Otherwise confident moms and dads often feel tongue-tied and awkward when it comes to talking about puberty and where babies come from. When do kids start becoming curious about their bodies? From as early as infancy, kids are interested in learning about their own bodies. They notice the differences between boys and girls and are naturally curious. At this stage of development, they have no modesty. So, what should you do when your toddler begins touching himself or herself? Each family will approach this in their own way, based on their values, comfort level, and style. Others may want to acknowledge that, while they know it feels good to explore, it is a private matter and not OK to do in public. Is it OK to use nicknames for private parts? By the time a child is 3 years old, parents may choose to use the correct anatomical words. These words – penis, vagina, etc. That way, the child learns to use them in a direct manner, without embarrassment. In fact, this is what most parents do. What do you tell a very young child who asks where babies come from? There is no need to explain the act of lovemaking because very young kids will not understand the concept. However, you can say that when a man and a woman love each other, they like to be close to one another. Most kids under the age of 6 will accept this answer. Age-appropriate books on the subject are also helpful. Answer the question in a straightforward manner, and you will probably find that your child is satisfied with just a little information at a time. What should you do if you catch kids "playing doctor" showing private parts to each other? Kids 3 to 6 years old are most likely to "play doctor. Heavy-handed scolding is not the way to deal with it. Nor should parents feel this is or will lead to promiscuous behavior. Often, the presence of a parent is enough to interrupt the play. Later, sit down with your child for a talk. This way you have set limits without having made your child feel guilty. This is also an appropriate age to begin to talk about good and bad touch. Tell kids that their bodies are their own and that they have the right to privacy. However, the AAP notes, an exception to this rule is when a parent is trying to find the source of pain or discomfort in the genital area, or when a doctor or nurse is performing a physical exam. Kids should know that if anyone ever touches them in a way that feels strange or bad, they should tell that person to stop it and then tell you about it. Explain that you want to know about anything that makes your kids feel bad or uncomfortable. When should parents sit kids down for that all-important "birds and bees" talk? The "big talk" is a thing of the past. Learning about sex should not occur in one all-or-nothing session. It should be more of an unfolding process, one in which kids learn, over time, what they need to know. Parents often have trouble finding the right words, but many excellent books are available to help. At what age should girls be told about menstruation? This is an area of intense interest to girls. Information about periods might be provided in school – and instructional books can be very helpful. At what age should nudity in the home be curtailed? Families set their own standards for nudity, modesty, and privacy – and these standards do vary greatly from family to family and in different parts of the world. To what extent can parents depend on schools to teach sex education? Parents should begin the sex education process long before it starts in school. Topics addressed in sex-ed class can include anatomy, sexually transmitted diseases STDs , and pregnancy. What teachers cover and when varies greatly from school to school. Children, when learning about sexual issues in school or outside of school, are likely to have many questions. The topic certainly can be confusing. Parents should be open to continuing the dialogue and answering questions at home.

6: 50 Interesting Trick Questions and Answers That'll Make You Think Hard

To Jerry and Sherry Roberts Thank you for your faithful friendship and love for our Lord and my family. You and your family are a blessing beyond description to us and so many others.

By Kristina Randle, Ph. We are both straight, moderately attractive and successful. Early in marriage I was quite jealous of any men that would hit on my wife. I was quite insecure. The past 5 years however, I have been pushing my wife into having sex with other men. I have read about cuckolds on the net, and I am not like what I read. I am not bi-curious, and I do not want to be humiliated or enjoy that. I simply get incredibly aroused thinking about my very sexy wife having sex and being open and wild with another man, particular while I watch or perhaps participate with her. Is this a disorder or something I need therapy for? Why does this fantasy fill my head whenever I have sex with her and get me incredibly aroused? My wife has agreed that she is ready to try this with a friend of ours and she is beginning to enjoy the thought of trying it. I am actually looking forward to it. Is something wrong with me? Sexual Arousal Question A. Your desire to watch your wife have sex with another man may be considered taboo and unusual by traditional standards of sexuality. There are many married couples who engage in open relationships. These couples are free to have sex with other people. There are other relationships where a third party is brought in simply for the purpose of sex. These types of relationships may not fit the conventional model but are nonetheless functional relationships. In our culture sexuality is often not discussed. There are sexual variations of all sorts. The question that we should ask ourselves is simply this: Most therapists would find any sexual behavior that was not harmful to be acceptable in a relationship. Obviously, we must consider only behaviors that harm no one. Any behavior that would be harmful to the couple or to any other individual would never be acceptable. Your sexual fantasy of seeing your wife participating in sexual acts with another person is an arousing thought to you and recently your wife. The actual act may not be arousing or acceptable to either one of you. Fantasies often do not translate well into reality. Having said that, many pleasurable, stable parts of regular sexual behavior had their beginnings as fantasies. You and your wife may find involving a third party to be a very exciting part of your sexual relationship. However, you may find it to be not at all pleasurable and deeply regret having gone forward. Your wife may blame you for having coerced her into being unfaithful. You might be angry with your wife for having given in to you. You might lose respect for her or she for you. I have listed only a few of the negative outcomes possible. On the other hand, you both may find it to be an exciting and important addition to your sex life. You need to weigh the options carefully and to be quite sure that there will be or is likely to be no negative outcomes. If you were to proceed turning your fantasy into reality, you might break it down into smaller steps. For instance, she might simply go out for the evening with her possible suitor and have dinner or a drink. When she comes home, from what amounts to a fairly harmless encounter, you could both discuss your feelings and reactions. The next step could involve nothing more than a kiss. Again, you would then discuss how it has impacted the both of you. By keeping each step small, you could minimize any damage that would come from a negative encounter. What you are suggesting is not common nor is it extremely uncommon. As I said earlier, there are many successful relationships that involve sexual variation. You could talk to a sex therapist and receive his or her feedback. I would suggest that you be careful, cautious and quite sure that both of you want this to happen before you allow it to happen. I hope that I have been of assistance and if you have any other questions please do not hesitate to write again. She works in private practice with adults, adolescents and families. Kristina has worked in a large array of settings including community mental health, college counseling and university research centers. Retrieved on November 15, , from <https://>
