The mysterious path they took to get there and who cared for the travel trunk and diaries is unknown. The discovery of the two large hardbound manuscripts of diaries was made while cleaning out the old travel trunk. Glued to several pages within the diaries are pictures and silk ribbons of various officers of the Union Army as well as other memorabilia. A bookmark was tucked between the pages, which would prove crucial to confirming the identity of the author many years later. The Civil War diaries remained in storage for the next 25 years in silence and obscurity until the next owner acquired the diaries in As previously mentioned, the identity of the author was at the time unknown. In the Civil War diaries were brought to the University of South Florida to authenticate and help find the mysterious author. The evidence authenticating the diaries was overwhelming. First, the two large hardbound manuscripts are different. This difference suggests an unplanned continuation of the diaries. Second, the writing is in cursive form, and the author uses a quill pen, which is commonly used in writing from this era. After his release by means of a prisoner exchange and eventual return to his unit, he enters the notes into his manuscript. This is according to his own entries, which proves the continuation of the diaries. And finally, as previously mentioned, glued within the pages are pictures and silk ribbons from the Civil War era. But still, the name of the author could not be identified. All that was known of the author was from clues written in the Civil War diaries themselves. He served in the 9th Massachusetts Volunteers, lived in the Boston area and was of Irish decent. But little else could be gleaned from the diaries to discover his name. In one attempt, a clairvoyant was summoned with disappointing results. So after many years, it looked like his name might never be found. Then, eight years after a article in the Civil War Times Illustrated featured the diaries, someone was able to identify the author by researching records of the hospital mentioned in the article. This also happened to be the name printed on the bookmark previously mentioned, found between the pages of one of the manuscripts, but, which had deceptively looked like advertisement for a print shop. Since then, Timothy J. There is no known photograph of Mr. All of these facts combined prove that these American Civil War diaries are truly authentic and a one-of-a-kind American Civil War experience!
