Overview[edit] 12 generations patrilineage of a Hindu Lingayat male from central Karnataka worth over 700 years, depicted in descending order Amateur genealogists typically pursue their own ancestry and that of their spouses. Professional genealogists may also conduct research for others, publish books on genealogical methods, teach, or produce their own databases. They may work for companies that provide software or produce materials of use to other professionals and to amateurs. Both try to understand not just where and when people lived, but also their lifestyles, biographies, and motivations. This often requires—or leads to—knowledge of antiquated laws, old political boundaries, migration trends, and historical socioeconomic or religious conditions. Genealogists sometimes specialize in a particular group, e. Bloodlines of Salem is an example of a specialized family-history group. It welcomes members who can prove descent from a participant of the Salem Witch Trials or who simply choose to support the group. Genealogists and family historians often join family history societies , where novices can learn from more experienced researchers. Such societies generally serve a specific geographical area. Their members may also index records to make them more accessible, and engage in advocacy and other efforts to preserve public records and cemeteries. Some schools engage students in such projects as a means to reinforce lessons regarding immigration and history. The terms "genealogy" and "family history" are often used synonymously, but some offer a slight difference in definition. The Society of Genealogists , while also using the terms interchangeably, describes genealogy as the "establishment of a Pedigree by extracting evidence, from valid sources, of how one generation is connected to the next" and family history as "a biographical study of a genealogically proven family and of the community and country in which they lived". For example, The Church of Jesus Christ of Latter-day Saints LDS Church has a doctrine of baptism for the dead , which necessitates that members of that faith engage in family history research. In societies such as Australia or the United States, there was by the 20th-century growing pride in the pioneers and nation-builders. Establishing descent from these was, and is, important to such groups as the Daughters of the American Revolution. Modern family history explores new sources of status, such as celebrating the resilience of families that survived generations of poverty or slavery, or the success of families in integrating across racial or national boundaries. Some family histories even emphasize links to celebrity criminals, such as the bushranger Ned Kelly in Australia. The growing interest in family history in the media coupled with easier access to online records has allowed those who are curious to do so to start investigating their ancestry. This curiosity can be particularly strong among those whose family histories were lost or unknown due to, for example, adoption or separation from family, perhaps as a result of bereavement. A Medieval genealogy traced from Adam and Eve Historically, in Western societies the focus of genealogy was on the kinship and descent of rulers and nobles, often arguing or demonstrating the legitimacy of claims to wealth and power. The term often overlapped with heraldry , in which the ancestry of royalty was reflected in their coats of arms. Modern scholars consider many claimed noble ancestries to be fabrications, such as the Anglo-Saxon Chronicle that traced the ancestry of several English kings to the god Woden. Some family trees have been maintained for considerable periods. The family tree of Confucius has been maintained for over 2,000 years and is listed in the Guinness Book of Records as the largest extant family tree. India[edit] In India, Charans are the Bards who traditionally keep the written genealogy records of various castes. Some notable places where traditional genealogy records are kept include: Hindu genealogy registers at Haridwar ; Hindu genealogy registers at Kurukshetra, Haryana ; Hindu genealogy registers at Trimbakeshwar, Maharashtra; Hindu genealogy registers at Chintpurni, Himachal Pradesh and Hindu genealogy registers at Varanasi. He corresponded with other antiquarians in New England, where antiquarianism and genealogy were well established, and became a coordinator, booster, and contributor to the growing movement. In the 1830s, he and fellow antiquarians began to produce genealogical and antiquarian tracts in earnest, slowly gaining a devoted audience among the American people. LDS members believe that this fulfilled a biblical prophecy

stating that the prophet Elijah would return to "turn the heart of the fathers to the children, and the heart of the children to their fathers. ASG publishes *The Genealogist*, a scholarly journal of genealogical research semi-annually since 1971. Fellow of the American Society of Genealogists, who bear the post-nominal acronym FASG, have written some of the most notable genealogical materials of the last half-century. Reliable conclusions are based on the quality of sources, ideally original records, the information within those sources, ideally primary or firsthand information, and the evidence that can be drawn, directly or indirectly, from that information. In many instances, genealogists must skillfully assemble indirect or circumstantial evidence to build a case for identity and kinship. All evidence and conclusions, together with the documentation that supports them, is then assembled to create a cohesive genealogy or family history. This creates a foundation for documentary research, which involves examining and evaluating historical records for evidence about ancestors and other relatives, their kinship ties, and the events that occurred in their lives. As a rule, genealogists begin with the present and work backward in time. Historical, social, and family context is essential to achieving correct identification of individuals and relationships. Source citation is also important when conducting genealogical research. Formerly handwritten, these can now be generated by genealogical software. Three DNA types are of particular interest: A genealogical DNA test allows two individuals to find the probability that they are, or are not, related within an estimated number of generations. Individual genetic test results are collected in databases to match people descended from a relatively recent common ancestor. See, for example, the Molecular Genealogy Research Project. These tests are limited to either the patrilineal or the matrilineal line. Collaboration[edit] Most genealogy software programs can export information about persons and their relationships in a standardized format called GEDCOM. In that format it can be shared with other genealogists, added to databases, or converted into family web sites. Social networking service SNS websites allow genealogists to share data and build their family trees online. Members can upload their family trees and contact other family historians to fill in gaps in their research. In addition to the SNS websites, there are other resources that encourage genealogists to connect and share information such as [http://www.familytreeforum.com](#): Volunteerism[edit] Volunteer efforts figure prominently in genealogy. On the informal side are the many popular and useful message boards such as Rootschat and mailing lists on particular surnames, regions, and other topics. These forums can be used to try to find relatives, request record lookups, obtain research advice, and much more. Many genealogists participate in loosely organized projects, both online and off. These collaborations take numerous forms. Some projects prepare name indexes for records, such as probate cases, and publish the indexes, either online or off. These indexes can be used as finding aids to locate original records. Other projects transcribe or abstract records. Offering record lookups for particular geographic areas is another common service. Volunteers do record lookups or take photos in their home areas for researchers who are unable to travel. Those looking for a structured volunteer environment can join one of thousands of genealogical societies worldwide. Most societies have a unique area of focus, such as a particular surname, ethnicity, geographic area, or descendency from participants in a given historical event.

Email When we gather our family histories and go to the temple on behalf of our ancestors, God fulfills promised blessings simultaneously on both sides of the veil. Family relationships can be some of the most rewarding yet challenging experiences we encounter. Many of us have faced a fracture of some sort within our families. Such a fracture developed between two heroes of the Restoration of the Church of Jesus Christ in these latter days. Parley and Orson Pratt were brothers, early converts, and ordained Apostles. Each faced a trial of faith but came through with an unshakable testimony. Both sacrificed and contributed greatly for the cause of truth. During the Nauvoo era, their relationship became strained, culminating in a heated, public confrontation in A deep and prolonged rift developed. Parley initially wrote to Orson to resolve the rift, but Orson did not reply. Parley gave up, feeling that correspondence was over forever, unless initiated by Orson. His heart melted, and he determined to repair the breach with his brother. Family history and temple work is not only for the dead but blesses the living as well. For Orson and Parley, it turned their hearts to each other. Family history and temple work provided the power to heal that which needed healing. As Church members, we do have a divinely appointed responsibility to seek out our ancestors and compile family histories. We can perform the ordinances vicariously in temples, and our ancestors may choose to accept the ordinances. It is breathtakingly amazing that, through family history and temple work, we can help to redeem the dead. This long list includes these blessings: As you do so, your prayers will be answered. First, though the small stream had no tributaries, it grew into a mighty river, becoming wider and deeper the farther it flowed. Something similar happens with the blessings that flow from the temple as individuals are sealed as families. Meaningful growth occurs going backward and forward through the generations as sealing ordinances weld families together. Second, the river renewed everything that it touched. The blessings of the temple likewise have a stunning capacity to heal. Temple blessings can heal hearts and lives and families. In a young man named Todd collapsed from a ruptured blood vessel in his brain. Although Todd and his family were members of the Church, their activity had been sporadic, and none had experienced the blessings of the temple. Rod and Betty first met in person in the celestial room of the St. A couple of years later, Betty invited Rod to vicariously represent her deceased son in receiving his temple ordinances. Rod gratefully did so, and the proxy work culminated in a sealing room in the St. Betty was sealed to her deceased husband, kneeling across the altar from her grandson who served as proxy. Then, with tears streaming down her cheeks, she beckoned for Rod to join them at the altar. But the story does not end there. Fifteen years after his heart transplant, Rod became engaged to be married and asked me to perform the sealing in the Provo Utah Temple. On the wedding day, I met with Rod and his marvelous bride, Kim, in a room adjacent to the sealing room, where their families and closest friends were waiting. After briefly visiting with Rod and Kim, I asked if they had any questions. My donor family is here and would love to meet you. Betty, her daughter, and her son-in-law joined us. Rod greeted Betty with a hug, thanked her for coming, and then introduced me to her. And for the next several minutes, there were hugs and tears of joy all around. After we regained our composure, we moved into the sealing room, where Rod and Kim were sealed for time and all eternity. Rod, Kim, Betty, and I can testify that heaven was very close, that there were others with us that day who had previously passed through the veil of mortality. God, in His infinite capacity, seals and heals individuals and families despite tragedy, loss, and hardship. We sometimes compare the feelings we experience in temples as having caught a glimpse of heaven. Lewis resonated with me: Similarly, we are blessed when we help others in our wards and stakes do the same. Members who do not live close to a temple also receive these blessings by participating in family history work, collecting the names of their ancestors for temple ordinances to be performed. But we must do something to actually experience the joy ourselves. Additionally, blessings will flow to you and your family like the river spoken of by Ezekiel. You will find healing for that which needs healing. Orson and Parley Pratt

experienced the healing and sealing effects of family history and temple work early in this dispensation. Betty, her family, and Rod experienced it. Through His atoning sacrifice, Jesus Christ offers these blessings to all, both the dead and the living.

4: Seals Family History: Last Name Origin & Meaning

The surname Seal was first found in Northumberland where they held a family seat from early times and their first records appeared on the early census rolls taken by the early Kings of Britain to determine the rate of taxation of their subjects.

There is no difference! This is not an easy question to answer because it depends on your point of view. It is not uncommon for words and phrases to have their meaning altered over time depending on their usage. New words and phrases are created all the time while existing words and phrases have their meanings altered. Now there are some with a different viewpoint who would not be at all happy with this assertion and would be contemptuous of any attempt to suggest that a Family Crest and a Coat of Arms are the same thing, despite the vast majority of people regarding them as the same. Our view is that people themselves you and me and everyone else decide on the actual meaning of a word or phrase and we do so by our usage. Aware as we are of the historical difference between a Crest and a Coat of Arms we have no problem regarding them as being the same thing. Because that is the meaning the vast majority of people have assigned to them and for centuries. The metamorphosis of words and phrases is not something that is confined to Heraldry. They are not literally dead. Now it is part of everyday conversation. Is there a Family Crest for every Name? No there is not. However there is nothing to prevent you from creating one for your own name and either keeping it for the use of your own family or releasing it into the public domain to be used by anyone else of the same name. There are far too many names in this world with so many spelling variations and even names being newly created that they all could have a historically accurate family crest. Even then there are countless family names, even of ancient origin, for which no heraldic design could be found. What right do I have to use a Family Crest from History? The answer to this question really depends on your attitude and your purpose. Only you can decide which of the following categories you belong to: In Ireland a Family Crest can apply to anyone of a particular surname with ancestry from Ireland. This assertion was made by no less than Edward MacLysaght, the former Chief Herald of Ireland and one of the foremost Irish genealogists of twentieth century. These historical artifacts can apply to a family rather than just an individual. Family Crests do exist!
