

*Thanks to Thompson's thoughtful observations and willingness to share his own personal experiences, THE ODYSSEY OF ENLIGHTENMENT transcends potential confusion and presents the reader with a fascinating overview of the teachings of some of the world's pre-eminent enlightenment gurus of the 21st century.*

The incentive for the Enlightenment and its concomitant paradigm shift in values was that people got sick to death of civil wars of religion. Under pressure, they became receptive. War brings a lot of change. And from an article or maybe two I was reading the other day, I see some people think the wars of the 20th century checked income inequality in the West, depleting fortunes via taxes and subsequent inflation. Then, even once change has been set in motion, poking holes in it is the first obvious thing to do. When the paradigm shifts, what was the dark side of the moon is illuminated, while the other side falls into shadow. There is not going to be a change that locks in human happiness, maybe for the reason explained by the cognitive scientists: Whatever the current situation is, once it becomes the new normal, we habituate to it. But moving to a more temperate climate soon becomes normal, as does moving to a less temperate one. These thoughts are less a review of the lecture series than a response. Voltaire, Hume, Kant, and Smith were philosophers of the Enlightenment; Rousseau pooh-pooed the alleged improvements and idealized the past. So what are we going to do with a newly literate populace, the would-be bourgeois, that is now thinking for itself thinking it is, anyway and is there for the influencing? The section on the Federalist Papers was fascinating. Any history courses I had in school seemed to bog down and never get very far. I do have the Modern Scholar lecture series on American history in my Audible queue for future learning. I did like the notion that our multiple criss-crossing interests will weave a social fabric that will sustain us, and that it is woven out of our self-interest rather than our altruism--except that these days the fabric seems in danger of ripping. At some point since the late 18th century theories about the rights of man lost their legitimacy. I heard a little something about that from studying about Hegel, but not in this lecture series. The lecture on Marx was enough to cause reverberations in me. In order to talk about ideas and events I need some semblance of how they may fit together!

*The Odyssey of Enlightenment [Berthold Madhukar Thompson] on [www.enganchecubano.com](http://www.enganchecubano.com) \*FREE\* shipping on qualifying offers. A chronicle of the authors burning quest for truth as he tirelessly questions a total of 12 spiritual teachers including Osho U G Krishnamurthi and Andrew Cohen amongst others Contemplative dialogue of an unparalleled quality and depth.*

July 27, - 6 years 3 months ago Finally, a true bonus area! The enemies in the Temple of Enlightenment are ridiculously strong. To save yourself some sanity, we recommend you take two side trips before stepping to the Temple. The second side trip is to Saman. Hop in the White Boa, then sail your way into the small inlet of water that is blocked by ice. Once the White Boa is completely in the inlet, launch the Nautilus, then dive underwater. From there you can take an underwater cave to the west, and surface up into a landlocked lake. It operates like the Great Ancient Ruins with moving platforms and so forth, but on a much grander scale. Pay close attention to your radar at all times when you follow our directions. Also note that our directions will have you get everything in here, so our path is a little longer than it needs to be. Ignore the first platform you see and continue past it to the west. This makes a platform accessible near you just to the south. Ride it down, and you can open a chest. Ride the platform back up, hit the switch twice. Yes, this resets the rotating part; the only point of the switch in the first place was getting that chest. Head back east to that first platform we told you to ignore; now is the time to take it up. Go west, then south to the dead end, and ride the platform down. Follow the path south, east, then north to get another chest. Go back the way you came, and go west rather than back north to the platform you took to get here. There is a chest immediately to the west; grab it, then go all the way east on this new path. Hit the switch, then follow your new path east. At the split, go south, and follow that path to a platform that goes down. Go north until you find another switch. Hit it, then go east onto a plateau with a chest. A chest there will net you a slot seed! Go back east to your switch, and hit it again. Head south and ride the familiar platform back up. Go west, north even at the intersection, then back east a few steps to a new switch that you need to ignore for now. Go north, skip the first two paths they both lead to dead ends and instead take the second path west. Go south and west the only way you can, ignore the first platform you see, go north at the intersection, then right that platform down. Hit it, follow the linear path south to a chest, go back north and hit the switch again. Go west, and now ride up the first platform you see the one you just skipped. The platform spits you out right next to a new switch. Ignore it and just go west, following the linear path. Your mini-map will show an exit from this area to the west. Seeing as that you have all the chests in this area, go ahead and exit west now. Ride it up, then step off to the east. Follow the path around, head down the set of stairs, and grab the chest at the landing. Now you have to do something that feels pointless. Ride your platform down, then immediately back up; the point is that you now have to step off it on the west side now. Step on it to make a switch appear. Trigger it to make the platform in the background rise. Take the step south to the main path, then continue west. The Corridor of Timelessness The path is linear until you come to a save point that you cannot initially reach. Near the save point is a red block with a switch. At the intersection, go east. Ride the platform up, ignore the switch, go north, and ride that platform up as well. See Note 2 in our Odds and Ends subsection here for more information. Return to the last platform you rode, and ride it back down. Head south to the switch, hit it, continue south, and ride the platform up. Ride your platform back down, go back north through the switch without hitting it, and go up the platform at the end of the path again. The path up here has changed because you hit the switch, so step off the platform and go south. Ignore the exit for now, and go north through the side room to get to the chest, which contains Angel Guard an accessory that blocks all status ailments. With that in hand, return to the exit, and head out to Area 4.

### 3: [www.enganchecubano.com](http://www.enganchecubano.com) | The Odyssey of Enlightenment: Rare Interviews with Enlightened Teachers

*The idea of enlightenment was a big one in the 18th century during the Age of Enlightenment, also known as the Age of Reason. Enlightenment came to be associated with the prominence of using one's faculties of reason, science, and the separation of the church's grip on the state and the minds of people.*

The Valley of Loneliness Start by going west and bear south. Head south down the stairs and open the chest there for a Magical Lock Key, which grants you access to the Super Heavy Class in the Backyard. The Corridor of Timelessness 2 Go north, then west down the little set of stairs. Continue along the path and ride the platform down. Head west, south, east through the switch save if you wish at the save point again, then north down the stairs. Keep heading north, and exit out the door there. Activate all three, then double back and re-enter the Corridor of Timelessness. The exit to the west of the platforms returns you to Area 1, the Square of Eternity. The Corridor of Timelessness 3 Take the path one more time to the save point, and save if you desire. Head north, east, up the platform, north, up the next platform, south, east, and exit out the east door. The Valley of Loneliness 3 Go southeast and take the ladder down. Head east; the platforms you activated earlier will help you get across. With the jewel in hand, go back to the ladder, climb up, and go back through the door. Hit it, then ride the adjacent platform down. Go to the save point and save, then go back north. So yeah, go west, then north around to the platform. Ride it up, then follow the linear path here. Go west and south as the path turns, then follow it the only way you can. Ride the accessible one down; this is where you ran through the purple magic bolt. Hit the nearby switch, then ride the same platform back up. Go west onto the plateau, go south path the exit, and bear west to find a treasure. Grab it, then step north and exit out the nearby door. Go west the only way you can, and bear south to find another hard-to-see ladder. Take it down, then go west to pick up another jewel, this one called the Emerald of Despair. Yeah, that sounds good. Anyway, once you have it, retrace your steps and go back through the door you to get here. Ride it up, go north and east the only way you can, north again, north at the intersection, east as the path curves, north at the intersection. After the two-second cut scene, press A at the altar itself to place both the Jasper of Loneliness and the Emerald of Despair on it. This makes a new platform appear. From the altar, go south down the stairs, then immediately go east. Hit it, and be warned: By now, you should be all right though, especially with our boss strategy on the next page. From the switch, after you hit it, go south. The new platform is in the middle of the plateau there. Only one more area to go!
