THE ROADMAP TO SCHOOLWIDE WRITING SUCCESS pdf

1: B2B Copywriting Roadmaps to Success

The Roadmap shows you the way. This research-based resource guides the administrator through all aspects of a schoolwide writing program. Included in the book and on a separate computer disk are step-by-step charts, templates, check lists, and other shortcuts to make your journey easy.

Getting there, however, takes a little bit of doing, whether you are planning for the near or distant future. How will you get from point A to point Bâ€"from where you are now to where you eventually want to be? You can think of goal setting as a kind of roadmap for success, showing you the path you need to travel to accomplish what you have set out to do. All you have to do after that is follow it. What Makes A Good Goal? A dream is more abstract, and can be as lofty or as abstract as you want it to be. Putting your dream into words might sound something like: The main reason for this is that where dreams are abstract, goals are concrete. You dream is the destination, and the goals that you set along the way are your stepping stones. For instance, look at the dream statements above. See if your own goals meet the following criteria: Specific-Specificity is key to achieving a goal. You want to be as concrete as possible when analyzing your goal. Really break it down. Action oriented goals are able to be broken down into smaller pieces, little micro-goals that you can get started on right away. It can help in these situations to make a visualization or goal board to get your creative juices flowing. You can apply this same concept to developing a visualization board for goal-setting. You can make a visualization board using a social networking site or app like Pinterest, or you can do it the old fashioned way! A visualization board is essentially a collageâ€"adhere the images to your board. It can be helpful to establish a visual hierarchy as well by placing higher priority goals or goals with approaching deadlines at the top of the board. You can have a career board, a relationship boardâ€"whatever your goal, you can develop a board around it. An excellent motivational tool to use alongside your board is visual replacement. To begin, start with asking yourself a few questions and recording the answers: What are the steps that you need to take to accomplish your goal? What resources do you have? What are my deadlines or time restraints? When do I want to complete my goal? If so, how much? What challenges will you face, and how might you overcome them? What will the outcome be? An outline is a very effective way to create and keep track of your action plan, so its helpful to make one on the computer and print it out. Inventory current financials Task: When developing an action plan, remember that the more you can break it down, the more successful you will be! Five Little Cards Embarking on a goal-setting journey can be overwhelming, which is why it is helpful to approach it in increments. This goal setting activity is designed to allow you to make the most of your most valuable resource: A pack of index cards Colored pens Process: Beginning with the highest priority, choose five cards that you know you can accomplish by the end of the week. For instance, if you were able to complete 3 out of 5 tasks, roll the remaining 2 tasks over to the next week and choose 3 more index cards. This method not only allows you to inject a little tangibility into your goal setting activities, it gives you flexibility, which is so important to the process of goal setting. It also keeps you from becoming overwhelmed, since you only have five tasks to accomplish on any given week! These are just three goal setting activities that you can use to work toward your personal ambitionsâ€"there are lots of ways to visualize and document the goal setting process and you should use what works best for you. Nothing is set in stone, and you can alter any of the activities to suit your needs. From here on out, you have the tools to reach any of your long term goals; finally developing that art portfolio to land your dream job , for instance, or creating an aesthetically pleasing and streamlined website for your business. Whatever your goals are, one thing is certain:

2: Goal Setting Activities: Your Road Map To Success

The Roadmap to Writing Success will provide you with a variety of resources to help you plan your author career with Author Grow! We'll give you a variety of free tools, as well as a list of resources and an overview of our courses to help you plan the best path forward for your author career!

This focus on testing has been paralleled by a steady rise in the expectations expressed in national content standards for both teachers and students. Both of the major college entrance examinations ACT and SAT include complex texts and evidence-based reasoning in both verbal and mathematics measures. Both of these assessments have benchmarked scores against the college and career readiness standards. Students are now required to demonstrate their understanding of claims and evidence, often as presented in complex texts, as well as cogent and well-organized reactions to the topics or issues at hand. This could be agreement, disagreement or a general balanced critique of the texts, but regardless of the focus, the expectation for students at every level is to show increasing mastery of writing that is structured around argument or explanation supported by specific evidence. Where Are We Now? As the article makes clear, teachers are indeed rising to the challenge by requiring more writing. But, in the age of texting and tweeting, there is a sizeable gap between what students typically can produceâ€"a paragraphâ€"and what is required in the much more demanding world of Core Standards writing. A Toolkit for Teaching Writing Effectively Soâ€"what might a support system for teachers of writing actually look like? Second, the measurement of current achievement levels should be external to the classroom. Teachers already have enough to do without adding the burden of creating and scoring some benchmark assessment. In addition, teachers cannot turn off their deep knowledge of each individual writer to provide the absolute neutrality comparable scoring requires. Third, the kinds of writing samples students must produce for an external benchmark assessment should mirror the kinds of writing they need to learn to master in the classroom. The benchmark will be useful only to the extent that it resembles the writing tasks teachers want students to master. Fourth, the scoring of the external benchmarks should be applicable and useful in the classroom as well. It should clearly and specifically articulate a framework for writing that marks levels of achievement in the critical elements of accomplished writing regardless of the genre that is, narrative, argumentative, explanatory. This framework should reflect the past three decades of research on developing effective writing, which suggests that there are common elements, or traits, of effective writing. These traits do not necessarily develop at the same pace in an individual writer, and different writers need more intensive practice in some areas than in others. One of the most common approaches to such a scoring rubric is the six-trait rubric, one example of which can be found in the Common Core Standards support materials. Fifth, teachers need to have an overall sense of the expected progression in learning over timeâ€"what is a realistic expectation at 3rd grade? How can a teacher plan instruction for students at different levels of writing skill development? How is a teacher to think about both immediate and long-term goals? How can all writing instruction work consistently toward common goals, across different grade levels and teachers? Further, the Learning Progression for, say, 3rd grade can be directly compared with the Learning Progression for 5th grade, and the essential differences in student expectations and achievement, trait by trait, can be examined and compared. Sixth, actual externally-scored student writing samples that illustrate every trait and score level articulated in the rubric are necessary, so that teachers can see what the words and score levels in the rubric actually mean when they are embodied in student writing. Teachers will immediately and intuitively sense the differences when they see student writing samples in a way no amount of exposure to the rubric alone can accomplish. The result is the opportunity to quickly pinpoint goals for individualized instruction when working with students to improve their writing. In addition to the six key elements, a useful support system for teaching writing might include a bank of writing prompts similar to those used for the external benchmark assessment. These prompts, which can be used in the classroom for practice, and cloned by the teacher using different texts or short prompts for variety, allow for consistent approaches to developing writing skills over time. As students become familiar with the expectations for accomplished writing and as they begin to recognize the differences among rubric scores for

different traits, they will become increasingly self-monitoring and independent—also a career and college-readiness skill. The toolkit of six essential elements also fosters teacher collaboration across grade levels. It is no longer necessary for each teacher to invent his or her own approach to teaching writing, hoping for the best and struggling to measure growth over time because there is no consistent approach from one grade to the next. Indeed, the framework provided by the essential tools lessens the burden for teachers, even as it provides concrete evidence of how students are doing and what they are learning to do better over time.

3: Writing a Recruiting Roadmap: Profiling for Hiring Success - ACA Talent

Margaret Conrad Nickell is the author of The Roadmap to Schoolwide Writing Success (avg rating, 1 rating, 0 reviews, published).

Document freshman and sophomore year academic plan of coursework A two-year academic plan provides a guide to the courses to be taken during freshman and sophomore years. Students should have a documented plan for the courses they will take in their freshman and sophomore years. It is recommended students consult their advisor at Argyros School Advising if they have any questions in regards to their academic plan. Keep the completed plan to assist in registration decisions and with Argyros School Advising counseling sessions. Although the plan may change as one adjusts programs and goals, it is important to have a current plan in place. Complete your two-year academic plan using the templates provided here. Meet with Argyros School Advising. Students should attend the MAPS workshop where an overview will be provided. Next stop for Freshman: Demonstrate success in college coursework at Chapman A successful freshman year is demonstrated by maintaining the highest GPA possible. College level coursework at the Argyros School and Chapman University can be challenging, and it is important to seek assistance with academics if needed. Grades are only one, but one very important measure. In order for students to be successful it is expected that they attend all scheduled classes, meet with their professors at office hours if needed , complete all assignments, and perform at the highest possible level on exams. If a course proves to be difficult the student should meet with their academic advisor and access academic support services. Students should track their standing in their courses at all times. If it is not given, ask your professor for feedback on course performance throughout the semester. To meet with your professors check the course syllabus for their office hours. Try to see them during these scheduled hours if possible. If you cannot, then contact your instructor to make an appointment. For assistance with writing visit The Writing Center. In addition, make an appointment to discuss academic your performance with Argyros School Advising. Document full 4-year tailored academic plan A four-year academic plan provides a guide to the courses to be taken during the entirety of the college years. It provides a clear roadmap towards the goal of graduation. Students should complete a 4 year academic plan of the courses they will take to meet the requirements of their personalized degree program, including all major s and minor s , and, if applicable, any study abroad programs. It is recommended that students consult an advisor at Argyros School Advising if they have questions regarding their academic plan. Students are expected to be conversant in the program requirements for their chosen program, major s and minor s. Students should review the catalog add link to view these requirements. Students are encouraged to participate in a Study Abroad experience where they have a unique opportunity for immersion in another culture and country. Studying overseas promotes fresh perspectives on international political, economic and social issues, interpersonal relationships and career choices. Students need to complete their four-year academic plan during their freshman or sophomore years. Make sure to review the University Catalog and review your academic plan document when registering each semester. If you have any problems with getting your classes please make an appointment with Argyros School Advising or take Academic Plans Workshop. If you are interested in studying abroad visit the Study Abroad Programs website. Next stop for Sophomore: Students will be exposed to business theory and practice, both of which will require proficiency in accounting, math, business writing and MS Excel. It is necessary to understand and utilize these skills to build upon for new concepts in upper division coursework. If it proves to be difficult the student should meet with their academic advisor and access academic support services. Try to see them during these scheduled hours if at all possible. If you cannot, then email your instructors to make an appointment. In addition, make an appointment to discuss academic performance with Argyros School Advising. Review degree requirements and establish record of academic success By junior year majors in the Argyros School should be excelling in at least one area of their studies: Excelling is indicate by high performance i. Students who can show passion and success in a particular area of study can apply this commitment towards their future endeavors. In order for students to be successful it is expected that they attend all scheduled classes, meet with their professors at office hours if

needed , complete all assignments, and pass exams. Each student should set academic goals and strive to achieve them. Try to see them during these hours. Next stop for Junior: Review graduation requirements and enhance record of academic quality Each student should review their academic and program plans to ensure they are on track to graduation. Argyros School Advisors will provide a second check for students to evaluate progress towards graduation. However, students are responsible for monitoring their own requirements for their planned degree completion date. Students should review four-year academic plans. If there are questions with completion, course selection choices or potential problems with enrolling in classes, make an appointment with Argyros School Advising to discuss.
