new and better instrumental elements and writing a batch of songs that built on their Stones of the South bedrock with nimble, cocksure jaunts into psychedelia, blue-eyed soul, and British black-magic riffage. And new organist Eddie Harsch helped free the band from the confines of bar-band bromides with an agile undercurrent of psych, folk and saloon keys. The Crowes would never get it this right again. Second Helping If this Jacksonville band found its sound The Rolling Stones relaunched in Florida biker bars on its debut album, Pronounced Leh-nerd Skin-nerd , it found its songwriting voice on this sophomore release. This is where they proved just how much range a Southern rock band could have. Its 15 tracks never feel bloated which is more than you can say for their creator. Rather, Heartbreaker traces a journey of nostalgia and love—with songs of sentimentality, selfishness, sullenness, desperation, and reflection all bundled into one rollicking set. But at its heart, this is simply the twangier side of Southern rock. Rooted in the heart of Memphis, Big Star wrote Beatles-esque arrangements with a Southern twist, releasing a debut album that would later influence R. It offered definitive proof that this particular son of Louisiana had no qualms about turning the tables on the genteel manners and polite reputation credited to those who dwelled below the Mason Dixon Line. Indeed, other than Little Richard, no other piano player came across as such a barroom brawler, and this album not only set the standard, but laid the course for all that would follow. On the more concise follow-up, Decoration Day, the Truckers distilled their new sound from 80 to proof. The Allman Brothers Band: The Marshall Tucker Band: But with Southeastern, Isbell broke his hard-luck streak, crafting an album worthy of his considerable talents. Each of the songs is a stunner. It sets the tone for the remainder of the album, which is given equally to the promise of romance and the ever-looming possibility of suffering, both self-induced and arbitrary. His baritone, always rich, is deepened here by a grittiness that lends Southeastern a real soulful quality. On their third album, the trio more or less perfected the formula that would keep them in beard oil for the next four decades: With the trio in perfect lockstep. Tres Hombres moves forward from there with breakneck momentum: This was the sound of million teenagers realizing that they could have a music all their own, and that it could be played by a flamboyant black man from Macon, Ga. This was the music your parents feared would corrupt their progeny. Murmur You know about the mumbling, the muttering, the indie success story, the simultaneous conquest of college radio and Rolling Stone—and subsequently, the world. But Patterson rebelled against that legacy by joining a succession of punkish garage-rock bands. He was 21 when he met the year-old Cooley on that circuit. Cooley was the one with the big Carl Perkins influence, and I was too caught up with the Replacements and R. When Hood played his new songs, he knew they deserved a band behind them and he knew that band had to include Cooley. So he scraped together some money to record a single in Athens and invited his estranged ex-bandmate to play on the session. Things clicked, and soon the Drive-By Truckers were born. More important, the album features two of the absolute greatest rock songs of all time: The album is a document of the group at its very best: Gregg Allman nails the balance between sultry and mournful in his vocals, Betts and Duane play together so intuitively that it seems like they were the brothers, and the double-drummer rhythm section holds the whole thing together with impeccable skill. Along with The Grateful Dead , whose tripped-out take on traditional American music had made them stars on the West Coast, the Allmans were blazing a trail for every road-tested band whose stock in trade was its live

THE FREAK BROTHERS BUS LINE AND OTHER TALES (FREAK BROTHERS #11) pdf

show, not its studio recordings. With just seven songs stretched over 78 minutes, At Fillmore East was a masterclass in all the ways rock music was being adapted and reshaped by a new generation of torch bearers, with the emphasis split between honoring the origins of the music and pushing it forward to heretofore unknown heights of instrumental magic.

The Fabulous Furry Freak Brothers FFF2 (Rip Off,) © Gilbert Shelton Black and white series.

Carnival sideshows and freak shows have long put the different and deformed on display. While some have argued that at least these shows gave people the chance to make a living, for others, it was a tragic part of an equally tragic life. A genetic disorder, the condition is primarily characterized by brittle bones that break very easily. Those who suffer from it can have mild forms with little impact on their quality of life, but more severe forms can mean suffering from hundreds of broken bones, along with scoliosis, brittle teeth, short stature, and even fragile skin and muscle tissues. For Parks, his version of the condition meant he not only suffered from frequent broken bones, but that his arms and legs were twisted and malformed. He played up his thin, twisted arms and legs, taking on the persona of a frog and often getting on all fours. He was advertised as looking exactly like a bullfrog with a human head. Parks was married twice, but his personal life was marked with tragedy. His first wife died in childbirth, along with their second child. Their first child was a son, born without the condition. Parks died in , when he was 49 years old. Wellcome Images According to the literature and the signs that accompanied Krao on her tours, she was proof of the missing link between man and monkeyâ€”proof that Darwin was right. She was said to be the transitional creature between the two, and she was advertised as having cheeks that she could store her food in, as well as big, pouting lips, the remnants of a tail, and hair covering her entire body. Krao was seven years old when she first went on display at the Westminster Aquarium in . Before she died in from complications associated with influenza , she traveled with both Barnum and Bailey and the Ringling Brothers circuses. By all accounts, Krao was more than just a freak show performer. She was something of an erotic, exotic attractionâ€”the Westminster Aquarium was known as much for prostitutes as it was for oddities. In , she was exhibited before a congress of professors, academics, and representatives of the medical profession at Trinity College in Dublin. The experts were encouraged to verify that sheâ€”a product from a family with a similar appearance, rather than a one-off accidental freakâ€”was a missing link. However, she was well-spoken and educated by this time. By the time she was a teenager, Krao could readâ€”and was very well-readâ€”and could also speak five languages and play the piano. A learned creature with a so-called simian appearance, she had been carefully groomed to represent both man and monkey. Only 45 centimeters 18 in tall and weighing 17 kilograms 39 lb , Williams was billed as having the flippers of a turtle for hands and feet, while having the head of a man. In addition to exhibiting his physical deformities, Williams was also known for his amazing singing voice and his skill playing several musical instruments, including the flute. During his down time, he was also a devoted craps and pool player as long as his opponent would agree to let him walk on the table. He gained a certain amount of notoriety when he sued New York City after being injured when his wheelchair struck a rut in the sidewalk and overturned. Unfortunately for Williams, he lost the suit. Their appearance was often compared to historical portraits, drawings, and illustrations of the ancient Aztecs. Complete with their origin story, they were on display throughout Europe and the US for four decades, even as the personal guest of President Millard Fillmore. The pair were examined by doctors in Boston during their appearance there, and an article on them was published in the American Journal of the Medical Sciences. They were born in El Salvador, suffering from microcephaly. This condition is usually identified first by an abnormally small head, which can lead to seizures, dwarfism, and developmental disorders. Instead of curing them, though, they were put on display in freak shows across Europe and the US, sold and resold a number of times for the next 60 years. In , they were officially marriedâ€”in spite of being billed as brother and sister in earlier shows. Maximo ultimately died in , and there is no record of what happened to Bartola after his death. Wellcome Images Sarah Biffin was born in , with vestigial legs and no arms. Fiercely independent, she could sew by the time she was eight and writeâ€”holding the pen in her mouthâ€”when she was . When she was 13 years old, she left her family and joined up with a traveling sideshow owned by Emmanuel Dukes. At first, Dukes exhibited her

THE FREAK BROTHERS BUS LINE AND OTHER TALES (FREAK BROTHERS #11) pdf

doing everyday tasks that were meant to be miraculous because of her lack of arms and functioning legs. Until Biffen decided that she wanted to learn how to paint, that was. Paint she did, and she was amazing. Holding the brush in her mouth, and steadying it by tying it to her shoulder, she was soon producing works of art that were nearly masterpieces. She was eventually commissioned to paint the portrait of the Earl of Morton, and from there her popularity skyrocketed—only partially because of her condition. By the time Biffen was 29, she retired from the sideshow circuit and settled into a London studio to become a full-time painter. She was awarded medals from the Society of Arts, and now has her work on display at the National Portrait Galleries of Britain. General Tom Thumb Tom Thumb is perhaps one of the most famous of all sideshow performers, but less famous is his wife, Lavinia Warren, who was only 81 centimeters 32 in tall and weighed 13 kilograms 30 lb. Warren was born in , and married her famous husband in . Previously, she spent a year as a teacher in her Massachusetts hometown. The couple was married for 20 years when Tom died after suffering a stroke. Two years later, she was married again. She did, however, continue to sign her name in her personal documents as Mrs. But she seemed destined for it, weighing kilograms lb by the time she got out of school. She attempted to make a career out of secretarial work, but found that her weight got in the way of her job performance and even attracted gawkers. Soon, she joined the same circus that her mother had worked for—Ringling Brothers. By the time she married, she weighed kilograms lb , although she was advertised as weighing more and was gaining about 18 kilograms 40 lb every year. One of the stories recorded about her tells of her trip back to her hometown in Indiana well after she had joined the circus. She died in in the hospital, where she was having tumors removed from her legs. When she vomited under anesthesia, no one could move her, and she choked to death. One thing that is known is that it was the legendary P. Barnum who created her. In the late s, the perfect woman, the pure racial ideal, the most delicate specimen of beauty, was the Circassian woman. Part of the myth had begun a century before, with tales of beautiful white women being sold into slavery and populating Turkish harems; the other part was a creation of Barnum. In , he ordered one of his associates to procure a Circassian woman for him to exhibit in his shows. He dressed her in jewels and embroidered gowns, gave her a cross to wear, and instructed her to wash her hair in beer and comb it into a cloud around her head. The look became the template that countless other Circassian Ladies would aspire to, even though there was nothing about it that had anything to do with actual, real women from the Circassian region of the Caucasus. The twins were joined at the sixth rib. They had one pair of legs each one controlled one leg , but separate stomachs, lungs, hearts, respiratory, and circulatory systems. One could get sick without the other feeling ill. Those who met them often remarked on how different the two were—Giovanni liked beer while Giacomo preferred water. Giovanni could draw, while Giacomo was the more talkative of the two. While their parents were by all accounts shocked and horrified at the appearance of their sons, they soon realized that their deformities were extremely marketable. They went on tour in Europe first, ultimately going to the US. Perhaps unsurprisingly, they got along decently well, but disagreements were known to end in a fistfight. Scientific American documented the boys, calling them amazing, healthy examples of twins. His parents were slaves from Africa, living and working on a plantation belonging to a man named Mr. The boy was born with piebaldism, a genetic condition that results in patches of white skin, usually more noticeable on the face, head, and upper body. Still a baby when he was put on display for the first time, George Alexander was first on exhibit in cities on St. By the time he was 15 months old, he was taken to England, where he was sold into the traveling sideshow of a Mr. Richardson who, by all accounts, treated the boy as if he were his own child. The young boy was so popular that he was often contracted by wealthy citizens who wanted to arrange more private viewings with him, and his popularity meant that he was often on stage for up to 12 hours a day. The grueling schedule was thought to have something to do with his untimely, tragic death—not yet five years old, George Alexander developed severe swelling in his jaw and died on February 3, Richardson buried him in a vault in Great Marlow, Buckinghamshire.
