Share What made you write this book? The book was originally written as a collection of my lifetime of notes and tips from my 12 years of offensive security. I love to teach those passionate about hacking and this was a way to get my ideas and thought processes to a broader audience. This was made to fill in that gap. What new knowledge did you gain whilst writing the book? One thing that stuck out to me is that security is a never ending learning experience. What would you advise to beginners seeking to launch a cyber security career? Hunched over your keyboard in your dimly lit room, frustrated, possibly on one too many energy drinks, you check your phone. As you squint from the glare of the bright LCD screen, you barely make out the time to be 3: A couple of minutes later, your screen starts to violently scroll and stops at: Web server operating system: Windows web application technology: You use SQLMap to drop into a command shell, but sadly realize that you do not have administrative privileges. Then you remember that this book could help with that. Looks like it worked without triggering Anti-Virus! You read the contents of the file that the script exported and lo and behold, the local administrative password. The rest is history – you spawn a Meterpreter shell with the admin privileges, pivot through that host, and use SMBexec to pull all the user hashes from the Domain Controller.
