

1: [www.enganchecubano.com](http://www.enganchecubano.com): Customer reviews: The Nature of Jade

*The Nature of Jade is a compelling story of a girl, a boy, and elephants (Yep, not your average teen romance novel). Jade Deluna has been diagnosed with Panic Disorder. Jade is a shy and cautious girl, and her disorder has made her even more so.*

I felt a real sense of mourning when it finally finished. Not because it was a sad book, but because I hated to end such a satisfying and well-written one. I would follow these characters forever. Jade is a sixteen-year-old Wendy I wanted to like this book. And there were some things about it that I really did enjoy. But there were more things that bothered me. Some things specifically about the book, and other, more general issues that I will get to. The main character, Jade, is well-written. Misty This is by far one of the best books I have read. I would venture to say that it is now my favorite book. I read another review wh Sherrybaby Jade has panic disorder. She fears everything, but eleaphants calm her. She lives near a local zoo and visits the elephants. She also, has a live webcam on them, so she can watch the elephants from the privacy of home. Hes a boy in red. LiteraryJenny What first made me interested in this novel is the fact that the main character Jade has anxiety and a panic disorder. Racquel This is one of my absolute favorite books. Jade is very real and 3D. Nomes I enjoyed my second Deb Caletti book much more than the previous one I read of hers Honey, Baby, Sweetheart but I still have conflicted feelings Caletti writes beautiful prose, with sentiments about the finer details of life that make you pause and contemplate. ### 2: The Nature of Jade Quotes by Deb Caletti

*However, The Nature of Jade is still a very nice read. The boy is a little different than most teen books, which adds interest. Personally, I loved where the book is set, Woodland Park Zoo.*

And there were some things about it that I really did enjoy. But there were more things that bothered me. Some things specifically about the book, and other, more general issues that I will get to. The main character, Jade, is well-written. Or when she I wanted to like this book. Or when she sees how all her high school friends are stuck together mostly out of habit and are beginning to move their separate ways. Jade is not without her issues I think the moral of the novel is that everyone has issues and quirks; she has an anxiety disorder, an obsession with elephants, and little rituals she does to reassure herself. These things all made me see her as a real, likable person. I also enjoyed the animal information that led off each chapter. Yes, it was calculated, chosen specifically to compare animal and human behavior, but it was a device that worked for me. This book is really slow-moving. I understand introducing characters and ideas, but this just dragged. The love interest, this boy Sebastian, was just so bland. His character is defined by all external things. He has a red jacket, a son, a grandmother he calls by her first name, and a not great, but not terribly surprising secret he lies about. He himself is not interesting. So when Jade falls in love with him, and tells us so, I think, huh? For example, there are a lot of minor characters, and while some are sketched out pretty well, some could be played by a cardboard cutout, like the guy at the video store who always wears a pineapple shirt and always recommends the same surfing movie. Ok at the first mention, but do we need to be told this same thing several times? Does he really only own one shirt? There are also times when we are told things like: I know this sounds cliché, but OR he seems like the stereotypical dad, but This is just bad writing. Sympathetic main character, check. Cute guy for love interest, check. Issues to deal with: Maybe you have to structure it all out to make a book work, but I hate when I am not involved enough to ignore the seams. The other issues I have with the book which are not just about the book: It makes me sad that young adult books seem to be so issue-driven. I understand that young people have a lot to deal with today. But it still made me sad. Especially seeing the parents in this book and their failing relationship. A family where whatever the other issues are, there is a solid foundation? I also like sci-fi for an escape. I prefer classics to newer novels where I am bombarded with swearing and explicit sex. The phrase "could care less" is used in this book. Sorry, this is one of my pet peeves. But think about it, people. If you are saying you could care less about something, is that really expressing the feeling you want it to? Try it that way.

*Jade's boyfriend is in hiding with his son, fearing that the boy's mother will reclaim custody.*

Girl with Anxiety, Trauma of the Week "no. I hate stuff like that. Everyone, everyone has their issue. But the one thing my illness did make me realize is how necessary it is to ignore the dangers of living in order to live. And how much trouble you can get into if you cant. Jade DeLuna is too young to die. She knows this, and yet she cant quite believe it, especially when the terrifying thoughts, loss of breath, and dizzy feelings come. Since being diagnosed with Panic Disorder, shes trying her best to stay calm, and visiting the elephants at the nearby zoo seems to help. Thats why Jade keeps the live zoo webcam on in her room, and thats where she first sees the boy in the red jacket. A boy who stops to watch the elephants. A boy carrying a baby. His name is Sebastian, and he is raising his son alone. Jade is drawn into Sebastians cozy life with his son and his activist grandmother on their Seattle houseboat, and before she knows it, shes in love. With this boy who has lived through harder times than anyone she knows. This boy with a past. Jade knows the situation is beyond complicated, but she hasnt felt this safe in a long time. She owes it all to Sebastian, her boy with the great heart. Her boy who is hiding a terrible secret. A secret that will force Jade to decide between what is right, and what feels right. Master storyteller Deb Caletti has once again created characters so real, you will be breathless with anticipation as their riveting story unfolds. She steals her best lines from her mother, her kids, Panic Disorder, shes trying her best to stay calm, and visiting the elephants at the nearby zoo seems to help.

### 4: The Nature Of Jade

*Jade DeLuna is too young to die. She knows this, and yet she can't quite believe it, especially when terrifying thoughts, loss of breath, and dizzy feelings come. Since being diagnosed with Panic Disorder she's trying her best to stay calm, and visiting the elephants at the nearby zoo seems to help.*

The Nature of Jade: Some characters do not fully come alive, such as the brokenhearted elephant keeper Damian, who mourns the pachyderm he left behind in India. It calms her to watch the elephants on the zoo cam, where one day she sees the boy in the red coat with the baby in his backpack and she is hooked. This story of a young woman growing up, falling in love with a boy, a baby, the elephants, and learning to renegotiate all the important relationships in her life is told with such heart and in such resonant language that the reader wants to meet and know these characters in real life. Jade struggles with some of the same troubling issues faced by other young adults, including peer pressure, parental demands, and her own fear and uncertainty about making the right decisions. Everything about this book is well done—character development, setting, pacing of the story, writing style—Caletti is a master of the art. Author of a National Book Award finalist *Honey, Baby, Sweetheart*, Deb Caletti unites the unique and the commonplace in her latest coming-of-age novel. *Jade DeLuna* struggles to navigate the changing landscape of her relationships with her family and friends during her senior year of high school, while also dealing with panic disorder. This debilitating condition causes her to fear anything new and question her own instincts about what is good for her, and what is dangerous. To calm herself, she visits the zoo and becomes so fascinated by the elephants—and so disgusted with the smallness of her own life—she becomes a volunteer at the elephant house. With intelligent yet emotion-drenched prose, Caletti expertly weaves a story of humor and pathos featuring a cast of unforgettable, multi-faceted human and animal characters. Along the way, she offers gentle lessons in compassion, growth, and change, and the power of love in its many forms. *Romantic Times Book Club Magazine Top Pick* Once again, Caletti proves to be one of the best writers in her genre with a book full of heart, depth, great twists, and fully realized, soulful and flawed characters. Her top-notch writing rivals that of YA master Sarah Dessen. Once she takes control of this, other things fall into place, like meeting the boy in the red jacket. Meanwhile, trouble with her mother—who embarrassingly clings to the high school rituals Jade shuns—climaxes with the ultimate embarrassment for them both. Part of the nature of Jade is that she suffers from debilitating panic attacks, helped by medication, but baffling and confusing. One of her coping mechanisms is to focus on the web cam coverage of the elephant house at the local zoo, keeping watch over the marvelous creatures. Eventually she volunteers at the zoo and bonds with the elephant keeper, Damian Rama. As Jade monitors the web cam from her own room and also spends time with the elephants at the zoo, she notices that a young man with a small child frequently comes to observe the elephants. Eventually Jade meets Sebastian and his little son and their friendship turns into a love affair. But, Sebastian is hiding a secret that will change their plans for the future, and the secret raises ethical considerations that are difficult to resolve. To meet these challenges, Jade needs to overcome her own fears and allow herself to take some risks. In telling about Jade and Sebastian, Caletti pushes her readers to consider these same moral choices, and perhaps to realize that sometimes there are no correct answers in life. I know her thoughts, her needs. Jade is stronger, and when spring comes in a new year, she can finally conquer her own fear of change. VOYA Panic attacks are what Jade DeLuna knows best, although medication and an understanding therapist have recently helped her to cope more successfully. Because she has always found elephants relaxing, she spends her more anxious moments gazing at the elephants at the local zoo on their Web cam. She observes a young man, noting that he visits often, sometimes with a toddler in a backpack and often late at night, without him. Jade feels that she needs to meet him, so she decides to volunteer at the zoo in the elephant enclosure. She is an immediate success with both the elephant trainer and the elephants because of her gentle nature, and she meets Sebastian and Bo, the boy and the toddler. But as Jade discovers, sometimes love takes a person in directions one might never have anticipated. Caletti masterfully creates her character and setting with highly crafted, straight-to-the-heart prose. Jade, unsure of herself and her feelings except when she is interacting with the elephants, is

someone whom teen readers will recognize. Caletti is not for every reader, but the right readers will feel every word in this book. BCCB The jade of the title is a high school senior, struggling with anxiety disorder and with irritation at her static life. Booksense This book wraps intimate storytelling, wit, and wisdom around tumultuous, dynamic characters. When I closed the book, I wanted more stories of elephants and houseboats and grandmothers who rock, of human hearts, breathless moments, and taking risks. One of the things that helps to calm her is to watch the elephants on the webcam of her local zoo. He looks around her ageâ€”17â€”so could that really be his kid? But she wonders why he sometimes comes there at night after the zoo is closed, by himself. What worries him so? When she starts volunteering at the zoo, she thinks it will be good for her college applications, and she might even run into Sebastian sometime. It turns out to be the perfect plan, in so many ways. Still, she finds herself loving everything about him, his grandmother Tess and his little boy Bo. When Jade finds out the truth, it is even more complicated than she could have guessed. Should she tell her mother? As she makes that decision, the fabric of her own family starts to unravel. Suddenly, her decision forces Sebastian out of her reach, just like he was on the webcam. What is really right? What needs to stay the same, and what is OK even if it changes? This vivid story, with funny, smart Jade who worries about imaginary problems while real ones are much more likely, is sure to please. But when she becomes smitten with a boy she sees also watching the elephants, Jade finds herself shaken out of her complacent and often narrow life. As she cleans elephant feet and learns valuable lessons from the head keeper about love and family, Jade continues watching for the boy. Suddenly, Jade must take control of herself and make some difficult decisions. The naturalist element in the zoo scenes is an added and original bonus. All in all, a pleasure. Good student Jade is an overachiever who has developed panic disorder. One night, the camera shows her a young boy in a red jacket with a baby boy, and she is inexplicably drawn to them. Throughout the course of her senior year, Jade finds herself feeling more and more out-of-place with her friends as they discuss their future plans. When she gets a job at the zoo and befriends the elephants and their caretakers, things seem right again. Then she meets the boy in the red jacket face-to-face. As their relationship grows, secrets are revealed on both sides, and it is that relationship which ultimately gives her the strength to make some extremely difficult choices. I have never worked with elephants. I never knew a Sebastian. But there was something about Jade that mirrored something in me, and that really made me connect with the character. I think I have a new favorite Deb Caletti novel. I shared the following with Deb, and now I will share it with all of you: I enjoyed the story and the writing so much that I purposely slowed my reading speed down to take it all in. I wanted this book to last. Jade, 18, is in her senior year of high school when she is diagnosed. She knows nothing good can come out of it and she thinks not even the support of her family can help her through. Not only that, but her other family members have problems of their own. Soon Jade finds an escape from everything, and that escape is the elephants. Not only do the elephants calm her down, they make her feel important and not so tied up in her schoolwork. One day, while leaving the zoo, she finally meets the young man. The moment he speaks, Jade knows she likes him and she knows she wants to see him again. Will I ever see the mysterious young man and the toddler again? If I do, will it develop into a relationship? And is the toddler his kid? These are all questions that Jade asks herself, and if you read this book you will find the interesting answers. Caletti definitely knows how to write an engaging life story and I totally recommend this book to anyone who loves reading. I give it 5 stars!!! In addition to therapy and prescribed medication, she finds relief from her condition by taking care of elephants at a local zoo in Seattle. When she meets Sebastian, a handsome boy with a month-old son, she falls in love with him and becomes immersed in his world. Told from her perspective, the novel contains intense passages about loneliness, death, and human relationships intercut with seemingly factual information about the physical and emotional lives of elephants. Despite this, the novel takes on an interesting perspective that is not often shown in booksâ€”that teen parents can form meaningful and loving relationships with their peers. In due course, she meets the boy, Sebastian, and they fall in love. But there are problems: On the other hand, the author does a fine job of developing both principal and supporting characters even the elephants are nicely differentiated, describing their emotions deeply as well as authentically. The love story is also quite captivating. All rights reserved Copyright Deb Caletti.

### 5: The Nature of Jade Summary and Analysis (like SparkNotes) | Free Book Notes

*For Jade, prone to panic attacks that consume her, watching the elephant cam from the nearby zoo offers peace. But when she becomes smitten with a boy she sees also watching the elephants, Jade finds herself shaken out of her complacent and often narrow life.*

I have not yet read this book. She begins watching a webcam trained on nearby zoo elephants. A handsome young man in a red jacket and with a baby also catches her eye. With some prodding from her Psychologist sympathetic Jade volunteers to help with the elephants and soon meets up with the boy Sebastian. She falls in love --hard-- and only slowly begins to see Sebastian for who and what he is. Their relationship ends as it must but Jade grows as a person. She does it again with this book. Jade is sympathetic as someone slowly gaining confidence and becoming comfortable in her skin. The mother is also sympathetic as a woman desperate to hang on to her youth and her daughter. It was easy to empathize, really -- almost too easy. The elephant plot thread? While volunteering at the zoo, Jade meets lots of interesting folks and, of course, Sebastian -- as well as his young son. The whole progression of their relationship seemed odd, especially since the only thing initially pulling him to her was that, after hours, he would find himself gazing at the elephants the same way Jade would. Which she knew because she saw him on the online cam, looking moodily off at the sky. Just like Jade did. She gains confidence, poise and maturity, even as other aspects of her life begin to unravel. Without spoilers, I felt the rationale guiding his decisions to be. That his grandmother aided him felt a little fishy to me, honestly, and I had a tough time relating to what he was doing. It was working for now, maybe, but what about five years from now? His son would start asking questions. And that distracted me. Not that I found Sebastian to be a truly bad dude or anything, but what was he doing drawing Jade into this whole disaster? True love and blah-ity blah blah, perhaps, but it seemed unfair. Or, like, any chords. It was a quick and mostly satisfying story, but not one I found especially memorable. Still, for fans of young adult and those who long to see anxiety disorders represented in YA culture, *The Nature of Jade* was a decent read. He has a baby, which makes him seem unlikely as a rapist, but come on. He comes, almost every day with his baby, at around 3: And then, she just she works up the nerve to go down to the zoo and meet him, he stops coming. However, she is spotted by the elephant master after hanging around the elephant pen for half an hour two days consecutively, and thus volunteers to help the elephants bathe, wash their stalls and such. That does not scare him away, and she is invited to a first date in the bookshop where he works two days later. That you work in a nice place and know a lot about books. That you have a son; that you appreciate elephants and live in a houseboat with your grandmother that you call by her first name. She is just nineteen. He dropped out of college. She has just finished applying for universities. He had a baby. She had a locker. Stay Stay Deb Caletti [http:](http://) It still dragged on a bit, but the overall plot was simpler, and thus easier to understand. Her prose and writing is still beautifully done, and it still makes me feel as though I was reading a poem. I would recommend this book to people who enjoy reading realistic contemporary fiction, books about animals or books that ask you deep questions that you usually edge around. In my opinion, it was a good book, if a bit bland at times -- a book that most readers will no doubt enjoy.

### 6: The Nature of Jade by Deb Caletti - Review | BookPage | BookPage

*"Nature of Jade" is an amazing, captivating book. The characters and plot are unique, and the style of writing is fresh. I love the relationship captured between Jade and elephants- it is truly heartwarming.*

Even if they are small goals, like getting a good grade on your next exam, or just being able to wake up to your alarm tomorrow. You are trying to achieve something, no matter how small. Goals can change a lot too. No goal is set in stone. I started majoring in biology, I was interested in marine biology and I wanted to study abroad. I wanted to work with dolphins and other marine mammals. That was my goal. And what do you know? Just barely three weeks into the semester, I changed everything! I switched my major to psychology, with an aspiration to be a social worker. And for the first time, I really feel like this is a goal that I want to achieve! I still want to study abroad so that is another one of my goals, although I am not sure where yet. Some more of my goals would be to graduate from ISU, probably get a masters degree, get a job, I would like to travel a little bit, settle down, and have a family. That are some goals in a nutshell. I also think a bucket list is a great thing! To me, a bucket list is just a list of things that you want to achieve before you are done here. One of the most achievable things on my bucket list right now is to ride that sling shot ride. You know the one where you are in that little ball and in slings you up and you bounce up and down for a while? But I will do it eventually! I also want to go back to Disney World in Florida. It may sound childish, but I had the best time of my life in Disney World, and I was 17, pathetic? Maybe, but hey, I saw Rapunzel and now my life is complete. Whether I go in a few years, or whether I go when I can take my own family.

### 7: The Nature of Jade Book Review

*THE NATURE OF JADE by Deb Caletti is a great novel that keeps you attached and interested until the end. Ms. Caletti definitely knows how to write an engaging life story and I totally recommend this book to anyone who loves reading.*
