

## 1: Strathmore - BLICK art materials

*Excerpt from The Strathmore Quality Deckle Edge Book Papers: Strathmore Japan, Old Cloister, Strathmore, Old Stratford, Alexandra Ing papers that should be unique by reason of their quality and their adaptability to satisfy a demand that was arising in the paper market.*

Paper Is Part of the Picture no. The exhibition runs from October 3 to December 15, The Colonial Book of the Towle Mfg. Title page design by Will Bradley. Russell, , a book originally written in but with a story set in the years before and after the American Revolutionary War. The University Press, , designed for a silverware company in Newburyport, Massachusetts that was founded in Bradley quit The Wayside Department of The University Press in to focus on work in New York, but the press continued to design and print sample books for Mittineague for roughly another dozen years. The work was split with the F. This was a radical and expensive step for a paper company. Mittineague Paper Company, Design and printing by the F. Photograph by Vincent Trinacria. The latter two were designed and printed by F. Consequently in decorating the different samples the harmony of the paper and of the example selected has been considered, the appropriateness of the type or design and its color balance and in all ways the effort has been to make the book an honor to the printing art in the hope that the various illustrations shown will be suggestive and beneficial and instill a further desire to produce only such printed things that are really worth while. The samples in the book not only comprised forty different papers, but they showed how those papers looked under a variety of printing processes: The Munder-Thomsen Press, Calligraphy and design by W. For The Chap-Book Bradley designed several stunning posters in and The University Press in Cambridge, Massachusetts traced its history back to when William Hilliard used that name for work he did for Harvard College. There is little information available about F. Unfortunately, I only discovered the latter after the exhibition was installed. I assume that it was set up to print simple things such as packaging labels, stationery and business forms, test sheets and other internal items; but not lengthy, hard-cover books. Other samples are by many of the leading or soon-to-be-leading designers of the day: Bertram Grosvenor Goodhue, T. Dwiggins, and Herbert Ames.

## 2: Strathmore Premium - Quality and excellence - Made USA PaperPapers

The Definitive Dwiggin's no. The exhibition runs from October 3 to December 15, Cover design by T. Photograph by Vincent Giordano. After it became incorporated into the Mittineague Paper Co. A lush rendition graced the cover of Strathmore Quality Commercial Writing Papers while a sinuous version was used as a frame to the title page of the Rhododendron Bond sample book printed by F. Trade advertisements in sported mediocre border designs with mediocre thistles embedded in them. At the same time, the advertisements included a silhouetted thistle as part of the Strathmore Quality seal that had come into use in With the formation of the Strathmore Paper Co. The slogan was now set in classical roman capitals; the surrounding circle was double-ruled; and the thistle, which had formerly leaned to the left, was now upright and symmetrically designed. It also had more serrated leaves. There are only a few instances of Bradley using the thistle as a decorative element in the 61 sample books he designed. One of them is Carillon Covers [below] where he combined two sharply contrasting depictions of thistles. Most of the time he slapped the seal on the front coverâ€”often multiple timesâ€”as well as on the back cover. In some of the sample books he tarted up the seal on the back cover, adding various botanical and abstract decorations to it. His basic version of the Strathmore Quality seal continued in use alongside the older version well into the s. Carillon Covers sample book Strathmore Paper Co. Design by Will Bradley. In , Frederic W. His design was immediately reused by the company for the first issue of The Strathmorean, its house organ for employees. The next year, and again in see above , T. Hapgood â€” designed sample books for Blandford Deckle Edge Book Paper which made the thistle a flamboyant centerpiece of each cover. Dwiggin's â€” prominently placed a thistle on the title page of the Alexandra Japan sample book, though his cover illustration showed an exotic bird and flower. Cover design by Frederic W. Alexandra Japan sample book Strathmore Paper Co. Cover design by W. Along with these highly creative interpretations of the thistle, there were some humorous onesâ€”usually parodying the Strathmore Quality sealâ€”intended only for the eyes of Strathmore employees and their families. They appeared in The Strathmorean and in ephemeral items announcing various company events. The fact that Strathmore was able to make fun of itself indicates that the thistle seal had successfully become an entrenched mark, one that identified the company and its products throughout the paper and printing worlds. Hapgood is often overlooked, but he was one of the leading early graphic designers in the United States between and There is no adequate biography of him.
