So says Mike Michalowicz, author of The Toilet Paper Entrepreneur, a business book that is so uniquely useful, so raw and entertaining, it reads like the brainchild of Steve Jobs and Chris Rock. Clockwork Book [edit] Released on August 21, Analyze the 4D mix, 2. Identify the QBR, 3. Focus your strength on consumers who benefit the most, 7. Break the dependency on the owner. In Surge, Michalowicz, relates the process of surfing in the ocean to "surfing" waves of consumer demand. Profit First Book [edit] Originally released on July 4, In the book, the author identifies the four core methods to running a profitable business, and is derived from an article he published in The Wall Street Journal on December 10, Use Smaller Plates the concept of having multiple "small" accounts to manage money intended for different purposes , 2. Remove Temptation make your accumulating profit, tax and under funds difficult to access and view and you will be less tempted to "steal" from yourself , 4. Michalowicz indicates that the natural tendency of entrepreneurs is to do "bank balance accounting", where they view their bank balance regularly and that they make financial decisions on the balance they see. The author argues that instead of trying to change this natural tendency in entrepreneurs, that is should be leveraged. By implementing the four core methods documented in Profit First, the entrepreneur can continue this natural habit to great effect, maximizing profit, controlling expenses and mastering cash flow management. In the book, the author defines the seven significant milestones to growing a colossal pumpkin and how a colossal business is "grown" the same way. The author argues that many entrepreneurs fall into the "time for money trap" and need to change their actions from doing the work to designing how the work is done for it to grow. The entrepreneurs goal is for the business to serve them, not to have them serve the business. The book has subsequently been translated into multiple foreign languages, such as Spanish, Korean, Czech, Japanese, Polish, Simplified Chinese and Russian. The irreverent [44] book is an entertaining hard-edged read mixed with valuable business lessons from an experienced entrepreneur. Michalowicz states that hard-line traditional business planning is ineffective and often detrimental; and that successful growth of a business requires a dynamic planning method, called a 3 Sheet Strategy. Michalowicz shows examples of this, including the rise and fall of Blockbuster , Netflix and Redbox. Ultimately it was the lack of investment funds that helped his businesses grow quickly and healthily. Have you ever been in the bathroom only to realize there are a mere three sheets of toilet paper left This is how a Toilet Paper Entrepreneur runs their business The Toilet Paper Entrepreneur philosophy is based on the notion that not only can one start a business with fewer resources, [61] [62] but that having fewer resources can actually work to your benefit. And the fact that you are asking this before you have even put in your first five years with a new business, means that you probably are not cut out to be an entrepreneur.
