The scene at Sinai Exodus There the clouds and lightnings were not so much tokens of coming judgment as the symbols of that righteous power which can show itself in judgment. The Spirit of God in His manifold powers is thus described under emblems of fire. Not merely as a fire of judgment. The baptism of the Holy Spirit is a baptism of fire Matthew 3: The flaming presence purges the spirit from sin. The Holy Spirit consumes evil. May there not be allusion to the covenant with Abraham, which was ratified by fire? Lamps, or torches, of fire lampades puros, LXX. If this be correct, the vision of this chapter reminds us that God is ever mindful of His covenant. The rainbow, the token of the covenant with Noah; the flaming torches, tokens of the covenant with Abraham; and the thunderings and lightnings, the tokens of the covenant at Sinai, are ever with Him. Comp, also Ezekiel 1: Pulpit Commentary Verse 5. The present tense see on ver. The whole symbolical of the power and majesty of God, as of old he manifested his presence on Sinai. And there were seven lamps of fire burning before the throne, which are the seven Spirits of God. The Holy Spirit, represented in his sevenfold operation, by lamps, which illumine. The same idea is expressed under another figure in Revelation 5: Matthew Henry Commentary 4: The apostle saw a throne set in heaven, an emblem of the universal dominion of Jehovah. He saw a glorious One upon the throne, not described by human features, so as to be represented by a likeness or image, but only by his surpassing brightness. The rainbow is a fit emblem of that covenant of promise which God has made with Christ, as the Head of the church, and with all his people in him. The prevailing colour was a pleasant green, showing the reviving and refreshing nature of the new covenant. Four-and-twenty seats around the throne, were filled with four-and-twenty elders, representing, probably, the whole church of God. Their sitting denotes honour, rest, and satisfaction; their sitting about the throne signifies nearness to God, the sight and enjoyment they have of him. They were clothed in white raiment; the imputed righteousness of the saints and their holiness: Lightnings and voices came from the throne; the awful declarations God makes to his church, of his sovereign will and pleasure. Seven lamps of fire were burning before the throne; the gifts, graces, and operations of the Spirit of God in the churches of Christ, dispensed according to the will and pleasure of Him who sits upon the throne. In the gospel church, the laver for purification is the blood of the Lord Jesus Christ, which cleanses from all sin. In this all must be washed, to be admitted into the gracious presence of God on earth, and his glorious presence in heaven. The apostle saw four living creatures, between the throne and the circle of the elders, standing between God and the people. These seem to signify the true ministers of the gospel, because of their place between God and the people. This also is shown by the description given, denoting wisdom, courage, diligence, and discretion, and the affections by which they mount up toward heaven.

Nevertheless, traditional business models are no longer sustainable and high-quality publications, like ours, are being forced to look for new ways to keep going. Unlike many other news organizations, we have not put up a paywall. We want to keep our journalism open and accessible and be able to keep providing you with news and analyses from the frontlines of Israel, the Middle East and the Jewish World. As one of our loyal readers, we ask you to be our partner. The report identified two unusual flights on the Damascus-Beirut route that had been carried out by a fake Iranian airline flying on behalf of the Quds Force. The US channel further provided locations and timetables of the suspicious flights. So far, the Lebanese directorate of civil aviation confirmed the existence of these flights, but denied the claim that they were used to transport munitions. In the last week of September, during his speech to the UN General Assembly, Israeli Prime Minister Benjamin Netanyahu claimed that Israel had accumulated evidence showing that Iran is helping Hezbollah develop accurate missiles pointed at Israeli towns and cities. Yet we now know that Hezbollah spent years building up an arsenal akin to that of a conventional army. It violated the sovereignty of Lebanon, and continues to do so to this very day. The Beirut-Rafic Hariri International Airport has been particularly important to Hezbollah in recent years, as the smuggling of weapons into Lebanon grew more difficult. Israeli air raids have de facto stopped the transfer of munitions from Syria into Lebanon. With both the land and sea paths blocked, Hezbollah has been ramping up its smuggling operations via the air. It is a reflection of Lebanese society: Yet our exaggerated focus on allowing free speech blinded us from noticing the new ideas that we allowed to propagate: Allowing these kinds of ideologies â€" the same ones that gave rise to organizations like Islamic State â€" to spread throughout our societies proved to be more dangerous than limiting freedom of speech. We must therefore remember that freedom of expression involves more than just providing everyone with a platform to voice his or her agenda. Sometimes, the prisoner proves to be crueler than the prison guard. The talk of democratization that has swept the Arab world is overwhelmingly dangerous unless it is accompanied by a profound discussion about the responsibility of our governments to simultaneously protect our other rights. This kind of discussion has been absent from the minds of Arab leaders. Without talking about the limits of democracy we are paving our way towards disaster. Allowing the ignorant voices within our societies come to the fore under the guise of democracy will make us crave our long-forgotten days of tyranny and oppression. In fact, if we are to believe the statements made by Russian Defense Minister Sergey Shoygu, this move is just the first of several punitive measures carried out by Russia against Israel. Shoygu also spoke about providing the Syrian Air Defense with electronic warfare systems that would hinder the Israeli ability to operate freely in Syrian airspace. In the past two years, Israeli air strikes have destroyed nearly Iranian sites and facilities in Syria and have prevented the transfer of weapons to Lebanon. Tel Aviv has done so while losing only one fighter jet. This has been made possible thanks to a close coordination mechanism between Israel and Russia. The recent shooting down of a Russian airplane with its 15 crew members on board will undoubtedly burden Israeli-Russian relations. Yet it is still too soon to jump to conclusions. The Russians view themselves as the ultimate patrons of Syria. Similarly, while Moscow is busy punishing Israel, it is quietly expelling Iranian forces away from Syria at the very request of Tel Aviv. Putin tends to keep his cards close to his chest; rarely does he reveal his true intentions to the public. There are those who gloat and celebrate the end of the Israeli-Russian love affair. I would advise them to be a little more prudent and wait to see what tomorrow brings. There is more in these relations than meets the eye. It will feel, sound and look just as if the Star of the East were there herself. Putting aside the technological aspect of this show which is impressive in and of itself , this concert is remarkable for yet another reason: As an Egyptian, this provides me with a deep feeling of pride that words simply cannot express. During our darkest and most difficult days, Umm Kulthum organized concerts around the Arab world to raise funds for our country. She supported the Egyptian Army. She held campaigns for Egyptian children. Most importantly, she was loved and admired by

fans throughout the Arab world, who listened to her voice and felt that they were part of something bigger than themselves. Today, in , this sense of unity seems long gone. There is not a single star, let alone a leader, who can unite the Arab world. Umm Kulthum had that power. She was a singer, but also a political symbol. Everything she stood for and represented is so painfully absent from our lives today. Therefore, this concert is an important reminder; it is a message of hope for a better future for the Middle East, in which we, as Arabs, can see beyond our differences, overcome political divisions, and take pride in our shared cultural heritage.

How to install older plugins or app modules the old manual way prior to They will pretty much go to the same areas, except that they will go into different folders within the user configuration directory. For example, the new ocr plugin will have to be pasted within the global plugin directory user config Arrow down to reload plugins and press enter. This should reload your new plugin so it is ready to be used. Looking for additional information about plugins or app modules etcetera In some cases when you install plugins into NVDA and check out the about section about the plugin, it may not have all of the instructions there on how to use the plugin. In most cases, the instructions will be there, but if not, please see the sections on how to install plugins the old manual way, so that you can have a look inside the plugin folder for more instructions. For example the bookmark and search plugin. You may need to look for a readme file to give you more information. Although most people will be using the new add-on manager, you may still need to refer back to the old manual way to find the extra information about that particular plugin or app module etcetera. Introduction to creating global plugins, app modules and scripting in general If you would like an overview and some examples on the basics of making a plugin - or app module - for the NVDA screen reader, please visit http: It is for scripting plugins for the NVDA screen reader. Here you may be able to find notes and resources on scripting plugins for the NVDA screen reader. The website can be found at http: Next, arrow down to the tools menu; then arrow down to manage add-ons, and press enter. The next screen that will come up will be the add-ons manager. Tab around to the install button, then press enter. Once you have located the add-on, press enter again. A message will come up asking you if you want to install the add-on. Just click on yes and the add-on will be installed. This will put the add-on into the correct location depending on what type of add-on it is. For example, if it is a plugin it will go to the plugin directory and so on. Tab around to close. It will ask you to restart NVDA. Restart, and the add-on should be installed. To find out about an add-on or to check to see if one was installed correctly, press the Insert key and the letter N to bring up the preferences menu. The first screen that NVDA will default to, will be the installed add-ons list. Here, you can arrow up and down to see what add-ons are available if any. If there are no add-ons available, there will be nothing showing in the list. The next time you tab, it will land on the about add-on button. Here once you press enter you will be able to see the name of the add-on, the author, version number, and any other additional information about it for example what keys to use to perform a particular task. There will be three buttons after this box. Tab to the close button. NVDA must be restarted for add-ons to take effect, for both the install process and the removal of add-ons. To remove an add-on, press the Insert key and the letter N to bring up the preferences menu. Arrow down to tools, a sub menu will come up , then arrow down to manage add-ons, and press enter. The add-on manager will come up with a list of installed add-ons. Locate the one you want to remove, then tab around to the remove button, and press enter to remove it. You will be asked if you want to remove it; just click on yes. Once done, tab around to the close button, and it will ask you to restart NVDA. Restart, and the add-on should be removed. If you check back in the add-ons manager list now, you will notice that it has been removed. Follow the prompts on-screen. This will make it a lot simpler to install the new repackaged add-ons that NVDA can use. This will replace the older way of installing the same add-ons which was done manually. The new add-on site can be found at http: Visually, you will not see this happen, but it will ask you if you wish to install the add-on. Say yes to this.
