

1: The High Adventure of Eric Ryback: Canada to Mexico on Foot by Eric Ryback

Welcome to the High Adventure Company. As the owners of world class lodges on three continents, you can say that we know what to look for in a quality destination. For the past 30 years, The High Adventure Company has assembled the worlds finest collection of sporting lodges in the very best destinations around the globe.

The base was originally named MIWI after the initials of the four states in the region. In it was renamed Region 7 Canoe Base. Around it was renamed Northern Wisconsin National Canoe Base, as publications begin referencing the new name during this period. The primary program was wilderness canoe trips, through the lakes and rivers of northern Wisconsin and the southern edge of the Upper Peninsula of Michigan. The base provided training, outfitting, and guiding for these trips as well as sleeping and meal facilities for groups of crew members, including an adult leader, as they prepared to start or end canoe trips. They also provided transportation to and from starting and ending points. Additional programs for Scouts included whitewater trips on the lower Flambeau Flowage, swimming at the White Sand Lake beach, informal sandlot football and softball games between staff members and Scouts at the base, and winter camping in the cabins left by the CCC. Canoe trips launched from the base utilized hundreds of different lakes and rivers and about campsites. About half of these sites were on public lands; the others were on private lands under special arrangements, which typically included maintenance work by the Scouts. The base celebrated its 40th anniversary in and enjoyed its most popular years in , but usage declined rapidly and the base closed in . Numerous interrelated factors contributed to its demise, including Scout leaders and executives lobbying for closure in favor of other bases, declining usage, increased residential development in the area used for its canoe trips, and a heavy snowfall during the winter that collapsed the roof of the dining hall, which was never rebuilt. This base operated as a single unit in and . An additional base was established at Pittston Farm on Seboomook Lake in , and a third on Sysladobsis Lake, was operated in and . Matagamon and Seboomook bases were the core of the program for many years. It was a highly successful program that exposed thousands of Scouts to the lakes, rivers, and mountains of the North Maine woods, providing them with a lifetime appreciation of wild lands, no trace camping, and self-sufficiency and safety in the wilderness. Manchester, which had opened in . Land Between the Lakes ceased operation as national base in and the property reverted to Lincoln Heritage Council , which now operates the base at a local level, continuing to offer high adventure related facilities for sailing, canoeing, kayaking and U. Coast Guard approved sailing training. Sommers Alumni Association, Inc. Membership is open to all those who have served on staff at Philmont. The PSA is the only National High Adventure base alumni association that does not offer membership to those who have not served on staff. Objectives include supporting the staff, programs and interest of Florida Sea Base.

2: High Adventure () - IMDb

Nobody offers more exhilarating or a wider variety of high adventure for young people than the Boy Scouts of America. Through high adventure experiences, The Boy Scouts of America leaves lasting memories with youth and fosters development in character and leadership.

The other networks certainly made the attempt to get a foot hold in the genre, but it would have been difficult for anyone to compete with The Whistler, Suspense, and Escape. There were audition episodes for Escape at the end of February and the middle of March, , but the program did not begin regular broadcast until July. In that line of thinking, High Adventure could be thought of as a distant cousin. Mutual started the show in the Saturday evening, 9: They landed Old Spice Aftershave as a sponsor. The High Adventure scripts were based on original stories, in contrast to the many adaptations found on Escape. The shows used little subtlety in reaching towards a masculine audience. The stories were written in a realistic, remarkably believable style. The episodes feature the music of the High Adventure orchestra, but the music takes a backseat to the language of the characters and the sound effects in establishing an extraordinarily realistic atmosphere. The realism is the most striking element of High Adventure. A major league baseball catcher and pitcher in one episode play for a fictional team, but the pennant race and locker room interaction are highly believable. In another episode, the hiss of air-compressors and the clanging of brass dive helmets in a deep-sea diving episode take the listener to the deck of the boat in the sunny Caribbean. Listeners hear a cross-country semi-truck going through its upshifts. NBC dropped High Adventure at the end of the season. Mutual retooled the show in January, The new version of the program featured George Sanders as narrator. This collection contains both the US and South African broadcasts. This series synopsis is courtesy of Jon at www.OTRR.com. September 16, Certification Version: Version 1 Number of CDs: Group Old Time Radio Researchers. It contains the most complete and accurate version of this series in the best sound possible at the time of creation. An updated version will be issued if more episodes or better sounding ones become available. Relax, listen, and enjoy! OTRR Certified Accurate -- A series that is Certified Accurate indicates that all the episodes are properly identified and labeled but that the series does not contain all known extant episodes. This certification level implies that all the files in the series are Certified Accurate but also indicates that the series is as complete as possible -- it includes all extant episodes. There are no passwords for any of our ZIP files. If you are prompted for a password, before downloading the file again, try unzipping the file into a shorter full folder path name -- for example, unzip to "C: Sorry, some of our releases contain long folder and file names, which sometimes manifests itself on the Windows platform as prompting for a password for the ZIP file. Or try renaming the ZIP file itself to a shorter name before unzipping.

3: Owners and managers of the world's premier sporting destinations.

Ten Lakes & High Adventure Thanks to Lisa and Tony for 2 wonderful tours Thoroughly enjoyed the 10 Lake tour led by Lisa with great commentary and insight. Next day on the High Adventure tour led by Tony was also enjoyable.

About Us The High Adventure Company wants you to enjoy your passion, while we take care of the details. For more than 25 years we have built and developed lodges on three continents. We currently own and manage some of the finest sporting properties in the world. Few companies in the world have this much control over your experience. The following are a few examples of the respect the media has for the High Adventure Company. These companies trust us with their internal and external clients for traveling the world to our outdoor venues and so should you. Another reason to use The High Adventure Company for your sporting travel needs are the awards our own industry has bestowed on us. No other company in the outdoor industry has won this award twice. He has been heavily involved with the development, marketing, and operations of a collection of high end lodges on three continents. A Certified Wildlife Biologist and award-winning outfitter, John was chosen as the lead guide to help legendary clothing manufacturer, Eddie Bauer, design and test their Sport Shop clothing line. This line of outdoor clothing has won more awards than any of its kind. His experience was gained in the field guiding clients all over the world, having been on over 30 African safaris and at least that many trips to various destinations throughout South America. He takes pride in providing all his clients the best experience possible and always goes the extra-mile to ensure that quality. John is a sportsman and a conservation advocate, and his company is entrusted with some of the most unique environments in the world including the mouth of the Mississippi River, an entire Hawaiian island, and one of the premier river systems in Patagonia, Argentina. Sean Finley Sean has a unique and extensive background in the outdoor luxury travel and hospitality management fields, merging his passion as an outdoorsman and his experience in the hospitality industry. Sean has worked as a field biologist for the fisheries and wildlife agencies of both Tennessee and Alabama, and has traveled extensively in the pursuit of his outdoor passions. She enjoys spending time on the lake with her family in the summer. Drew Burrell Director of Operations, Drew has a profound love of travel that is only rivaled by his passion for the outdoors. He is a well-versed traveler, having backpacked through Europe and guided ski trips in the mountains of Colorado. Drew spent this past season guiding at our South Dakota and Nebraska operations and is just returning from an extensive travel throughout Africa and South America. Drew oversees operations and outreach at our Port Eads Marina. Since Jason has been guiding fishermen and women to some of the largest redfish in the world. He is sponsored by all the big names in the fishing world and his knowledge of the Mississippi Delta and the marshes surrounding Port Eads is unrivaled. Combining these talents with a passion for the outdoors, Seth is a true leader in his field, and serves as the executive producer of our popular, five-time Emmy nominated Brush Country Monsters TV series.

While we do not expect students will be able to solve the problems posed in the curriculum, our goal is to have students experience doing science the way scientists do. It is the approach that matters— one based on thinking critically about evidence, making predictions, formulating explanations, drawing conclusions, and qualifying the level of certainty of those conclusions. What types of uncertainty do students exhibit while working with complicated computational models and scientific data sets? The High-Adventure Science Climate module has five activities. Explore temperature data from ice cores, sediments, and satellites and greenhouse gas data from atmospheric measurements, run experiments with computational models, and hear from a climate scientist working to answer the same question. You will not be able to answer the question at the end of the module, but you will be able to explain how scientists can be certain that Earth is warming while not being entirely certain about how much Earth will warm. The High-Adventure Science Water module has five activities. In this module you will consider the question: In this guided activity, you will explore the distribution and uses of fresh water on Earth. Explore models of porosity and permeability, run experiments with computational models, and hear from a hydrologist working on the same question. Can there be life outside of Earth? Students use planet-hunting models to discover how scientists find new planets and perform simulated spectroscopic measurements to determine if the chemical requirements for life are present. This project will develop additional modules for middle and high school students in Earth and Space Science classes. The goal of HAS: The Concord Consortium CC, in partnership with the University of California Santa Cruz UCSC and the National Geographic Society, is developing these modules, conducting the research and will be broadly disseminating these materials via far-reaching education networks. Guided by comprehensive argumentation theories and drawing on advanced automated scoring technologies with proven validity, we will apply automated scoring tools to facilitate immediate feedback to formative, constructed-response assessment items. The feedback will provide both individual student and class-level information to help improve learning and teaching of argumentation for high school students and teachers. How should feedback be designed and delivered to help students improve scientific argumentation? How do students perceive their overall experience with the automated scores and immediate feedback? Explore the question, will the air be clean enough to breathe? Explore the question, what are our energy choices? In this module, you will explore the advantages and disadvantages of different energy sources for generating electricity. A particular focus is given to natural gas extracted from shale formations through the hydraulic fracturing process. At the end of the module, you will be able to compare the relative costs and benefits abundance, ecological impacts, etc. The availability of these resources affects how much food we can produce. In this module, you will explore the resources that make up our agricultural system in order to answer the question: Food production is faced with an ever-growing number of challenges. Growing enough food depends on the availability of resources such as arable land, sunlight, rain, and organic matter. Throughout this activity, you will explore land uses and soil quality through graphs of land use and crop production. You will run experiments with computational models to compare the effect of different management strategies on the land. These item sets consist of four separated questions that require students to: The pilot-test teachers were asked to give a pre-test and nature of science survey at the beginning of the year, test one or two of the investigations, including separate pre- and post-tests for each of the investigations. In the second part of the explanation certainty item set, students explain their claims. A generic rubric is shown below.

5: High Adventure Bases of the Boy Scouts of America - Wikipedia

The High Adventure has 7 ratings and 0 reviews: Published October 28th by Diploma Press Ltd., pages, Hardcover.

6: High Adventure (Escalante) - All You Need to Know BEFORE You Go (with Photos) - TripAdvisor

High Adventure is the fourth solo album by soft rock singer, Kenny Loggins. Released in September , it is perhaps best known for its top 40 pop singles "Heart to Heart", "Heartlight" and "Don't Fight It", which was co-written by Journey frontman Steve Perry, who also performs on the track.
