

1: Types of Veterinary Jobs | Career Trend

While your first thought may be the always popular field of veterinary medicine, there are many other careers with animals that may be of interest to you. Here is an always evolving list of career possibilities for animal lovers divided into categories.

Educational services; state, local, and private

1 Most veterinarians work in private clinics and hospitals. Others travel to farms or work in laboratories or classrooms. Veterinarians who treat horses or food animals travel between their offices and farms and ranches. They work outdoors in all kinds of weather and may have to perform surgery, often in remote locations. Veterinarians who work in food safety and inspection travel to farms, slaughterhouses, and food-processing plants to inspect the health of animals and ensure that the facility follows safety protocols. Working on farms and ranches, in slaughterhouses, or with wildlife can also be physically demanding. Injuries and Illnesses for Veterinarians When working with animals that are frightened or in pain, veterinarians risk being bitten, kicked, and scratched. In addition, veterinarians working with diseased animals risk being infected by the disease. Veterinarian Work Schedules Most veterinarians work full time, and they often work additional hours. Some work nights or weekends, and they may have to respond to emergencies outside of scheduled work hours. Get the education you need: Find schools for Veterinarians near you! Veterinarians must have a Doctor of Veterinary Medicine degree from an accredited veterinary college, as well as a state license. There are currently 30 colleges with accredited programs in the United States. A veterinary medicine program generally takes 4 years to complete and includes classroom, laboratory, and clinical components. Veterinary medical colleges typically require applicants to have taken many science classes, including biology, chemistry, anatomy, physiology, zoology, microbiology, and animal science. Most programs also require math, humanities, and social science courses. Admission to veterinary programs is competitive. In veterinary medicine programs, students take courses on animal anatomy and physiology, as well as disease prevention, diagnosis, and treatment. Most programs include 3 years of classroom, laboratory, and clinical work. Students typically spend the final year of the 4-year program doing clinical rotations in a veterinary medical center or hospital. Some veterinary medical colleges weigh experience heavily during the admissions process. Formal experience, such as previous work with veterinarians or scientists in clinics, agribusiness, research, or some area of health science, is particularly advantageous. Less formal experience, such as working with animals on a farm, at a stable, or in an animal shelter, can also be helpful. Although graduates of a veterinary program can begin practicing as soon as they receive their license, some veterinarians pursue further education and training. Some new veterinary graduates enter internship or residency programs to gain specialized experience. Licenses, Certifications, and Registrations for Veterinarians Veterinarians must be licensed in order to practice in the United States. Licensing requirements vary by state, but all states require prospective veterinarians to complete an accredited veterinary program and to pass the North American Veterinary Licensing Examination. Veterinarians working for the state or federal government may not be required to have a state license, because each agency has different requirements. Most states not only require the national exam but also a state exam that covers state laws and regulations. The American Veterinary Medical Association recognizes certification in 41 specialties, such as surgery, microbiology, and internal medicine. Although certification is not required for veterinarians, it can show exceptional skill and expertise in a particular field. Important Qualities for Veterinarians Compassion. Veterinarians must be compassionate when working with animals and their owners. They must treat animals with kindness and respect, and must be sensitive when dealing with the animal owners. Strong communication skills are essential for veterinarians, who must be able to discuss their recommendations and explain treatment options to animal owners and give instructions to their staff. Veterinarians must decide the correct method for treating the injuries and illnesses of animals. Manual dexterity is important for veterinarians, because they must control their hand movements and be precise when treating injuries and performing surgery. Veterinarians need strong problem-solving skills because they must figure out what is ailing animals. Those who test animals to determine the effects of drug therapies also need excellent diagnostic skills. The median

wage is the wage at which half the workers in an occupation earned more than that amount and half earned less. The median annual wages for veterinarians in the top industries in which they work are as follows:

2: Top Careers Working With Animals | Chegg CareerMatch

The Veterinary Medicine Career guide, is exactly that, a guide for you, for those looking to become more involved in the health care of animals. It can be as extensive as becoming a veterinarian or in support to veterinarians as veterinary technicians or the less demanding veterinary assistants.

After all, animals can be incredibly fun, loving, loyal, and appreciative. And even if some animals are a little wild and scary at times, you can still experience a great deal of pride and satisfaction in knowing that you are helping or caring for them. Jobs working with animals, and pet ownership, can also come with health benefits, including lower blood pressure, decreased cholesterol levels, and fewer feelings of loneliness. According to a survey, more than 60 million households own a dog, and over 47 million own a cat. So it makes sense that pet spending hit its highest level yet in the U. And as pets, and animals in general, become more valued by society, it only makes sense that the opportunities to find jobs with animals will grow. In fact, the field of veterinary medicine is expecting strong job growth. When many people think of careers with animals, they often picture working at a veterinary clinic. But keep in mind that there are many other career options out there. In addition to checking out the most common veterinary careers listed below, you may also want to explore 15 other jobs working with animals that you may not have considered until now.

Veterinary and Animal Health Careers

- 1. Veterinary Assistant** For those who are interested in jobs with animals in veterinary settings, veterinary assistant positions are appealing because short training programs make it relatively simple to get started in the field. Although post-secondary training is not always required, job candidates who have at least a certificate are often preferred over those who do not. And many certificate programs can be completed in as little as six months to one year, so it is a worthwhile investment. By developing basic skills related to areas like office administration, clinical procedures, and surgical preparation, you can start pursuing veterinary assistant positions with animal clinics, hospitals, and shelters. You could spend your days taking care of tasks like feeding animals, providing pre- and post-surgical care, giving medication, assisting with collecting lab samples, and taking care of a variety of additional responsibilities that help keep the clinic running smoothly. Veterinary assisting is also one of the animal careers that can offer good job prospects. It is estimated that jobs will grow in number by 19 percent from to . In fact, more than 95, people work in veterinary technology across the country. Veterinary technology programs can be completed in approximately two to four years, depending on the type of degree program that you choose. Once you have earned your degree, you will likely need to become certified. Every state is different, but most people who want to practice veterinary technology must pass the national exam offered by the American Association of Veterinary State Boards. As a veterinary technician, you will assist veterinarians with important work related to diagnosing, treating, and caring for animals. Not only do you get to enjoy working with other animal lovers and helping pets, creatures, and critters every day, you may also find good job opportunities. It is estimated that, from to , veterinary technology jobs will grow in number by 20 percent and there will be more than 20, total job openings.

Veterinarian When it comes to jobs that work with animals, veterinarian likely tops the list. After all, it is considered one of the best careers for animal lovers. You get to dedicate yourself to promoting the health and well-being of animals every day. As a veterinarian, you will have a respected role in your community, and you get to experience the gratitude that people give when you have cared for or healed their pets. Becoming a veterinarian does require a lot of hard work and commitment. You will have to spend many years in school in order to earn a doctorate degree and obtain licensing. And you will have to be committed to a lifetime of learning because continuing education is a requirement for maintaining your license. But with all of that hard work can come a substantial payoff. You can engage in work that you are deeply passionate about, and, in doing so, you can be paid very well and enjoy great job opportunities. From to , veterinarian jobs are expected to grow in number by 19 percent, and there could be more than 15, total job openings during that period. Veterinarians can also advance their careers further by focusing on specialty areas. Many choose to specialize in fields like alternative medicine, dentistry, emergency care, or surgery. You could come across many different and interesting possibilities when you choose a career in veterinary medicine. Experience

needed” Extensive 15 Additional Great Jobs Working With Animals Although working in veterinary medicine is a common career choice for animal lovers, there are many other options when it comes to jobs involving animals. Some require little to no experience and could even be pursued as side jobs. Some of them have more extensive education and experience requirements. And others are a little unusual. You may not have even heard of them until now. So explore the 15 animal-related careers below and see if one of them appeals to you.

Dog Walker For people who are interested in jobs with dogs, becoming a dog walker could be a great choice. You just need a love for dogs and the motivation to go out for walks every day or multiple times a day. The reality is that many pet owners have a limited amount of time to spend walking their dogs. Long working hours and other life and family commitments often result in not being able to get Fido out for a walk every day. But a lot of dogs need those daily excursions in order to burn off excessive amounts of energy. So their owners often hire dog walkers to help keep their dogs healthy and happy. You will need to decide how many dogs you will be able to handle at one time and how many walks you can go on each day. That will largely determine how much money you earn since most dog walkers charge per dog and per walk.

Pet Sitter Pet sitting is a great option for jobs that involve animals because you can be paid to spend time with loveable pets without having to complete a lot of training. It can also be done on the side so that you can keep your current job. So pet owners seek out the services of pet sitters instead. There are websites that are dedicated to helping pet owners find pet sitters. So you could register with one of those sites, or you could advertise through local online and printed classifieds in order to connect with potential clients. Some owners may request that you stop in to their home for a certain number of times each day, whereas others may request that their pets stay with you or that you stay with them. Depending on the arrangements, you may choose to charge per visit, per hour, or per day.

Animal Caretaker If you are interested in animal shelter jobs, then becoming an animal caretaker could be an ideal option. You may also find positions at places like kennels, pet stores, and veterinary clinics. Along with having some experience with caring for animals, you could also benefit from taking a short animal care program. Although a lot of organizations do not require post-secondary training, many do prefer it and are more likely to offer positions to those who have obtained some animal training. Animal caretakers often have responsibilities like observing, examining, feeding, bathing, and training animals. You could also be responsible for cleaning and sterilizing kennels, living and care spaces, and tools and equipment. Animal caretaking is one of the truly hands-on jobs dealing with animals, and the field offers you the opportunity to provide compassionate and loving care to animals every day.

Animal Cruelty Investigator Harming animals is an unthinkable act for most people. But, unfortunately, animal cruelty does happen. When it does, animal cruelty investigators are needed in order to respond to and investigate complaints, as well as to collect evidence for trials and convictions. It is certainly one of the more emotionally trying jobs that deal with animals, but it is also one of the most important and meaningful. When animals are abandoned, abused, diseased, injured, neglected, or otherwise left in unhealthy or dangerous conditions, it is you who comes to their rescue. When you conduct an animal cruelty investigation, you may need to carry out actions like obtaining search and seizure warrants, catching and removing animals from homes and properties, transporting animals, and working with law enforcement officials. Most organizations prefer that job candidates have some knowledge of law enforcement or criminal justice processes, along with experience at working with animals. So, although it is not necessary, obtaining a post-secondary education can help you stand out from other job applicants and lead you to a fulfilling job that involves helping animals who need it the most.

Animal Groomer When it comes to animal care jobs, grooming is an important one. Although some animals like cats and horses require grooming, the field is most commonly associated with dogs. After all, it is a lot easier for people to take their dogs to professional groomers than to wrestle with their dogs in order to cut their nails or give them baths. To become a professional groomer, it is ideal if you get some training related to animal care or grooming. You need to have a calm demeanor and be confident in your abilities to handle dogs and other animals of all sizes and temperaments. Not all animals like having their nails trimmed or hair washed and cut, and you need to be able to safely complete those tasks without hurting a pet. That is why most groomers will require you to work in an assisting capacity and gain experience prior to allowing you to groom on your own. But there are actually two different kinds of animal photographers. The first are wildlife

photographers who photograph wild animals in their natural habitats. Some photographers take pictures of whatever wildlife they happen to come across, while others focus on photographing only specific kinds of animals. Either way, you can expect to travel extensively and spend a lot of time outdoors—sometimes in extreme terrain or conditions—in order to get the best pictures of your subjects. The other kinds of animal photographers are pet photographers. They usually work on a freelance basis and often take photos on the side. Or they may be professional photographers who offer all types of services. Either way, they are providing a valued service since a growing number of pet owners want professional photos that capture their beloved pets. Whether you want to work in wildlife or pet photography, it would be a good idea to obtain some professional photography training. By enhancing your skills, you can learn how to take better-quality pictures. And that could be beneficial since the best photographers are typically in the highest demand and earn the most money. Pet Detective This may bring you visions of a slapstick comedy from , but pet detective work is actually one of the jobs with animals that pay well. Although having private investigator training and experience can be quite helpful when getting started in the field, there are other important factors to consider. You should have solid experience with tracking animals, not just humans. And the most successful pet detectives have well-trained tracking dogs that assist them with locating lost animals. Some people find that working in animal control prior to becoming pet detectives is really helpful. You may even consider gaining experience by working on a volunteer basis or assisting other pet detectives in your area. K9 Police Officer K9 police officers get to enjoy careers with dogs that are meaningful, fulfilling, and serve the greater good of society.
