The answer, I gathered, is the rate of change. This all started the weekend before Tuesday, November 6th, Election Day. I was at a bar surfing a red wave, of sorts. He tends to just hand me any beer, and I usually drink it without complaint. This one, however, was revolting. The air was thick with political commentary headed for the upcoming election. Everyone had an opinion. There were the fatalists, the idealists, the anarchists, the jingoists, those allergic to the toxic political climate, the undecided, and one Phd candidate, all sitting around me. Or to put it another way: I wanted no part of it. Like my beer, I pinched my nose and powered through it, and eventually I got used to the smell. Fostering an informed public with fear-stoking, naked aggression, open hostility, and a calculated exploitation of raw facts is like trying to get someone interested in camping by warning them about the Blair Witch Project. I sagged and tried to shove my whole head into my beer glass. What a stupid thing to say, considering this election would be the ONLY election we can vote in right now. Likewise, casting a ballot for a future race would be frustrating at best. The whole scene was getting to me. I realized I was very drunk. I walked outside, intent on securing a ride home. I would grab an Uber and leave my car in the parking lot. I was about to summon a driver when one of the Grumpy crew, a casual acquaintance, walked past me. It was, I thought, a reasonable choice. Then I saw his car. The damn thing was the size of an egg, and probably about as delicate. I had made my decision, uninformed, and now I was nervous. I had cast my lot, though, and so I climbed into what was probably a very fuel-efficient death trap. When sitting in a tiny car, all other cars seem to take on an enormous and very menacing aspect. I felt like a chihuahua surrounded by a bunch of pit bulls. Grumpy punched the gas pedal and we took off like a rocket. The car was insanely fast, or maybe just so small that, like an electron around an atom, it could kind of defy normal physics. Grumpy likes jazz, and so Charlie Parker was wailing out of the radio, a frantic soundtrack that perfectly matched the buses, SUVs, and pickups whizzing and crisscrossing around us. From the origins of ex cathedra and papal infallibility to twentieth-century totalitarianism, puppet democracies, castes and class suppression, Grumpy, or Drunky the eighth dwarf, railed at my mental lassitude, my passive acceptance, my timid consent to the ruling elite. Terrified at the sight of a large truck bearing down on us, I happily agreed with everything he said. Subtlety is wasted on a drowning man, and I felt like I was swallowing five gallons of water. Eventually I made it home. In need of release. I lie awake that night, trying to calm down. I considered my seemingly reasonable choice that came very close to getting me killed when all the other factors came into play. Elections, after all, are a thrilling and risky business.

### 2: Trump in a Glass | THE ALEMBIC

*An alembic (from Arabic  $\text{al-īnbiq}$ ; from Greek, Modern  $\text{ἀμβίξ}$  (ambix), meaning 'cup, beaker') is an alchemical still consisting of two vessels connected by a tube, used for distilling chemicals.*

Chirayu Amin Chairman Mr. Chirayu Amin is M. He has been with the company since Under his able leadership, the Company has achieved and has been able to maintain the growth in sales despite very keen competition in pharmaceutical industry. Malika Amin is Master of Arts. She has been with the company since He has worked in regulatory department at Ivax, UK. His job role at Ivax included, help management choose filing strategy for multiple countries within Europe. He has vast experience of a decade. He is a fellow member of the Institute of Chartered Accountants of India. In the professional practice he is mainly engaged in the area of providing consultancy to various corporate and non-corporate bodies in the area of strategy, taxation domestic and international and Mergers, Acquisitions, Joint Ventures, etc. He has contributed large number of papers in various seminars and conferences organized by professional organizations all throughout the country and has also contributed articles in reputed Professional Journals and Magazines. He is also active in social service and is presently heading a reputed educational institution involved in providing school education in Baroda. Buch has over 35 Years of Professional experience, including 27 years with Alembic and more than 8 years with Deloitte Haskins and Sells. He has also been a visiting faculty on the subject of Taxation at Faculty of Law, M. University and at the Institute of Cost Accountants of India. He has vast experience of around 25 years in legal practice. His main areas of expertise are Commercial and Corporate Laws. University of Baroda and has addressed various forums on Commercial Laws. Sameer Khara graduated in Mechanical Engineering from M. He is also a founder trustee at SEE Foundation which supports projects in educare and healthcare space with a focus on the girl child. He has vast experience of more than three decades in fields of Basic Research, Tech-transfer, Production and Manufacturing site administration, etc. He has worked with various well known Indian as well as Multinational Companies in pharmaceutical space.

*Alembic Glass is in the Glass & Glass Products sector. The company management includes Chirayu R Amin - Chairman / Chair Person, Surendra J Patel - Director, Malika C Amin - Director, Yera R Amin.*

Tools, Household Items Description An alembic was an apparatus, usually made of two vessels connected by a tube, which was used for the distillation of various substances, mostly liquids. Here, distillation was the chemical process by which certain constituent components were extracted from liquids through heating, condensation, and subsequent collection of the condensed liquid after it has cooled. The word alembic can be used to describe both the entire apparatus and part of the apparatus in which the condensation occurred. Alembics made of pottery and glass were used in the medieval and early modern periods to distill alcohol a process that likely developed first in Italy in c. They were used in households to make spirits or medicine, in the workshops of alchemists for a variety of experiments, and even in the process of assaying, which determined the metallurgical properties of metal or ore. The art of distillation originated in the eastern Mediterranean, though when it came to England is unknown. The earliest archaeological evidence of distilling equipment in England dates back to the late thirteenth century. The entire alembic, which is also called a still, consisted of three parts, each with its own function. First, the gourd-shaped vessel, called a cucurbit, was placed over a fire. Second, the vapors from the boiling liquid in the cucurbit condensed into the dome-shaped alembic, which also had a spout. Third, the condensation would run down from the alembic and into the second vessel, called the receiver. The alembic itself, as part of the entire apparatus, had four distinct parts: This particular earthenware alembic, dated to the late fifteenth or sixteenth century, was excavated from Fenchurch Street, and likely made by a local potter, given that access to a kiln was necessary to manufacture it. It has a rather unique thumb-print design that runs like a V-shape down to its curved spout. It is cone-, rather than dome-, shaped, which may reflect a specific distilling use. It measures mm or 7 inches in height, mm or 5. Source Adamson, Melitta Weiss. Food in Medieval Times. A Short History of the Art of Distillation: Brill, ; reprinted

However, for the rabid enthusiast, anything can go a little too far, and it was just such an incident I witnessed the other week at a fairly crowded bar, when a fellow sat down and ordered a beer. He works at a factory around the corner. I always categorize him as a wight, wight as in unlucky. He is a white wight. He is so white, and such a wight. In fact he is the whitest wight that ever whited. The factory he works at makes boxes and he counts them. Also the job itself is probably slated for extinction in the very near future. The wight drinks IPA beer. Because of the duration of transit, the high hop content would act as a kind of preservative, resulting in beer that is strong and bitter. Back to the wight. Which is fine, except that the wight is always diligently trying to stuff his favorite political firebrand into any conversation, comment, aside, riposte, and discursive speculation. He does it early and often, and, like a series of boxes barreling down a conveyor belt, it can sometimes get a bit overwhelming. Nothing says America like a good strong beer. Most people were dismissive, giving a nod and a shrug and going back to whatever conversation they were having. I stared straight ahead. I was not drinking beer. Refreshing, direct, and with enough spice to put some fire in the blood. Now people were starting to shift a bit. The wight had his hook out, but nobody was biting. Sure enough, every beer drinker within earshot recoiled from the comment. It had nothing to do with partisan politics either. I sipped my tequila and chuckled, watching as every beer drinker around the bar was staring into his or her glass with unease, as if every pint now had a tiny, orange-topped fetus floating in it, like a formaldehyde specimen in a Mason jar. The wight began to fumble through a half-assed explanation, although it was obvious he had crapped the bed on that one. True he would probably be out of a job in the near future, but not because of me. There is a weird kind of magic, sometimes, at a bar. His show of patriotism had gone wiggly, and the dam was about to break. The wight, ill-prepared for this type of mutiny, drank his Trump, paid his tab, and shuffled out the door. He would, no doubt, be drowning in offense, although he had nobody to blame but himself. It was folly for him to think that he could control the vibe in a setting as unpredictable as that one was, surrounded by a gang of tuned up renegades. Any verbal contribution can whip back around and smack the speaker in the face. I finished my Alexandria Ocasio-Cortez and headed out into the evening. More Alembics to comeâ€¦.

## 5: Alembic Â· Medieval London

*(from Arabic al-anbiq, "the still") An apparatus used for distilling. Artwork Examples: Alembic.*

## 6: Shreno Ltd. - About US

*The only thing that alembic head is missing, is a ground glass joint, but you won't find one in such a quality in that price range anywhere.*
