Other differences include a different ordering of the episodes to make the chronological listening experience more accurate, and a removal of references to cassettes at the end of multi-part episodes. The changes are most noticeable in albums , while episodes from albums after 7 feature comparatively fewer changes. Also the albums have been renamed by suggestions from listeners as well other means. The newest album title, "The Lost Episodes" is not exactly true, considering every included episode has previously been available for purchase individually, just not always in a collection.
