Download eBook Everyone knows that the current tax system is unfair. Some of the richest people in America pay no tax, while a huge share of the tax burden falls on the rest of us. A mere glance at the tax code confirms that it is far too complex, with volumes of rules that no ordinary person could possibly comprehend. What is to be done? Some conservatives have called for a so-called flat tax. But a flat tax is not necessarily a simple tax, and "flat" means "more" for most taxpayers: Is there another choice? In clear, easy-to-understand language, Edward J. McCaffery proposes a straightforward and fair alternative. A "fair not flat" tax that is consistent and progressive would tax spending, not income and savings. And if it were collected at its lower levels through a national sales tax, most people would not have to file a return. A supplemental tax on spending for the wealthiest individuals would make the national sales tax progressive. Necessities would be taxed less than ordinary and luxury items. No one would be taxed directly on savings. The "fair not flat" tax would fall on heirs when and as they spend their good fortune. Perhaps best of all, most Americans would not have to fill out tax returns. Read Fair Not Flat to find out how. McCaffery lays out the case for a consumption tax. He does so in a reader-friendly way, presenting his argument with very few footnotes, equations or technical terms. The consumption of the book, so to speak, is not at all taxing. And its argument is well worth pondering.
