

1: Economic Benefits of Adventure Tourism | USA Today

In , travel generated \$ trillion for the U.S. economy, supporting million American jobs.

The good news is that, with increased competition, a number of airlines have ramped up their offerings in the coach cabin. The reign of cramped legroom, overhead TVs, and stodgy airline food is over. Here are the 10 best airlines for budget travelers. JetBlue JetBlue incorporates elements of low-cost carriers and full-service airlines. Air New Zealand As well as being a world leader in cheesy safety videos seriously, who wants Richard Simmonds giving them emergency advice? If you want to arrive extra energized, you can upgrade to an amazing SkyCouch sleeping platform on selected routes. Having a guaranteed three seats to yourself to spread out across, creating your own sleeping platform? The flight attendants are surprisingly generous with the drinks and food, too â€” take advantage of the light bites menu during long-haul trips and stash yourself some snacks for when you hop off the plane. Qantas Qantas has really upped its game in the past ten years. The food onboard is tasty, and you get a lot. Singapore Airlines Singapore Girl is a great way to fly. Need a toothbrush or a comb? However, the seats are a bit narrow, so opt for a bulkhead row if you get a choice and hey, there is no harm in asking! You can take up to 30kgs of luggage, too. While they lack the marketing clout of Emirates, the service on board is still pretty good. The best thing about Etihad, though, is their amazing fares, meaning your trip can be taken for a lot less moolah â€” and you can invest more in your adventures when you land. However, they are still miles ahead than your average American carrier. They do a mean cappuccino, and the flights are often half empty â€” meaning extra space for you to stretch out. Legroom is never an issue for me. That poor guy looked pretty grim by the time we landed. On most flights, there is nothing under the coach seats to stop you from stretching out. Cathay Pacific advertise that it focuses on providing fresh fruit and vegetable, including delicious juices, which are a welcome change from the carb-tastic meals on many airlines. If you need to work or blog, all seats include in-flight power, a feature that is lacking on many airlines. I only wish it was more Japanese â€” the grey interior is a little bland, although the in-flight bento-box style lunches are pretty cute. How many airlines have their own food stylists for the coach cabin? While the entertainment system is rather anime-heavy, the mystery snacks in the galley will provide you with hours of free entertainment. While there are no seatback TVs, you can download a handy app ahead of your flight that offers free access to movies and entertainment on your phone, laptop, or tablet. It flies to some amazing destinations and has some incredibly cheap deals â€” particularly across Europe. All seats have in-flight entertainment with free movies, and oddly enough, Google Maps â€” which is a pretty fun way to waste time on a long-haul flight. You can order cheap meals through your screen, or just bring your own food if you really want to keep it cheap. When booking, though, make sure you select a bag to add to your ticket, if you need one. Those unexpected baggage charges at the airport can really put a downer on your trip. This is actually operated by ANA. The writer apologises for any confusion caused.

2: Travel & tourism: global economic impact | Statistic

Tourism Economics releases new Global City Travel service covering cities around the world Global City Travel provides detailed and comparable inbound and outbound travel data for cities around the world, which represent more than 80% of global air travel.

May 23, by Travis Bennett Traveling is fantastic. When it boils down to it, tourism is great for not just individual travelers, but also the local economies. Tourism also allows wealth to be injected into a community in a variety of ways. This means that every dollar coming into the industry is felt quickly by business owners and staff, and is directly related to a boost in local spending. For a community with the potential to become a tourist destination, there are a huge range of benefits. For anyone that is still wondering how all this trickles down into the economy, check out this course on economics and learn how the different parts are all connected. This article will cover the obvious, and the not so obvious advantages of tourism for the local industry, in addition to the main benefit of bringing income into a community that would otherwise have not been earned. Employment One of the easiest advantages to identify is the jobs tourism brings. This ranges from directly influenced positions like tour guides, hotel staff, coach services, and restaurants. For a better understanding of the key macroeconomic indicators that need to be seen in a healthy economy, check out this recent post. Increased Spending in the Local Community This comes twofold. First you have the money that is spent directly by tourists in the economy. Not just on tourism, but there are a huge range of basic human requirements that need to be purchased, like food, clothing, hairdressing, medical services, and transportation needs that all need to be filled, along with souvenirs and amusements. In its own way, tourism supports global trade, which you can learn more about in this course on the new economy. In addition to what is spent by tourists, the tourism dollars that are earned, by both businesses and individuals is often re-injected into the local economy. This is why tourism revenues are often referred to as having a multiplier effect, because a large percentage of every tourist dollar earned is reintroduced back into the economy, again and again. This is the multiplier effect. Ultimately, the more tourist dollars coming in, the larger the economic benefit for everyone. Diversification In addition to bringing prosperity to an economy, it also allows an economy to develop a new form of income. This acts as an insurance policy in case of hard times, because the additional dollars coming in can help support traditional industries in case they come under financial pressure. This is especially important for communities that rely on a single industry, or where there is a concentration of industry that is environmentally damaging such as mining or manufacturing. Tourism allows a community to diversify their sources of income, and rely less on a single industry. Infrastructure The additional revenue that comes into a community also benefits the local council or governments. It means more tax dollars, which allows public projects to be launched or developed. This means the infrastructure improves, with new roads being built, parks developed and public spaces improved. The better facilities brings in more visitors, but is a fantastic benefit to local residents, especially when there is enough revenue to build new airports, schools and hospitals, which all support the economic development even further. Without a good infrastructure, the flow of goods and services is impossible, and tourism revenues allow this to be supported. Social advantages In addition to the revenue, there are also fantastic cultural advantages to tourism. It can be a source of pride for local communities, and allows them to look at their history, and cultural heritage and develop their own community identity. This helps the local residents to maintain their traditions and culture, while also showcasing it for all the visitors. This advantage of tourism is what has saved many local heritage sites from destruction, in addition to giving tourists a wonderful insight into the local ways of life. Tourism can help to preserve the history of a region that may be at risk of being lost. Environmental Advantages Many tourism operators are differentiating themselves from their counterparts by offering tours and packages with an environmental twist, and supporting the conservation of the local area. This helps both the environment in dealing with the influx of tourists, but also helps to build a strong reputation for the tourism operator. As a traveler, remember to respect the places you visit, and always leave them as you found it. One of the best ways to practice this is this course on becoming an expert travel photographer , so you can have all the memories,

but leave only your footprints. Opportunities Bringing tourists into a community gives it new life, and creates opportunities for entrepreneurs to establish new services and products, or facilities that would not be sustainable based on the local population of residents alone. Tourists are all potential customers, and with the right approach can be targeted in a business strategy that allows for fantastic success. Never do anything that deteriorates the environment, and support the local and community owned establishments that form the heart of the local tourism industry.
