2: The American stationer v. 12 July/Dec.

The Biodiversity Heritage Library works collaboratively to make biodiversity literature openly available to the world as part of a global biodiversity community.

Appointed to the United States Naval Academy in , he was graduated in , being assigned the rank of ensign. He then served several tours of duty, , and His most notable peace-time achievement was his work while in command of the Coast Survey, U. During these years, associated with Alexander Agassiz, he was engaged in deep-sea explorations, principally in the Gulf of Mexico, where he made a complete deep-water survey of the gulf. While on this duty he invented a deep-sea sounding machine based on the wire-sounding apparatus of Sir William Thomson, and other devices for specimen collecting at various depths of the sea. These inventions practically revolutionized deep-sea sounding and dredging. For his contributions to the advance of scientific exploration, Emperor Wilhelm I bestowed upon him the decoration of the Red Eagle of Prussia. After completing the coast survey, he served in the Hydrographic Office at Washington from to and, from to , he was chief hydrographer in the Navy Department. Having been advanced through the preceding ranks, he was commissioned captain, March 21, , and was in command of the battleship Maine from April 10 of that year until it was destroyed by explosion in Havana harbor, February 15, The naval court of inquiry exonerated him and his officers and crew from all blame for the disaster. On May 25, , in command of the St. After a year spent at League Island Navy Yard, where he was called to improve the management and production of ship building activities, he was commissioned rear-admiral, August 11, . He was then given a command of the Caribbean Squadron U. Newark , which assisted in the U. Marine invasion of San Domingo on June 18, He sailed for France with a fleet of four ships and brought back the body of John Paul Jones in his flagship, the Brooklyn, arriving in Annapolis July 25, After commissioning the squadron of the North Atlantic fleet for two years, he retired on January 16, The remaining years of his life were not particularly happy ones, being greatly distressed because of problems relating to his divorce from Eliza Lockwood Sigsbee, to whom he had been married to in They had four children. After their separation, he resided with his nurse, Nellie G. Gunther, until his death. Scope and Content The papers of Charles D. Sigsbee , generated mostly between and , document not only his many achievements as a naval officer, but also the intricate details of his tragic personal relationship with his wife and children. The story of his personal life is revealed mostly through his correspondence with his wife, children, and close relatives. Letters he had written contain lengthy discussions of his daily work routine, especially when at sea. They provide an interesting perspective of working conditions and naval life, in general, during the second half of the nineteenth century. Family matters were also the subject of many letters, especially after his marital problems came to full fruition. In later years her anger became more pronounced with accusations about her husband having affairs with other women. For further consideration of this matter, there are additional files that contain the separation agreement, along with briefs of court proceedings and his letters to Nellie Gunther Milligan. These papers also contain orders, correspondence, memoranda, and reports generated by his official duties with the United States Navy. The orders from the Navy Department provide a chronological record of his commissions, promotions, and tours of duty. Included are detailed reports on his experimentation of deep-sea sounding and dredging apparatuses. Similarly, his response to the explosion of U. Maine is documented. Here, it is difficult to discern whether or not the explosion was a premeditated incident to provoke war with Spain or even the fact that Sigsbee was a willing participant. It appears, nonetheless, that he was a competent commander, judging from the papers relating to his actions in seizing the British collier and the sinking of a Spanish battleship while in command of the U. Lastly, he was probably a good administrator, as it was his duty to improve the management of the Navy ship yard at League Island, Pennsylvania. Other naval activities documented in detail include his testimony on behalf of Commodore Winfield Schley , his command of the South Atlantic squadron which assisted in the Marine invasion of San Domingo , and transferal of the remains of John Paul Jones from France to the United States Also included are the records of the Maine Monument Association, where he presided over the raising of funds for the monument erected in Washington, D. There are also patents and specifications

for some of his inventions, such as an improvement of the parallel rule , trunk hinges and stays , and electric current regulators Lastly there is a collection of photographs that include views of Sigsbee himself, family members, close friends, naval vessels, the John Paul Jones Exposition , and the dredging and salvage of the U.
