I think I would give it a little more than 4 stars, maybe 4. This book had such wonderful characters. They were fleshed out and so descriptive. They were likable and relatable. I loved the relationship between Lazer and his mom. They were both so supportive and loving. The idea of the splicers was so fun and dangerous and imaginative. I enjoyed how some had mostly human looks and some looked more like animals, and how some were between only animals. I am torn between I really enjoyed this story! I am torn between liking and not liking the fact that there were a lot of different people the chapters were based on. A lot of them were based on Lazer, but some were based on his mom, or Covax, or Five, or Aleece. It was kind of hard for me personally to go from one character to another so many times. On the other hand, I think it lent a lot to the story, because with Lazer being the main character, there was a lot going on that he was not a part of that needed to be told. The only thing that brought this rating down for me was that at some points this felt like a wonderful story, and and at some points it felt like a scientific description. Those parts kind of lost me because the chapter before, I was reading about Lazer and his friends, and the next entire chapter was a very detailed scientific description of one specific thing, which could get kind of confusing. I partly think that may be what the author wanted to do, because this is kind of a dystopian world and how that happened needed to be described so the reader would understand the world better. It was an awesome first book that is obviously leading to so much more with these characters. Grab this book now! I enjoy books that reflect society in a way that makes you wonder about the future. It is like holding up a mirror and seeing the world reflected back, but it is a future world, and though it is driven by the same motivators we have today, it is also filled with fear and ambition, love and jealousy, bravery and wisdom. There are heroes in this world. And you will fall in love with them like I did. Th An incredible adventure! The message of this book so far, this is part of a series and oh boy am I hooked!! A profound theme that helps me imagine a magnificent tomorrow.

Article by Maddisen K. Krown The term "vision quest" was first coined by 19th-century anthropologists to describe the rite-of-passage ceremonies of certain Native American cultures. Traditionally, these rituals have been performed to mark significant life transitions or changes. Generally speaking, they are seen as both personal and collective events that are guided and witnessed within the community, and often involve the "quester" spending time alone in nature in search of a personal vision that becomes a vision to support the entire community. An important vision quest, for example, is one that marks the passage of adolescents into adulthood. The vision quest has evolved into a general term that refers to Native American and also to the rite-of-passage rituals found in almost every tradition, culture, and religion throughout the world. And a number of these once-private pan-cultural ceremonies and teachings have seeped out and entered into the hearts and lives of the many. The vision quest continues to be a powerful way for adolescents as well as adults to acknowledge, mourn, release, welcome, and celebrate important life transitions of any kind, such as actual or symbolic births and deaths, career changes, divorce, marriage, menopause, birthdays, successes and achievements, children leaving home, recovery from addiction, etc. A vision quest can also be a deeply cathartic way to get away from it all and recharge your batteries! On a deep level, we seem to inherently understand the vital importance of these "marking" rituals, and how without them, there may be a tendency to move into unconscious and even destructive behaviors. Especially in challenging times, these ceremonies give us the opportunity to turn changes into sacred initiations -- empowering, humbling, strengthening, and enlightening us. There are individuals and organizations around the globe that facilitate rite-of-passage programs such as the vision quest. Please note that the School of Lost Borders uses the term "vision fast" rather than "vision quest" to differentiate from and show respect for the ceremonial practices of the North American indigenous peoples.

**Preparation, Solo, Return**

The format and length of vision quests may vary among facilitators, but typically the ceremony involves several days of preparation, days and nights of fasting alone in a wilderness place, and a few days of incorporation.

**Preparation** In the preparation, you are readied to physically, psychologically, mentally, and spiritually benefit from the experience of fasting alone in the wilderness.

**Solo** The solo experience involves time alone in a natural place solitude, fasting emptiness, exposure to the elements vulnerability, and self-reliance self-trust. During solo time, the guides maintain a safe perimeter around the area and make sure you have sufficient provisions. I liken solo time to being inside a cocoon, where within the illusory sheath of dormancy, new life percolates, just waiting for its time to explode into full potential. The experience of solo time is somewhat ineffable, full of juice, profound and sublime, different for everyone, guaranteed to create memories that stay with you for a lifetime!

**Return** Upon return, you join together with the other questers and guides for the sharing of personal stories. I love story time. The guides support you by listening and reflecting the significant lessons of your story, and then challenge you to give your vision practical feet -- to live the life and changes you have rightfully claimed as your own!

Researchers are increasingly recognizing that direct and immediate contact with the natural world promotes health and development, and that a disconnection from the natural world has negative consequences for human health and development. The documented benefits of spending time in nature include stress reduction, fascination and appreciation for the environment, a sense of competence and self-esteem balanced with a sense of trust in oneself and the world, a more mature morality and care for others, and a sense of awe, wonder, and sacredness. Direct contact with nature also leads to greater commitment to positive environmental action. We live in a world marked by borders, borders between continents, people, and even between our own hearts and minds. And so, dear BR, I hope this answers your questions and sheds some light on the fears. There are many potential benefits in doing something as simple and powerful as a vision quest. I close with this quote from the beloved, late Steven Foster, who founded the School of Lost Borders along with his wife Meredith Little.

Native American Vision Quest Those of us on a spiritual path and more specifically on a Vision Quest believe that we are put on this earth for a special reason, but that reason is not always clear to us. We want to know what we need to accomplish in life for our highest benefit, and, in turn, the benefit of the world. Going into the spiritual world is very serious. The most important thing is being clear in your heart as to what you are seeking for yourself and the people of the world. Walk Sacred describes this procedure in great detail in a link below. Another time, I had two very powerful medicine people as my mentors. They just took me up on the hill and placed me. They told me to do it and I just did it. I took my peace pipe, and I simply walked up to the top of the mountain. In those days, believe it or not, when you went to Bear View Mountain, there was nobody there. But when I used to go there, I would be the only one on the whole mountain. You simply contemplate your life. And when you fall asleep, your dreams become more vivid. At night, the stars come out. They light up, almost like a neon sign. Thunder and lightning come by, and you just endure it. The Great Spirit is not going to take your life up there while you are vision questing. And if it does, who cares? The Great Spirit made you. Why should you fear it? You become more confident once you follow this natural road. You can communicate to the Great Spirit through observation. In fact, I laughed. And I saw four horses before I went up the mountain. But they were real, live horses. He was even interested in these pre-vision quest scenes, as well as my dreams. Although the point of this is to finish the quest without the convenience of camping gear people should take their medications and drink water if it is a necessity.

Jan 28, Diana rated it it was amazing Terry Davis was one of my favorite writing teachers when I was in college. Our fiction writing class got to read this book on its way to publication. I fell in love with protagonist Loudon Swain. This achingly honest, real coming-of-age story is well worth a read. Nov 26, Brandon Valet rated it really liked it Overall, I think this book was pretty good. What I liked most about this book was that it was a book about a high school wrestler. Another thing I liked about this book was how the author portrayed how Loudon was feeling through all the events he went through. For example, he had to lose 29 pounds in 2 weeks to wrestle the undefeated, reigning state champion; Shute his last name. The thing I did like about the ending, though, was the words the author put at the end. I made me feel like I was in a match again, and I was the one wrestling Shute. Lots of differences between the two. For once, I like the movie better, but the book is a good coming of age story. Apr 21, Brett Starr rated it it was amazing "Vision Quest" is one of the movies that all wrestlers covet, however I never even knew the book existed until recently. Terry Davis is a great writer and this book is written very well. Loudon Swain is an unforgettable character, both as a teenager and as a wrestler. Great writing, excellent book! I already liked the character Loudon Swain--hell I even named one of my characters after him--but I really fell in love with him through the book, which is much more nuanced than the movie. Matthew Modine was a great Loudon, because though his expressions and thoughts he was able to fill in the gaps the movie created. Still going back and really getting to know this character was definitely a treat. Behind me trails a brief tradition. Win or lose, the river flows again. Shute and I cross and shake hands. Through me flows the power to blast Grand Coulee Dam to smithereens.
