The Language of Love (Love Stories) Paperback - March 1, by Alexis Page (Author) out of 5 stars 3 customer reviews.

Humans are dependent on parental help for a large portion of their lifespans compared to other mammals. Love has therefore been seen as a mechanism to promote parental support of children for this extended time period. Furthermore, researchers as early as Charles Darwin himself identified unique features of human love compared to other mammals and credit love as a major factor for creating social support systems that enabled the development and expansion of the human species. This would favor monogamous relationships over polygamy. Certainly love is influenced by hormones such as oxytocin, neurotrophins such as NGF, and pheromones, and how people think and behave in love is influenced by their conceptions of love. The conventional view in biology is that there are two major drives in love: Attachment between adults is presumed to work on the same principles that lead an infant to become attached to its mother. The traditional psychological view sees love as being a combination of companionate love and passionate love. Passionate love is intense longing, and is often accompanied by physiological arousal shortness of breath, rapid heart rate; companionate love is affection and a feeling of intimacy not accompanied by physiological arousal. Cultural views See also: Greek words for love Roman copy of a Greek sculpture by Lysippus depicting Eros, the Greek personification of romantic love Greek distinguishes several different senses in which the word "love" is used. Ancient Greeks identified four forms of love: At the same time, the Ancient Greek text of the Bible has examples of the verb agapo having the same meaning as phileo. The word agapo is the verb I love. It generally refers to a "pure," ideal type of love, rather than the physical attraction suggested by eros. However, there are some examples of agape used to mean the same as eros. It has also been translated as "love of the soul. The Greek word erota means in love. Plato refined his own definition. Although eros is initially felt for a person, with contemplation it becomes an appreciation of the beauty within that person, or even becomes appreciation of beauty itself. Eros helps the soul recall knowledge of beauty and contributes to an understanding of spiritual truth. Lovers and philosophers are all inspired to seek truth by eros. Some translations list it as "love of the body". Philia is motivated by practical reasons; one or both of the parties benefit from the relationship. It can also mean "love of the mind. It was an almost ritualized friendship formed between a host and his guest, who could previously have been strangers. The host fed and provided quarters for the guest, who was expected to repay only with gratitude. Ancient Roman Latin The Latin language has several different verbs corresponding to the English word "love. The Romans used it both in an affectionate sense as well as in a romantic or sexual sense. From this verb come amans—a lover, amator, "professional lover," often with the accessory notion of lechery—and amica, "girlfriend" in the English sense, often being applied euphemistically to a prostitute. The corresponding noun is amor the significance of this term for the Romans is well illustrated in the fact, that the name of the City, Rome—in Latin: Roma—can be viewed as an anagram for amor, which was used as the secret name of the City in wide circles in ancient times, [36] which is also used in the plural form to indicate love affairs or sexual adventures. This same root also produces amicus—"friend"—and amicitia, "friendship" often based to mutual advantage, and corresponding sometimes more closely to "indebtedness" or "influence". Cicero wrote a treatise called On Friendship de Amicitia, which discusses the notion at some length. Ovid wrote a guide to dating called Ars Amatoria The Art of Love, which addresses, in depth, everything from extramarital affairs to overprotective parents. Diligere often has the notion "to be affectionate for," "to esteem," and rarely if ever is used for romantic love. This word would be appropriate to describe the friendship of two men. The corresponding noun diligentia, however, has the meaning of "diligence" or "carefulness," and has little semantic overlap with the verb. Observare is a synonym for diligere; despite the cognate with English, this verb and its corresponding noun, observantia, often denote "esteem" or "affection. As it arises from a conflation with a Greek word, there is no corresponding verb. Two philosophical underpinnings of love exist in the Chinese tradition, one from Confucianism which emphasized actions and duty while the other came from Mohism which championed a universal love. In Confucianism, one displays benevolent love by performing actions such as filial piety from

children, kindness from parent, loyalty to the king and so forth. In this, he argued directly against Confucians who believed that it was natural and correct for people to care about different people in different degrees. Mozi, by contrast, believed people in principle should care for all people equally. Mohism stressed that rather than adopting different attitudes towards different people, love should be unconditional and offered to everyone without regard to reciprocation, not just to friends, family and other Confucian relations. In Buddhism, Ai was seen as capable of being either selfish or selfless, the latter being a key element towards enlightenment. Instead of frequently saying "I love you" as in some Western societies, the Chinese are more likely to express feelings of affection in a more casual way. Japanese The Japanese language uses three words to convey the English equivalent of "love". Because "love" covers a wide range of emotions and behavioral phenomena, there are nuances distinguishing the three terms. Following the Meiji Restoration , the term became associated with "love" in order to translate Western literature. For example, Book 10 of Rig Veda describes the creation of the universe from nothing by the great heat. There in hymn , it states: When the calamity of time afflicts one limb The other limbs cannot remain at rest. If you have no sympathy for the troubles of others You are not worthy to be called by the name of "man".

According to Chapman, if you want to show love to someone you should show love in the same language that person shows love. Chapman says individuals show love in one of five ways: Words of Affirmation Saying "I love you," giving compliments and making positive statements about your loved one is one way of showing love. When speaking this love language be specific in your compliments and words of praise. You really know how to drive in the city. To use this language it is necessary to "speak her dialect," which requires knowing her well enough to know what she likes, says Chapman. For instance, if she appreciates a clean car you could surprise her by washing her car. Quality Time If your partner complains that you never spend time with him, his love language is quality time. More than just spending minutes, hours or days in proximity to each other, quality time means focusing on him and your relationship. One of the main dialects of quality time, says Chapman, is quality conversation. Practice active listening by giving him your undivided attention, not interrupting, making eye contact and asking questions for clarity. Take an interest in what interests him and he will feel your love. Giving Gifts Chapman studied various cultural practices in his anthropological work and he found one common factor related to marriage: A visual symbol of affection, gift giving is fundamental to love. For the person whose love language is gift giving it is truly the thought that counts. Pay attention to the value your partner places on gifts and symbols to learn if his primary love language is gift giving. Physical Touch Physical touch is a powerful communicator, Chapman explains. A relationship with an individual whose primary love language is physical touch is in trouble without tender touches. Not to be confused with sexual intimacy, physical touch includes kissing, embracing, holding hands, a pat on the knee or other gentle touch. Learn Your Own Love Language Understanding your own love language helps you understand the love languages of others. To begin, reflect on your own ways of expressing love. Observe him and ask questions.
