

1: American History [www.enganchecubano.com]

Course Summary This 11th Grade U.S. History textbook replacement course covers all of the topics in a standard U.S. history textbook.

Students, please register for text message updates from me. Please note that the text is case sensitive. Please e-mail me instead. In other words, all students are provided a copy of my class notes for the entire year. Rather than focusing on trying to copy information off of the board, students can instead spend their time analyzing this information and taking their notes on top of my notes. They contain a complete list of our daily learning objectives and content lists, facts for which to listen during note-taking sessions during class and to prioritize in homework. Please refer to the information below on this website page for advice on how to maximize use of these Board Notes. The Board Notes are available in the Dropbox in printable pdf format and also in editable Word format: I highly encourage students to take notes on laptops, iPads, or other technology, both during and outside of class. They are meant as pre- and post-reading guides to aid comprehension. Please feel free to read them and ponder them. Together, they constitute the major questions students must answer to know their places in the American past and present, for this year and the rest of their lives. Thus, these questions will be very helpful as students collect and organize evidence in preparation for all of our exams this year. Students, I recommend using the syllabus to plan your week. Preview all of the assignments on Monday evening. Assess which are longer and shorter; assess which seem more difficult or less so. Estimate how much time is needed for each, and fit that time into your weekly schedule with your other commitments. Try to anticipate on which assignments you may need help, and then come in for help. A weekly schedule of lunchtime and after-school help times is posted each Monday morning in the classroom. I am available every day, either at lunch or after school or both. You can talk over which assignments seem to be longer and will therefore take more time and planning, more difficult therefore enabling your student to get an early start or to come in for a help session with me, or more potentially frustrating definitely not an assignment to save until the last night before it is due. There are several purposes for keeping this running list; the most important two are to help the students prepare for exams and to allow students to make up missing homework assignments. Please note that if a student wants to make up missing homework, I can not give assignment information or materials again. Students are held responsible for knowing the specific instructions for each assignment. Work that does not meet assignment criteria will not earn credit. I also highly recommend that students and parents not wait until grade updates have been posted on line before addressing missing homework. Please use this link to access all weekly syllabi instructions for all homework assignments for the week that are given to students each Monday in class. By clicking this link, students and parents can access instructions for every homework assignment for the entire school year: Please be aware that I occasionally make changes to homework assignments that will not be reflected on these syllabi. Students are notified of all changes during class and are responsible for making these changes on their copies of their syllabus. In it is an entire section on the criteria for strong homework assignments. Homework assignments are graded holistically according to the reading, thinking and writing skills that we practice together to develop our college readiness. Here are some excerpts from that section of the Green Sheet. Please refer to the Green Sheet for the full text: Strong grades are earned on homework by meeting the following criteria: Answering the required questions directly and thoughtfully, including critical analysis and creative thinking Supporting conclusions with evidence quoted and paraphrased from the readings; make it clear that you read the assignment and use the text as proof for your ideas Putting answers in your own words: If you get an NC, you should finish the assignment and hand it back in to get credit. Make-up NCs can earn only late credit, not full credit. It is important for you to understand your reading, and we will discuss the accurate answers in class, but please feel free to guess and take risks in your thinking in your homework. Here is a summary of our general process in class: These questions are meant for pre- and post-reading: Then, after finishing the chapter and their notes, students should return to the Guide Questions. Here is a good self-test: Each day when a chapter is due, I begin class with a second quiz. These reading quizzes contain 3 fact-based questions, and 30 seconds are given for each

response. The quizzes are always open notes and will never contain any information not included in the Guide Questions. Therefore, in addition to being the vital first step to improving overall performance in class in order to be able to successfully analyze information in class and on exams, students must first understand that information well, effectively using Guide Questions is the best way to improve low scores on chapter reading quizzes. Once students have reached a basic understanding of the history contained in the textbook, we spend our time in class analyzing the information and making connections, comparisons and judgments. Therefore, if students are having trouble in class, focusing on these second drafts should be the top priority. Together in class, we work toward a level of understanding at which students will be able to 1. In other words, we work together to discern important information from trivia. By having them on paper, students can instead focus on working with them and adding to them rather than having to copy them from the board during class. In other words, all students are provided with copies of all of my notes for the entire year. These Board Notes contain, among other things, my lists of information from the textbook that I find to be the most important to our analysis thereby helping students add to and filter their own notes and ideas for themes and stories thereby helping students organize their own notes. The Board Notes also contain many of my hints as to what essay exam questions will be. One mistake students make is to memorize for exams without creating excellent second-draft notes beforehand. Students, do not study for exams by using your first-draft notes! Then, for about two weeks before an exam, students should spend about minutes a day, every day, no more but no less, memorizing information from the second-draft notes. In order to succeed in class, students must abandon that old habit of cramming for exams that has proven time and again to fail miserably.

2: Social Studies / United States History II Honors (11th grade)

The Men Who United the States: America's Explorers, Inventors, Eccentrics and Mavericks, and the Creation of One Nation, Indivisible (Hardcover).

Twelve High school juniors can see the light at the end of the tunnel. With two years of high school under their belts, juniors generally settle into an academic rhythm and many are thinking about the next big steps: One way 11th graders can complete those goals is through an education online. Juniors choosing to take classes online, either part-time or full-time, can have direct contact with admissions specialists and counselors at their schools who will help steer them in the right direction. In the online environment, students may face less distractions -- and drama -- that can occur at a traditional high school and instead be able to focus strictly on academic goals. Digital learning for juniors: Flexible class scheduling gives students the freedom to take classes when and where they want. This means juniors will have more time for part-time jobs or those things of other importance in their lives. Also, with online learning, students are engaged in an online world akin to what may be found in college -- online or otherwise -- where sharp communication skills for a future job may be learned. Additionally, the network of support with an online school is just an email, chat or text away. There are an estimated 3 million enrollments in K online and blended courses. There are , course enrollments in state virtual schools and , full-time students enrolled in full-time online schools in the U. These , students include , enrolled in virtual charter schools in 26 different states. College prep building blocks in the digital environment In the online school environment, juniors typically spend up to four or five hours daily in front of the computer learning the basic skills they need to move on to the 12th grade. Online 11th grade students concentrate on varying levels of math, science, social studies and language arts, as well as learning across the curriculum. Standard curriculum dictates that juniors must pass at least one of the following core courses to become eligible for the twelfth grade: American literature, the research process Math: Algebra II, trigonometry Science: Chemistry, physics Social studies: World War I, World War II, the Cold War Through online 11th grade programs, juniors will find opportunities to advance their learning in areas like these and could also discover options to tailor fit classes toward areas of interests. In that model, a student should already have accrued 30 semester hours to be a junior and would be working on the next 15 semester hours to complete that year. These hours can come from any combination of the four core courses: Extracurricular courses also apply toward graduation credits but are considered separate from core curriculum requirements. Online programs typically provide high school counselors and college admissions specialists to students to help ensure they are on track and receiving answers to questions that arise. A home network that cultivates success Despite the fact that juniors are beginning to adopt a sense of autonomy with respect to their schooling, the parent factor is still present and can mean the difference between an average year and a successful one. This series of checks and balances reduces the chances of students veering off track by the end of the year. Additionally, more online schools are establishing partnerships with community stakeholders to encourage top performance and reward excellence. Employees of community businesses are invited to visit school websites and become involved in online opportunities to volunteer their time, donate their resources or mentor at-risk students. The junior year of high school requires students buckle down and focus on their future goals. With college admissions on the line, juniors are advised to take advantage of every resource they have. Fortunately, 11th grade online programs provide students with a wide variety of resources to help them to take the steps they need to achieve. With the flexibility and convenience of home-based learning, juniors can even mix up their academics with extracurricular activities to gain a well-rounded education.

3: Eleventh Grade (Grade 11) US History Questions for Tests and Worksheets

Free Online Textbooks. The mission of Independence Hall Association, owner of www.enganchecubano.com, is to provide a forum for learning and discussing American history and values.

It is the sixth and penultimate year of secondary education. For students who entered secondary school before September ,[citation needed] it is not compulsory to attend these last two years. During Year 12, three Advanced Subsidiary units are completed per subject either written exams, coursework or a mixture, depending on subject. Often students choose four AS-Level subjects in Year 12 some students may decide to take three or five. Students then enter Year 13 equivalent to 12th grade and may choose to drop a subject,[citation needed] going on to complete three subjects. Scotland[edit] In Scotland, fifth year of secondary education or S5 is optional, where pupils will generally sit Higher qualifications which form the core entry requirements for university. It is followed by an optional final sixth year also known as S6. The students ages normally range from in this year. Northern Ireland[edit] The system is similar to the English one at this age. This section does not cite any sources. Please help improve this section by adding citations to reliable sources. Unsourced material may be challenged and removed. October Learn how and when to remove this template message In the US, a student in the eleventh grade is typically referred to as a third year high school student or junior. Math students usually take Algebra II , but classes like Trigonometry or Precalculus are sometimes offered for students who wish to take Advanced Placement math classes in their fourth year aka senior year of high school. Depending on the location there may be a combination of any of the listed subjects. They may also take easier courses such as Algebra I and Geometry if they do not have the required prerequisites for the more advanced courses that are listed above. Students who are advanced in mathematics often take Calculus or Statistics. In science classes, third year students are taught usually Biology , Physics or Chemistry especially Lab Chemistry. Atoms , molecules , and Stoichiometry is taught as well. Some school districts will have these certain subjects as a required science credit while others will begin to have the option of science electives. In English class, a college-preparatory curriculum would also include American literature. Often, English literature also referred to as British literature is taught in the third year of high school. In a social studies curriculum, third year students in the United States are usually taught US history or the world from the s to the 21st Century. They may also acquire more advanced world culture and geography knowledge, along with some more-advanced social studies such as psychology , economics , sociology and government. Many high school third year students in the United States opt to take a foreign language , even though it is not required in many secondary schools curricula. While normally followed by twelfth grade , some colleges will accept excelling students out of this grade as part of an early college entrance program. Alternatively, some students may choose to graduate early through standardized testing or advanced credits.

Please refer to the Green Sheet for the full text: Strong grades are earned on homework by meeting the following criteria: Answering the required questions directly and thoughtfully, including critical analysis and creative thinking Supporting conclusions with evidence quoted and paraphrased from the readings; make it clear that you read the assignment and use the text as proof for your ideas Putting answers in your own words: If you get an NC, you should finish the assignment and hand it back in to get credit. Make-up NCs can earn only late credit, not full credit. It is important for you to understand your reading, and we will discuss the accurate answers in class, but please feel free to guess and take risks in your thinking in your homework. The Unit Outlines to which I refer below are available in my Dropbox. Unit assessments projects and essay exams are not meant to surprise or fool you! In fact, at the beginning of each unit, students will receive a Unit Outline that includes, among other useful information, the key learning objective for that unit. In other words, students will learn on the very first day that we begin a unit the exam essay question that ends that unit, as well as other projects or expectations of them over the course of the entire unit. All unit assessments are completely open binder: I therefore recommend organizing your assessment preparationâ€”preparing for an essay, doing a project, etc. Low-Level Critical Thinking Low-level critical thinking means understanding information, knowing who people are and what happened in certain events, etc. It also involves being able to read documents accurately and critically. In your unit outline, you will see two

helpful resources to aid you in your low-level critical thinking. People often make the mistake of thinking of low-level critical thinking as the end product of history class. In fact, it is only the first of many steps. Content Lists—These lists of people, places and things constitute the most important facts that we have studied in class; these lists will help you understand what is the most important information. Some items come from homework readings, others from lectures and class discussions. Items on these content lists will eventually make great pieces of evidence to prove your opinions in essays and projects. These content lists will also help you very much in your note-taking during class. Try to listen for things on the lists. If you hear something in class that is on a Content List, prioritize it in your note-taking. Lists of Sources—These lists tell you all of the readings and other visual and auditory sources we use for homework and during class throughout the unit. Using these lists will refresh your memory about all of the places you can look for facts and quotes to use as evidence for your projects and essays. These lists will also help you remember which time period the source comes from. Mid-Level Critical Thinking Mid-level critical thinking means finding patterns in the history we study—similarities and differences, themes and main ideas. Mid-level critical thinking allows you to tie together everything we learn, to create categories of information. Being able to understand patterns in the history is a vital step in your overall mastery and for essays and projects in particular. For example, as we will discuss in class, a solid theme is what makes a great topic sentence in an essay. Your best tool for mid-level critical thinking is the learning objectives in your Unit Outlines. In preparing for unit assessments, practice answering each learning objective by using 1. If you are an auditory learner, form a study group and talk through your answers to these learning objectives with friends. Go over your notes from class and old homework assignments. Think of your themes as hashtags—main ideas into which all of your individual quotes and facts fit. Write items from the content lists, main ideas and quotes from homework readings, and information from your class notes together according to the learning objective to which it pertains. Use graphic organizers, charts, and other visual formats. Understand the way your brain works and take advantage of your strengths! Upper-Level Critical Thinking Upper-level critical thinking means making judgments and creating original conclusions. All unit assessments are centered around upper-level critical thinking questions. Once you have done your low- and mid-level thinking, you are well on your way to making responsible, reliable, creative and well-proved judgments! Having all of your sources from throughout the unit organized in your binder is a must, as your binder also functions as your textbook. I cannot stress enough that without these two commitments to success, any success at all in class will be extremely difficult if not impossible. Above all else, students must do their homework daily and keep an organized binder.
