Her father, Tom, had been a poet, teacher, and calligrapher in his native country. He smuggled himself to New York City from Cuba and was deported from Ellis Island until his third attempt to enter the United States, which was successful. Unable to find work in his new country as a scholar, he took a job in a laundry and then sent for his wife, Ying Lan, in Kingston credits her mother for bestowing her with a gift for storytelling. From her mother, Kingston heard tales about life in China, such as women going to the market to buy girl slaves, as well as myths and legends. Such stories would be incorporated into *The Woman Warrior*, her debut work. Kingston was educated at the University of California-Berkeley where she had received a scholarship for engineering. Later, she switched her major to English. While at Berkeley, she became involved in the Free Speech Movement, which first developed at Berkeley before spreading to other campuses. In 1968, she married Earl Kingston and the couple had one son. Kingston and her husband took teaching positions, first in Northern California, and then in Honolulu, Hawaii, where they moved in 1971. The success of her writing career led to Kingston being named Distinguished Professor of English at her alma mater, Berkeley, in 1991. Kingston continues to publish and leads writing retreats for war veterans and widows whose work she helps to publish. World War II had recently ended and the Japanese internment camps in her state were closed. A physical war had given way to an ideological one—the Cold War. Kingston claimed that her decision to study engineering at Berkeley had not so much been about interest in the subject as it was about the fact that ambitious students like her were often drawn toward studying the sciences to meet the demands of the burgeoning technological age. In the same decade, Japan expanded their imperial power into China after the seizure of Manchuria in 1931. Kingston notes that her mother had been a refugee in China, living in the mountains with other refugees, then left China in the winter of 1945, several months after the outbreak of World War II in Europe, to immigrate to New York, arriving in January 1946. Other Books Related to *The Woman Warrior* The political consciousness movements of the 1960s and 1970s not only led to challenges to political authority, but also inspired challenges to narrative authority. To read this review in its entirety, visit [Create With Joy](#). I received a copy of this book from the publisher for review purposes. The opinions expressed in this review are entirely my own. There are 11 chapters in this book and a study guide at the end. I liked the study guide because at the end of each chapter, you can refer to the questions in the back, so it can be used as a personal journal or group study. There are typically questions per chapter you can answer. The author uses scriptures and personal experiences throughout the book which I really enjoyed. I did find I found this book inspiring as the author describes the definition of being a warrior and a soldier in life. I did find it a little odd and annoying that the book was written in multiple sentences without a lot of spacing, and not in paragraph form. Whether you are discouraged or going through personal life battles; hopefully you will find this book helpful and inspiring to become a warrior and fight! God has made us in his own image and perfectly and He wants us to find joy in the journey! I was given a complimentary copy of this book from Revell Books, a division of Baker Publishing Group, in exchange for an honest review on my blog and social media—all opinions are my own. Jul 22, Michele Morin rated it really liked it Open the cover to Warrior Chicks, and it is immediately apparent that this is not like every other book that you have encountered on the subject of following God through hard circumstances. Holly Wagner writes in consecutive and vivid word pictures, and although I have never met her, I can predict that this is also how she would speak if we were face to face over a cup of tea. A ministry wife and mother, Holly received a cancer diagnosis that changed her life, for in the midst of her fight for survival, she discovered a grit and tenacity that applies to more than just the life and death struggle against disease. Truly, we are all in a daily struggle to be a winner — not a whiner; to rise and shine, when the natural reaction would be to fall and fade; to focus on the goal of healthy living, inside and out; to successfully pass the baton of faith on to the next generation — to the next person God brings across our path. This warrior mindset is only possible in Christ, and only with the conscious, stamped-on-your-eyeballs-awareness that the Christian life is one of war-time camaraderie with a living body of fellow believers who are also fellow warriors. We prepare ourselves for battle — not with the pumps and pantyhose of weak theology and silly-girl excuses, but with the armor of God which rivets our thinking to truth, protects our hearts from distractions, shields our souls from faithless fear, and encases us in a righteousness that transcends our own. Our Commanding Officer reveals His plans in His own good time, and then provides faith to carry them out. What do I need to learn? Who can I help? How can I help them? Rich in scriptural exhortation and biblical stories that put flesh on the bones of her argument, Holly Wagner has thrown down the challenge: Lie down and give in or stand up and fight as the overcomer that God enables you to be. This book was provided by Revell, a division of Baker Publishing Group, in exchange for my review.

At the beginning of the book, the boy is talking to a woman, who tells him the story of an island with a temple. The temple has many bells, and she tells him it is worth his while to go to the edge of the village and listen for them. He does as the mysterious woman tells him to do but does not hear a thing. He asks a fisherman in the village about the island, and he tells the boy there had been a temple on the island, but an earthquake made the building collapse. The boy becomes obsessed with hearing the bells and loses interest in school, his friends, and family. People tease him for wanting so desperately to hear the bells, yet he never gives up faith that he will hear them one day. Six months after having talked to the mysterious woman, the boy was still waiting to hear the bells. Fishermen passed by, insisting they had heard them, hoping it would give him a bit of a reprieve. Then one day, a fisherman tells him perhaps it is only fishermen who can hear the bells, and with that, the boy decides he will study to become a fisherman so that one day he can hear the bells. He looks around and at the ocean, more calm and relieved that he can return to play with his friends. He knew he had not wasted time, and that one day he would be able to hear the bells when he was grown and would become a fisherman. He could hear the sea again, the seagulls, and the wind that rustled through the palm trees. It had been more than six months since he had heard these sounds because he was so obsessed with listening for the bells. When finally he heard the voices of his dear friends, he also heard the first bell ring, then another, until all the bells were ringing in the drowned temple. He did not have to grow up to hear the bells after all. Years later, he went back home to that same beach. He was no longer obsessed with the bells and thinks perhaps it was his imagination that he had heard the bells. Still, he decided to try to listen for them among the cry of the seagulls, just to see if he could. To his surprise, he saw the mysterious woman from his childhood. She has not changed or aged a bit. He asks her what she is doing at the beach. She hands him a blue notebook and tells him to write about being a Warrior of the Light. These are the pages that he has written.
