

1: Playground - Wikipedia

We believe in school playgrounds and we help schools design opportunities that address the needs of the whole child, the whole campus and the whole community. Case Study School Playground and PlayOn!

Commercial techniques and much more! Have Fun The most important part of our young acting class is that students have fun. We put great effort in making young actors realize how important it is to enjoy acting as well as the auditioning process. How to Slate Slating means to state your name and age. Slating is the first thing you do at every audition when you enter a room. What you have to do is look straight at the camera and carefully, as well as fluently, slate whatever the director asks. If the director asks you any other information to slate, slate that as well. Sometimes the cameraman might do a full body shot. If they do, do not move! This allows for the director to see how good your profile looks on camera. What Does The Slate Provide? Your slate provides the director with crucial information about your acting capabilities. Most of the reasons why a director goes through your slate is based on whether your physicality fit the role you are auditioning for. Your slate, your presence, and how you appear on camera is considered afterwards. Just by telling your name, age, and passion seems exceedingly simple but provides crucial information about your self-confidence and personality. Script Throughout the auditioning, your child will be asked a few questions and to do a simple script performance. Most of the time, the tryout director will have children do these performances more than once or perhaps until they get a good performance. To become a successful actor, one must like auditioning above all else. The acting class is much like an initial audition where you are taught how to listen, follow instructions, and get used to speaking in front of large crowds as well as learning the A-Z of the auditioning process. What we teach your child is to walk through the door with confidence and a smile to make a valuable first impression that just might make them the next big superstar. Throughout the admission process we identify and observe those candidates who are creative, talented, enthusiastic and can further grow through our acting school program. Though we try to accept as many talented candidates as possible, keep in mind that not everyone can get accepted in our Young Acting Classes Program. Keeping your contact details up to date can help you in raising your chances of getting accepted. This means that you can apply at any given time but remember that class seats are allocated on a first come first serve basis. To make sure your child gets accepted in our programs, you are advised to start the enrollment process several months in advance due to the seats being limited. Overview The admissions process is spread over four stages: Identify Expectations from Application Determine Talent from Entrance Tryout Determine Enthusiasm from the Entrance Tryout Inform Applicant of the Admissions Committee Decision Acting Approach Acting requires a wide range of acting skills, including clear speech and projection, emotional and physical expressiveness, listening and reading imagination. Acting demands an ability to improvise, observe and react to others. Our Young Acting classes introduce young actors to different aspects of acting including training to deliver an honest performance as well as scene study, improvisation, and character study. Our coaches encourage the actors to not only represent the ideas of the script, but also create a new reality through their performance. When one continues to operate with an open mind they will have a real sense of spontaneity rather than pre-planning a response. With improvisation the child performs a character of their own making, and with that character and the others working with you, the child creates a new and spontaneous piece. Character Study and Development We encourage our young actor to transform into a convincing character. The audience no longer sees the actor as a performer, but sees a character as a completely different being. Once this shift occurs, the actor communicates to the audience. For example, if the actor is playing a shy character, the audience may not just see a shy student, but instead see a character similar to other shy students they have known. Acting involves communicating between characters and the audience. When we see our students improve in Character Study and Development, we also see the child develop self confidence. Request a tryout at The Playground now: Keep in mind that not everyone can take part in our acting program. You can inquire about our eligibility for enrollment from the admission office to join our esteemed acting program. The Most Talented Classmates The main goal of the admission process is to recognize those students who can get the most benefit from our

classes and contribute to the young acting class approach. **Delayed Approval** We also offer an opportunity of delaying the enrollment for a maximum of one academic year to the students who have been accepted to our program. The students, showing their interest in delaying the enrollment must send a written request that should be addressed to the Admission Committee with the details about delaying the enrollment. The Admissions Committee will then decide the delay on its own merits and once you get the delaying approval, you will not need to complete any more auditions. The tuition is solely to secure a seat in class and has no relation with missing classes under normal circumstances. The payments can be made through money order, cash, personal check or credit card. Keep in mind that all returned checks and resulting bank charges are required to be paid in cash. This also means that you will no longer have the privilege to pay using a personal check. Performing Arts Music, drama, visual arts, creative writing, and dancing have been used throughout time to pass on cultures from one generation to another. Not only do music, drama, visual arts, creative writing, and dancing help children express themselves creatively; but also help in managing stress for high achieving children. **Reaching New Heights** When parents work alongside with educators to help children in a few key areas, children become able to utilize their full potential and reach greater heights than ever before. It is absolutely crucial that we allow children to use their creativity and curiosity as much as they can while guiding them ever so gently to the appropriate education and creative arts. The sooner we come to realize that children need to let their creativity flow, the sooner we can help them realize their full potential and become fine upstanding members of the society as capable adults. **FAQ** Feel free to contact us if you have any questions or queries. Below is a list of frequently asked questions concerning: All of our coaches are professionals that have had active experience in the acting industry. The one thing they all have in common is there passion for teaching young actors and actresses develop their talents. Gary Spatz, originator of the Playground LA, is somebody who strives to ensure Kids make the most of their time in front of the camera. Our industry depends on individuals like him, so I needed to express profound gratitude to you Gary for the work you do each day – it truly makes a difference. Does it help to take acting lessons from an early age? Much like with every other sport or art, practice always makes a difference for the better. Even in acting, practice can make a world of difference. All auditioning directors favor a well-trained actor over a newbie, so starting your acting training young has its own benefits. It relies on upon how you characterize success. Numerous agents and film directors agree as they keep on referring their customers and their children to our acting classes. Some of the benefits you can expect are better speaking ability, better listening skills, improved reading comprehension, improved school performance, but most of all a major increase in self-confidence. Can I earn a living as an actor? For a beginner to start earning as an actor can take up to years of patience and hard work. Success in the acting industry is highly unpredictable. Even the most talented individuals might find themselves without any acting job for quite some time. It takes a fine blend of practicing auditioning techniques, appearance, attitude, and luck to start earning in the acting industry. What are the costs of your programs? The cost and duration of each of our program is different. Please call for pricing information. Having somewhere to work out and practice without any pressure can prove to be of great benefit. Would acting classes help my shy daughter? Do I need prior experience to apply? We can only teach a portion of what you need to know to become an actor which is exactly why we are looking for students with talent, imagination, and passion for acting. If you are motivated, enthusiastic, and are committed to learn acting then you are eligible to train here. **Acting Classes At The Playground.**

2: Playground Safety

Elementary school playgrounds: where kids scramble to the slides, dangle from monkey bars, and let their imaginations soar. Recess may be a break from the classroom, but there's still a lot of learning to be done on the school playground.

Details like shatterproof plastics and strong steel platforms make a huge impact. We focus on those little details so you can focus on the magic of play. Playworld Quality Designing a School Playground Designing a school playground is a big undertaking, but one that can help you build a safe play area designed to encourage development and fun. A little thinking about your site, budget and playground use ahead of time can reap big rewards. School Playground Design Considerations Before you start actively buying school playground equipment, you need to consider a few things ahead of time: Activities and school play equipment that is safe and fun for older kids may not be appropriate for younger children. Surfacing and Shade Consider pour-in-place, loose fill, and other surfacing options. All have their advantages when it comes to safety and budget, and all can prevent injuries caused by impact and falls from playground equipment. Another consideration is shade. Shade can protect children from burns and can also keep your school playground equipment from getting too hot, which can help protect your investment. Safety Safety is a top consideration for school playgrounds, so you will want to make sure the equipment you buy meets or exceeds standards established by organizations that set standards and create regulations for commercial playground equipment. These organizations may include the U. Supervision Even the safest playground needs careful supervision to ensure safety. Make sure each piece of playground equipment can be clearly seen and is visible to someone standing outside the playground. Also, provide site furnishings such as benches so teachers and other adults can supervise children comfortably. Inclusiveness An inclusive playground is one that is accessible to children of all mobility levels. Building inclusiveness into your playground means creating enough space around playground equipment so caregivers can help children who need it. It can also mean creating quiet and cozy spaces for children who may need quiet time to decompress. When considering design, you will want to ensure children of different abilities can use the equipment. Resources for School Playground Design Building school-age playgrounds is a big task, which is why Playworld has created different resources to help you further. Our Inclusive Design Guide was developed by childhood development and playground experts and takes you in-depth into practical ways you can engage the senses, creativity and intellect of children of all abilities on your school playground. Our Playground Guide breaks down the complexities of creating a playground into 10 comprehensive steps, giving you a clear roadmap to follow. Of course, if at any point you have questions, you can also contact Playworld for assistance or design help.

3: School Playground Products

Conditional sentences consist of a main clause and a conditional clause (sometimes called an if- clause). The conditional clause usually begins with if or unless.

Everything was made of metal. Kids would go flying off of those spinning contraptions, or perch precariously 10 feet in the air on monkey bars with rock-hard earth or concrete underneath. But a recent study by the Centers for Disease Control and Prevention finds that emergency departments still see more than 20, children ages 14 and younger for playground-related traumatic brain injury each year. As the weather warms up and trips to the park become frequent, take a moment to familiarize yourself with the risks of playground equipment and injury prevention strategies. What to Look For Nearly 80 percent of playground injuries are caused by falls. Some of the top equipment associated with injuries are climbers, swings, slides and overhead ladders, according to the National Program for Playground Safety. Consumer Product Safety Commission has come up with playground hazards you should watch out for when taking your kids to the park. The area under and around play equipment where a child might fall should be a minimum of 6 feet in all directions. Beware of hardware that is capable of impaling or cutting a child bolts, hooks, rungs, etc. Children should never wear drawstring hoodies at the playground. Trip hazards, like rocks or tree stumps Lack of supervision: Spring-loaded seesaws are best for young children. Avoid adjustable seesaws with chains because children can crush their hands under the chains. A traditional seesaw should not hit the ground. Metal or wooden swing seats should be replaced with soft seats, and equipment should not be split or splintered. Sharp edges on equipment Platforms with no guardrails Equipment not recommended for public playgrounds: One example is monkey bars. The number of injuries caused by monkey bars is so significant many experts recommend they be removed from all playgrounds. If your playground is unsafe, report the problem to the owner or park district. And remember, there is no substitute for parental supervision, especially for young children.

4: School Playground Equipment | Playground Equipment for Schools

The playground successfully opened on Aug. 17, , to more than students and families of the Lausanne Collegiate School community. And although it's been open since the beginning of the school year, students are still excited to play.

Use our Planning Checklist for a step-by-step guide to make your playground dreams a reality. Start Planning School playgrounds are in a unique position to meet kids where they are, helping them become smarter, healthier and stronger through play. Schools play a critical role in helping ensure children are getting adequate outdoor physical activity through recess or outdoor classroom time where kids can play and learn on age- and developmentally appropriate playgrounds. In fact, the Centers for Disease Control and Prevention recommend that children get 60 minutes of physical activity a day. School Playgrounds Build Skills Cognitive: When kids interact with the sensory elements in the outdoors, they get the opportunity to problem-solve and think critically. School playgrounds promote health through climbing, jumping and running while providing a controlled environment for physical activity. School playgrounds offer opportunities for kids to collaborate and engage with each other to overcome challenges. Inclusive Play School playgrounds need to encourage and support the development of healthy kids, while welcoming kids of all abilities. We can help ensure that your school playground includes a wide range of activities to accommodate a variety of developmental needs. Learn more about our inclusive playground options. Getting Started School playground planning can seem overwhelming but not to worry, we created a step-by-step guide that breaks down the process to make it easy and fun. Through our school playground planning checklist we will help you: Envision and define school playground objectives Analyze characteristics of your site to maximize space and surrounding elements Meet safety regulations and guidelines to keep kids safe while they play Build your school playground on a budget and raise funding Install and maintain your school playground Visit our checklist to discover your ideal school playground and start planning. Browse playground ideas by age-range. School Playground Safety Kids are always finding new and inventive—but not necessarily safe—ways to play on or around playground equipment. We can also help you with proper installation, safety audits and maintenance inspections to ensure your school playground is as safe as possible. Additionally, we offer a playground safety program to help teach elementary school students the importance of safe play. The program, featuring the Super Safety Team, Guardians of the Playground, contains practical tools for schools to implement and enforce safe play. Learn more about school playground safety. From scratch-off games to walk-a-thons, we can help you set up a highly profitable fundraising program. School Playground Grants Many organizations allocate funds for playground projects and several federal and state programs award grants for playgrounds. Money is available, you just have to know where to look and our playground grant guide includes listings of federal and state programs as well as grants offered by corporations and organizations. We will also give you tips on how to write a grant proposal that gets noticed. Explore the many ways to fund your school playground. Work with a Landscape Structures Consultant Our global network of school playground experts is on hand to help find the right playground design that is safe, challenging and fun for all of your students and visitors.

5: The LI's project on school playgrounds | Landscape Institute

A playground, playpark, or play area is a place specifically designed to enable children to play there. It is typically outdoors. While a playground is usually designed for children, some target other age groups.

Here are six school playground projects that brought communities together and improved the lives of their students. She launched a crowdfunding effort and created the Dream Build Play Experience , a nonprofit organization that builds inclusive, accessible playgrounds around the Chicago area. How awesome is that? Toomer Elementary School, Atlanta And the amazing teacher award goes to Emily Max , a teacher at Toomer Elementary, wanted to build an inclusive playground and improve the accessibility for students with disabilities. So, what does this new playground include? It includes a soft, rubber surface where wheelchairs can roll freely. Features are at lower heights and every activity can stimulate all five senses. What a wonderful idea to place activities at varying levels! Woodstock Elementary School, VT Woodstock Elementary School replaced its old blacktop and cracked pavement with a new and innovative playground. Now children can enjoy flower and vegetable gardens and green play spaces. Once again, the project happened because a community came together with private donations and grants. This won them the Vermont Public Places Award , which is given to well-designed projects that benefit the public. The equipment was decades old and there were drainage issues, causing large puddles and ice in the winter. They even involved students in the design process. The new elementary school playground includes a school and community garden. Volunteers built inclusive play structures for students of all abilities to use and enjoy. In this case, the PTA oversaw the creation of an inclusive, natural playground that includes an amphitheater with rocks doubling as seats and a rock climbing wall. They also wanted to make sure the playground is wheelchair accessible. Donors from inside and outside Glenn Falls contributed to the project, volunteering their time and expertise. Students must help design the projects. The projects must be open to the public after school to accommodate families who do not have access to quality parks. The students of Westlake, their parents, GOCO, and the City of Lakewood came together to design a modern playground that educates and entertains. Most importantly, this new playground brought an entire community together. This has helped them to focus on other outdated playgrounds in the Jeffco school district.

6: Commercial School Playground Equipment | School Playgrounds

@LittleFreeLibrary comes to Westwood! This awesome program can be found now at the School Street Playground (43 School Street) and the Tot Lot.

Each year, more than , kids are treated in hospital ERs for playground-related injuries. You can make the playground entertaining and safe for your kids by checking equipment for potential hazards and following some simple safety guidelines. And teaching kids how to play safely is important: If an injury does occur, an adult can assist the child and administer any needed first aid right away. Kids should always have adult supervision on the playground.

Playground Design Safety

The most important factors in evaluating the safety of any playground are proper surface, design and spacing, and equipment inspection and maintenance.

Surfaces

A proper playground surface is one of the most important factors in reducing injuries and the severity of injuries that occur when kids fall from equipment. Here are some things to consider: Concrete, asphalt, and blacktop are unsafe and unacceptable. The playground surface should be free of standing water and debris that could cause kids to trip and fall, such as rocks, tree stumps, and tree roots. There should be no dangerous materials, like broken glass or twisted metal. The surfaces may be loosely filled with materials like wood chips, mulch, sand, pea gravel, or shredded rubber. Wood chips containing chromated copper arsenate CCA treatment are not recommended since the material can pose a potential health hazard. Surfacing mats made of safety-tested rubber or rubber-like materials are also safe. Rubber mats allow the best access for people in wheelchairs. Loose-fill surface materials 12 inches deep should be used for equipment up to 8 feet high. The material should not be packed down because this will reduce any cushioning effect. No surfacing materials are considered safe if the combined height of playground and the child standing on the highest platform is higher than 12 feet. The cushioned surface should extend at least 6 feet past the equipment. Additional coverage may be needed, depending on how high a slide is or how long a swing is. If there is loose-fill over a hard surface like asphalt or concrete , there should be inches of loose-fill like gravel, a layer of geotextile cloth, a layer of loose-fill surfacing material, and then impact mats under the playground equipment. Also, the greater the height of the equipment, the more likely kids may get injured if they fall from it.

Design and Spacing

Playground equipment should be designed for three different age groups: In the safest playgrounds, play areas for younger children are separated from those meant for older kids and signs clearly designate each area to prevent confusion. Smaller equipment and spaces can cause problems for bigger kids. Here are some things to check for to ensure the equipment is designed and spaced to be safe: Guardrails and protective barriers should be in place for elevated surfaces, including platforms and ramps. Play structures more than 30 inches high should be spaced at least 9 feet apart. Swings, seesaws, and other equipment with moving parts should be located in an area separate from the rest of the playground. Swings should be limited to two per bay. Tot swings with full bucket seats should have their own bay. Swings should be spaced at least 24 inches apart and 30 inches between a swing and the support frame. Net perimeters which are inches pose entrapment hazards. There should be no broken equipment. Wooden equipment should not be cracking or splintering. Metal equipment should not be rusted. The fence surrounding a public playground should be in good condition to prevent kids from running into surrounding traffic. Surface materials on the playground should be maintained regularly so that the surfacing is loosely packed and covers all appropriate areas especially the fall zones surrounding playground equipment. Check for objects like hardware, S-shaped hooks, bolts, and sharp or unfinished edges that stick out on equipment and could cut a child or cause clothing to become entangled. All hardware on equipment should be secure, with no loose or broken parts. Plastic and wood should show no signs of weakening, and there should not be any splintered or rusted surfaces. If the local playground has a sandbox, check for hazardous debris such as sharp sticks or broken glass, and be sure that the sand is free of bugs. Sandboxes should be covered overnight to prevent contamination from animals, such as cats. Help keep your playground clean and safe by picking up trash, using the equipment properly, and reporting any problems to the city, town, or county parks department, school, or other organization that is responsible for the upkeep of the playground. If a part seems broken, loose, or in need of other maintenance,

designate it as off-limits immediately and report the problem to the appropriate authorities. Kids must know how to be safe and act responsibly at the playground. Teach your kids to: Never push or roughhouse while on jungle gyms, slides, seesaws, swings, and other equipment. Leave bikes, backpacks, and bags away from the equipment and the play area so that no one trips over them. Always wear a helmet while bike riding, but take it off while on playground equipment. Check playground equipment in the summertime. Contact burns can occur within seconds. Drawstrings, purses, and necklaces could get caught on equipment and accidentally strangle a child. Safe Equipment Guidelines Because swings, slides, and climbing equipment are so different from one another, each requires a different set of safety considerations. And some kinds of equipment are not safe for playgrounds, no matter how careful kids are. Swing Safety Swings are the most frequent source of childhood injuries from moving equipment on a playground. Swings should be made of soft material such as rubber or plastic, not wood or metal. Kids should always sit in the swing, not stand or kneel. They should hold on tightly with both hands while swinging, and when finished swinging, stop the swing completely before getting off. Children should stay a safe distance from other kids on swings, being careful not to run or walk in front of or in back of moving swings. Kids should never ride with more than one child to a swing. Swings are designed to safely hold only one person. Regardless of design, both seesaws and merry-go-rounds should be approached with caution. Other safety tips to keep in mind: Seesaw seats are like swings: A child who is too light to seesaw with a partner should find a different partner – not add another child to his or her side of the seesaw. Kids should always sit facing one another, not turned around. Teach kids to hold on tightly with both hands while on a seesaw, not to touch the ground or push off with their hands, and to keep feet to the sides, out from underneath the seesaw. Slide Safety Slides are safe if kids are careful when using them. Guidelines to keep in mind: Children should take one step at a time and hold onto the handrail when climbing the ladder to the top of the slide. They should not climb up the slide itself to get to the top. Kids should always slide down feet first and sitting up, never head first on their back or stomach. Kids should always check that the bottom of the slide is clear before sliding down. Climbing Equipment Safety Climbing equipment comes in many shapes and sizes – including rock climbing walls, arches, and vertical and horizontal ladders. The highest rates of injuries on public playgrounds are associated with climbing equipment, which is dangerous if not designed or used properly. Adult supervision is especially important for younger kids. Climbing equipment can be used safely if kids are taught to use both hands and to stay well behind the person in front of them and beware of swinging feet. When they drop from the bars, kids should be able to jump down without hitting the equipment on the way down. Remind kids to have their knees bent and land on both feet. Too many kids on the equipment at one time can be dangerous. Everyone should start on the same side of the equipment and move across it in the same direction. When climbing down, kids should watch for those climbing up; they should never race across or try to reach for bars that are too far ahead. Children younger than age 5 may not have the upper-body strength necessary for climbing and should only be allowed to climb on age-appropriate equipment. Preschoolers should only climb 5 feet high and school-age kids should only climb 7 feet high. Track Ride Safety Track rides are a form of upper-body equipment where kids hold on to a handle that slides along a track once they lift their feet. These rides require significant upper-body strength and are recommended for school-age kids and above. Track rides should not be included in play areas for toddlers and preschoolers. There should be no obstacles along the track path, especially in take-off and landing areas. If two track rides are next to each other, they should be spaced 4 feet apart, minimally. The handle should be between 64 inches and 78 inches from the surfacing. Nothing should be tied or attached to any part of the track ride. Rolling parts should be enclosed to avoid crush injuries. Log Roll Safety Log rolls require kids to grasp handles, then balance on top of the log as they spin it with their feet. This helps older kids to develop balance skills and increase strength. Log rolls are recommended for school aged-kids and above. All log rolls should have handholds to assist balance. The highest point of the log roll should be 18 inches above the protective surface. Soft Contained Playgrounds There are specific recommended safety checks for soft contained playgrounds:

7: Acting Classes For Kids in Los Angeles @THE PLAYGROUND

A school playground, particularly a creatively designed one, easily falls into this category. As the Peaceful Playgrounds website says, a playground can be more than a big open space. It can have permanent games and activity stations painted or built on its surface, in addition to spaces for free-play.

Check playgrounds where your children play. Look for hazards, such as rusted or broken equipment and dangerous surfaces. Report any hazards to the school or appropriate local office. Teach children that pushing, shoving or crowding while on the playground can be dangerous. Dress appropriately for the playground. Remove necklaces, purses, scarves or clothing with drawstrings that can get caught on equipment and pose a strangulation hazard. Even helmets can be dangerous on a playground, so save those for bikes. Little kids can play differently than big kids. It is important to have a separate play area for children under 5. Separate play areas for children under 5 should be available and maintained. For babies who are learning to walk, the play area should have a smooth and easy surface to walk on. If your baby has fairly good head control and can sit up with support usually around 9 months old, give the baby bucket-shaped swings a try. Ensure Safe Surfacing Beneath and Surrounding Playground Equipment Avoid playgrounds with non-impact absorbing surfaces, such as asphalt, concrete, grass, dirt or gravel. Recommended surface materials include: Rubber mats, synthetic turf and other artificial materials are also safe surfaces and require less maintenance. Surfacing should be at least 12 inches deep and extend at least 6 feet in all directions around stationary equipment. Depending on the height of the equipment, surfacing may need to extend farther than 6 feet. For swings, make sure that the surfacing extends, in the back and front, twice the height of the suspending bar. So if the top of the swing set is 10 feet high, the surfacing should extend 20 feet. Check That Playgrounds Are Inspected and Maintained by Qualified Personnel Double check with your school and child care center to make sure they have age-appropriate, well-maintained playground equipment. If there are any hazards in a public or backyard playground, report them immediately and do not allow children to use the equipment until it is safe. Report any playground safety hazards to the organization responsible for the site e. To embed this Safety Tip in your site use the following code: Each day, ten kids go to the ER because of a TV tip-over.

8: Essay on your School Playground

Designing a school playground is a big undertaking, but one that can help you build a safe play area designed to encourage development and fun. A little thinking about your site, budget and playground use ahead of time can reap big rewards.

I play many games in the school playground. Our playground is situated across the main road. The school hostel stands on the other side of the playground. Description Our Playground is of a very large size. It is five hundred feet long and three hundred feet broad. It is oblong in shape. It is covered with beautiful green grass. The grasses are regularly pruned. So, the playground looks quite plain. Different kinds of games are played on it. There are different courts for different games. Necessary lines have been marked in the courts. We play different games in different seasons on our playground. We play football in the rainy season. In the dry season we play Volleyball and many other games. Everyday we play here after the school is over. We play from 4 P. Sometimes we play match-games of football on our playground. The best eleven of our school plays with the best eleven of another school. Many people of our area come here to see the football match. We also hold match games of Cricket and Volleyball. On such days, our playground is full of uproar. We are all merry and mirthful. He takes care of it with the help of the Captain. Conclusion Our playground is a nice one. It is important for us. Here we learn all kinds of games and sports. Here we learn disciplines and sportsmanship. So, I have both love and respect for it.

9: Peaceful Playgrounds

The Peaceful Playgrounds Program introduces children and school staff to the many choices of activities and games available on playgrounds and field areas. The Peaceful Playgrounds blueprints, playground stencils, and playground game guides make laying out your new playground a breeze.

Playground equipment for schools is an essential part of growing up. For some children, the playground equipment at school may be the only play space they get to enjoy. School outdoor playground equipment encourages fitness, especially outdoors. Outdoor play can be a hard sell today, especially when kids can use their cell phones inside or want to play video games. However, we also know the importance of fitness and exercise to overall health. Miracle Recreation playground equipment can make outdoor play thrilling and exciting, encouraging students to play outside and get active, which can help them develop a lifelong appreciation for exercise. School playground equipment offers fun. Childhood should be a time of fun and creativity, and Miracle Recreation innovative playground equipment for schools is designed to be exciting and exhilarating. Playground equipment for elementary schools from Miracle Recreation offers a fun and thrilling way for children to play. We still offer the classic slides, but we also design equipment specially to get adrenaline peaking. Our playground structures for schools are designed for safety. Our playground equipment is designed to be challenging and thrilling, but safety comes first with Miracle Recreation. Designed to be durable, our equipment can handle hundreds of kids playing daily. It can also handle any kind of weather. Each piece of equipment is carefully designed for safety and undergoes rigorous testing to ensure it meets the highest safety standards. We back this up with our limited warranty. Why Invest in Playgrounds for Schools? Budgets are often a concern for schools, so why would a school want to invest in a playground? A playground can help students in many ways: It can offer a healthy way to deal with challenges. Children can use play spaces to get active and blow off steam, which can help them resolve anger or other difficulties in a healthy way. It can encourage a rest in between academic work. No child can study without a break. Healthy activity can help encourage the brain to work at its peak, priming children for learning. It can build teamwork skills. Miracle Recreation offers many types of equipment that require children to work together, helping them learn cooperation. It can help children develop social skills. Playgrounds are a great place for children to interact and make friends, starting their social development. It can help children nurture patience. Miracle Recreation playground equipment includes challenges, so children will develop perseverance as they strive to meet each challenge. We have helped many schools support their children with great places for play, and we can help your school, too. Contact a Miracle Recreation representative for more information today!
