The background of your book should be white or a light color if you want it to be printable. Make sure hyperlinked text is still readable. You could use the link color as the background and make the text white on top of it. Or you could choose a totally different color. Other accents and elements can use darker or lighter versions of the colors above. Model your color choices on what other designers are doing. Different fonts have different feels. Go for something you feel good about. Remember to keep it readable. There are so many free fonts out there. Did you know you can download any of the fonts from Google Fonts? Steal great font combinations from others. Let them do the work for you. No need to repeat why. I normally pick one font for headings h1, h2, h3, etc. Model your font choices on what other designers are doing. Besides, even Shakespeare and Malcolm Gladwell could use some excellent callouts, images and large quotes, right? Remember what your ebook is supposed to do. Really, fundamentally, your job is to keep the reader interested and engaged. Breaking up that flow of non-stop body text is an essential part of that, making your book fun, intriguing and delightful. Admit it, you skim through stuff until you see a list. Use headings h2, h3, etc. I normally only use 3 levels of headings: On half the page or a quarter of the page or the whole page or whatever. These are some of the most read pieces of text in any book or webpage. Build in your CTAs calls to action. Use any or all of the 10 page templates I list out below throughout your book. Expand your line height. You can make those little lines of text easier to tumble through by expanding the line height. Line height is how short or tall the space is between lines of text in a paragraph. I normally set that something close to the golden ratio: Some fonts are quite tall and need more line height. Others are quite squat and need less. Move things around and see how they feel. Build in your calls to action CTAs You have business goals with this ebook. What are those actions you want them to take? What are the things you want your reader to do? Have you identified them? Can you cull them down to just a couple and really focus your book to get them into one of those next actions? These calls to action need to be designed things, they need to be thoughtfully prepared â€" what sequence they come in, what form they take, etc. Some specific ways to do this are called out in the page templates below, but these are a few more ways to add CTAs that will help make your ebook feel more interesting. Create a dedicated call to action page. More on this below. Use images or screenshots from videos to entice someone towards your youtube channel or blog post. See the example of this below Callout tweetable quotes and stats in a block like this to encourage sharing. Again, download a handful of ebooks and see how others are doing these kinds of things. End sections with a full-page quote I hesitated to put this one in. Quotes feel like statistics in some ways. They feel hard, sturdy, more like data points than opinions. I believe Winston S. Churchill said it best: And focus is a secret weapon. And, just for the sake of argument: Tell me what you know. You should be able to get an idea or two of how you can do a similar thing just by looking at each. Cover page Cover pages are hard. This is a perfect time for you to find a few covers out there you really like, pick one and model your cover after that one. Make it your own, but put it together similarly.

Foreword from the Print Edition Can you imagine four authors writing separate biographies of the same individual and those four biographies dovetailing perfectly without contradiction? That has happened only once in history. Arising from different eyewitness accounts of His life, each of their biographies has a distinct flavor and a unique story line. In spite of their uniqueness, however, it is possible to weave all four of them together completely and without contradiction - adding nothing, deleting nothing - using only the data provided by the authors. Such a compilation had never been done in more than 1, years until Johnston Jack Cheney completed it at age seventy-six, after twenty-three years of work that began on what was supposedly his deathbed. This accomplishment would have been impossible for anyone, however, if the four Gospels did not have a Divine Author. Thus, Jack Cheney was a further human instrument to do a phenomenal service in demonstrating the superintendence of God in writing the life of His Son, Jesus Christ. It is a very fine way for Christians to understand more clearly the life of Christ. Compiled and interwoven from many translations and verified by the original Greek through the idiomatic approach - the same basic [approach] adhered to by Luther, Tyndale, and Wesley - this significant volume is as trustworthy and accurate as can be. Jesus Christ The Greatest Life: Stanley Ellisen and Johnston Cheney Publisher: Johnston Cheney after twenty-three years of full-time work, during which he practically memorized the Gospels in Greek, finished the compilation of The Life of Christ in Stereo in This book incorporates both books with the addition of maps, graphics, timelines, and editorial comments. It also includes a numbering of the thirty-five major recorded miracles and pictorial representations in the form of nearly one hundred icons of the major recorded events and teachings in His life.
