

2: Gujarati Calendar | Vikram Samvat -

Gujarati Calendar is identified as Gujarati Vikram Samvat Calendar - in Gujarat. Use this calendar to identify janmashtami, satam, aatham, atham, samvatsari, diwali, besatu varsh festivals.

Christian year We have created a calender with Gujarati flavor In our endeavor to cater the best that Gujaratis across the world need, we are launching Gujarati Calendar consequently for second year. This year we have created a Gujarati calendar in bigger size X So that you can make a wall-paper out of it for your pc. Some Gujaratis related affairs are added in relevant date boxes of our Gujarati calendar e. While making this Gujarati calendar, we driven by Gujarati cultural patriotism have taken some new initiatives and liberties on our own e. We have also mentioned some informative details in date boxes e. In December we are continuing the same and even going one step ahead. We have added some interesting events that are going to take place in December in the state. We believe that in digital age, the Calendar should be live. At least ours will be like that for sure. Currently we are releasing only November-December calendar page. All the other months pages will be released one by one after this and will be interlinked. Your suggestions are welcome. Please wait till all images are loaded. Each picture file is in png format. The Western calendar is based on the sun, in which a year is the time required for the earth to complete one orbit around the sun. This precisely measures days 5 hours 48 minutes and 46 seconds. The Indian calender is ingeniously based on both the sun and the moon; it uses a solar year but divides it into 12 lunar months. A lunar month is precisely 29 days 12 hours 44 minutes and 3 seconds long. Twelve such months constitute a lunar year of days 8 hours 48 minutes and 36 seconds. To help the lunar months coincide with the solar year, the practice of inserting an intercalary extra month arose. Hence an extra month, called the Adhik Mas, is inserted every 30 months i. Lunar days in the Indian calendar are called tithis. They are calculated using the difference of the longitudinal angle between the position of the sun and moon. Because of this, tithis may vary in length. Consequently, the tithi may or may not have changed by the time the day has changed at sunrise. And that is why we find at certain times a tithi being omitted, and at certain times, two consecutive days sharing the same tithi. In the Indian calendar, seasons follow the sun; months follow the moon; and days, both the sun and the moon. To calculate the corresponding year of the Common Era, 57 years should be subtracted from the Indian year if the date falls between the beginning of the Indian year and the end of the Western year i. If the date falls between the beginning of the Western year and the end of the Indian year i. We present the year calendar with the tithis, dates and holy festivals of India.

3: Gujarati Calendar | Calendar

Today, October 19, is celebrated as Gujarati New Year. www.enganchecubano.com day is known as Padva and it marks the start of the Vikram Samvat calendar.. In terms of the five day Diwali festival it is the fourth day and it falls on Ekam tithi of Hindu calendar month Kartak.

4: Gujarati Calendar Panchang – Vikram Samvat Calendar | Diwali

Hindu Calendar with Tithi | Panchang [Vikram Samvat] It's again that time of the year where the new year tends to be some few days left and the need for something new to even start. Hence the one thing that people tends to look out for is the need to have the calendars ready in their houses for keep track of everything.

This article is basically all about the Hindu Calendar with Tithi. As we all know how much importance a calendar plays in our daily life. Basically a calendar is a system of organizing days for religious, social, administrative or commercial purpose. Hindu calendar is basically a combined term for the various Lunisolar calendars used in Hinduism. As in ancient times the people used to worship Pashupati goddess. In Harappa civilization also the people used to worship mother goddess and pashupati lord. For the southern region Tamil calendar is found and for the eastern region Bengali is there all of which emphasize the Lunar cycle and their new year starts in spring. In regions such as Kerala the solar cycle is emphasized and the calendar there is known as Malayalam calendar and their new year starts in autumn. The ancient Hindu calendar is very much similar to the Jewish calendar but different from the Gregorian calendar Hindu peoples celebrate and worship many gods and celebrate more festivals than any other religion people does. Early Buddhist communities of India adopted the ancient calendar of India later came the vikrami calendar and then the local Buddhist calendar. First is the Amanta tradition in which on no moon day the lunar month ends. Second is the Purnimanta tradition. In purnimanta tradition on full moon day the lunar month ends. Amanta is also known as amavasaynt tradition. This tradition is followed by all of the Indian states which have a peninsular coastline leaving odisha, assam and tripura. Odisha, assam and tripura follow the Purnimanta tradition. Purnimanta tradition was being followed in the ancient times Vedic era. Amanta system replaced the purnimanta system and is in use as the Hindu calendar system from the first century BC. As once Dayanand saraswati also said to go back to the Vedas. On this night the half moon turns into a full moon whereas the other half turns and ends into a new moon. Most of the Hindu festivals often are either on or the day after the full moon night or the darkest night also known as Amavasya night except for some which are associated with gods like lord Rama, Lord Krishna, and lord Durga. The combination of these three systems has led to determine the dates of the festivals or any event in ancient or modern times of Hindus, Buddhist or Jainism literature and festival calendars. Panchang Calendar As like in months the Hindu calendars has two measures of day, out of which one is based on the lunar movement and other on the solar. The solar days also known as civil days are called divasa which has been and what most Hindus traditionally use which is simple and exact to see, by poor and rich, with or without a clock, and it is characterized as the period starting with one dawn then onto the next. A lunar day or tithi may start at any time as in it started in morning and can end the next morning. Both of these do not correlate to mathematical measures of lunar movement. Some Important dates in Hindu calendars for the year
