

1: White House to Mount Vernon - 7 ways to travel via subway, and bus, and taxi

The cornerstones used for both the Ford Orientation center and the Donald W. Reynolds Museum and Education Center were created from stone given to Mount Vernon by the White House. They bear coloration that is distinctive to the quarry which provided stone for the construction of the president's.

Visitors recorded varying impressions of slave life at Mount Vernon: Washington urged one of his estate managers persistently to keep an year-old slave named Gunner hard at work to "continue throwing up brick earth". When the Potomac River froze over for five weeks in , and with nine inches of snow on the ground, Washington kept them at exhausting outdoor labor, such as sending the female slaves to dig up tree stumps from a frozen swamp. After his own heading out during this unusually frigid weather to inspect his farms, Washington wrote in his diary that, "finding the cold disagreeable I returned". Before the American Revolution, Washington expressed no moral reservations about slavery, but by he had stopped selling slaves because he did not want to break up their families. According to Wiencek, his thoughts on slavery may have also been influenced by the rhetoric of the American Revolution, the example of the thousands of blacks who enlisted in the army to fight for independence, the anti-slavery sentiments of his idealistic aide John Laurens , and his knowledge of the ability of the enslaved black poet Phillis Wheatley , who in wrote a poem in his honor. When their "bondmen and women did flee", Washington and his wife appeared to consider them as "disloyal ingrates". According to one contemporary British memo, after the war, Washington demanded the return of escaped slaves "with all the grossness and ferocity of a captain of banditti". Washington opposed this measure, and tried in vain to force the British to give the Pioneers back to their former American owners. Slaveholders were allowed to free any adult slave under the age of forty-five, either by executing a deed or adding provisions to a will. By the s, it required legislative approval for each act of manumission. His wife, Martha had deemed her to be "indolent". Washington wrote, "Your treatment of Charlotte was very proper," In , he wrote to a friend that "I never mean He expressed moral support for plans by his friend the Marquis de Lafayette to emancipate slaves and resettle them elsewhere, but he did not assist him in the effort. The changes from tobacco to mixed-crop production lowered the labor needs. Washington wrote, "It is demonstratively clear that on this Estate Mount Vernon I have more working Negroes by a full [half] than can be employed to any advantage in the farming system. This act limited U. At the time, these were Europeans. In later years of the nineteenth and twentieth centuries, in tests of definitions by Asians seeking citizenship, those persons considered white were classified as Caucasian according to the terms of the time. This act, which implemented the Fugitive Slave Clause in the United States Constitution, gave slaveholders the right to capture fugitive slaves in any U. The act was passed to allow the recapture of fugitive slaves who escaped into any "safe harbors" or slave sanctuaries. The monetary relief and weapons counted as a repayment for loans granted by France to the Americans during the Revolutionary War. In , Pennsylvania began to abolish slavery through a program of gradual emancipation. Slaveholders were still allowed to bring slaves into the state, but if they became residents, the slaves would become free. Two of his slaves escaped in Philadelphia. When one woman, Ona Judge also known as Oney Judge , made it to freedom in New Hampshire, Washington engaged in a three-year-long effort to recapture her. In , Washington is reported to have told a British guest: In addition, a public archeology project was undertaken on the site in , and a commemorative exhibit has been constructed at the site. Freedom and Slavery in the Making of a New Nation opened in

2: Taxi fare from White House to Mount Vernon in Washington, DC, costs around \$

On April 30, , George Washington, standing on the balcony of Federal Hall on Wall Street in New York, took his oath of office as the first President of the United States. On April 30,

When George Washington inherited the property, he retained the name. As completed and seen today, the house is in a loose Palladian style. The principal block, dating from about , was a one story house with a garret. There were also one-story extension added to the north and south ends of the house, these would be torn down during the next building phase. A two-storied wing was added to the south side. Two years later a large two-story room was added to the north side. These secondary wings, which house the servants hall on the northern side and the kitchen on the southern side, are connected to the corps de logis by symmetrical, quadrant colonnades , built in . The corps de logis and secondary wings have hipped roofs with dormers. In addition to its second story, the importance of the corps de logis is further emphasized by two large chimneys piercing the roof, and by a cupola surmounting the center of the house; this octagonal focal point has a short spire topped by a gilded dove of peace. Instead they range from severe Palladianism to a finer and later neoclassicism in the style of Robert Adam. In the West Parlour and Small Dining rooms there are doorcases complete with ionic columns and full pediments, whereas in the hall and passageways the doors are given broken pediments supported only by an architrave. It is a simply furnished room Washington used as a combined bathroom, dressing room and office; the room was so private that few contemporary descriptions exist. Its walls are lined with naturally grained paneling and matching bookcases. When it was donated to Washington by the English merchant Samuel Vaughan , Washington was initially reluctant to accept the gift, stating that it was: Throughout, George Washington and his family are evident through portraits and former possessions, expressing the preservation of the mansion as a personal memorial to the Washingtons as well as a nationally important museum. Lee , which were planted in by George Washington and now crowd the entry path. A carriage road skirts a grassy bowling green to approach the mansion entrance. To each side of the green is a garden, contained by a red brick wall. The upper garden, located to the north, is bordered by the greenhouse. A paddock and stable are on the southern border of the garden; east of them, a little down the hillside, is the icehouse. The original tomb is located along the river. The newer tomb in which the bodies of George and Martha Washington have rested since is south of the fruit garden; the slave burial ground is nearby, a little farther down the hillside. The site is open for scholarship by appointment only. History[edit] John Washington 1777 [edit] In , John Washington the great-grandfather of President Washington and his friend Nicholas Spencer came into possession of the land from which Mount Vernon plantation would be carved, originally known by its Indian name of Epswasson. George Washington 17 [edit] Mount Vernon with the Washington family on the terrace Benjamin Henry Latrobe Lawrence died in July , and his will stipulated that his widow should own a life estate in Mount Vernon, the remainder interest falling to his half-brother George; George Washington was already living at Mount Vernon and probably managing the plantation. Upon the death of Anne Fairfax in , he succeeded to the remainder interest and became sole owner of the property. Washington had rooms added to the north and south ends, unifying the whole with the addition of the cupola and two-story piazza overlooking the Potomac River. The final expansion increased the mansion to 21 rooms and an area of 11, square feet. A friend of George Washington, to whom he leased his home, Ariss was the great-grandson of Col. Nicholas Spencer, the original patentee of Mount Vernon with the Washingtons. Most architectural historians believe that the design of Mount Vernon is solely attributable to Washington alone and that the involvement of any other architects is based on conjecture. He took a scientific approach to farming and kept extensive and meticulous records of both labor and results. In a letter dated 20 September , Washington writes about receiving poor returns for his tobacco production: Can it be otherwise than a little mortifying then to find, that we, who raise none but Sweetscented Tobacco, and endeavour I may venture to add, to be careful in the management of it, however we fail in the execution, and who by a close and fixed corrispondance with you, contribute so largely to the dispatch of your Ships in this Country shoud [sic] meet with such unprofitable returns? In order thereto you woud do me a singular favour in advising of the

general price one might expect for good Hemp in your Port watered and prepared according to Act of Parliament, with an estimate of the freight, and all other Incident charges pr. Tonn that I may form some Idea of the profits resulting from the growth. I should be very glad to know at the sametime how rough and undressd Flax has generally, and may probably sell; for this year I have made an Essay in both, and altho I suffer pretty considerably by the attempt, owing principally to the severity of the Drouth [sic], and my inexperience in the management I am not altogether discouraged from a further prosecution of the Scheme provided I find the Sales with you are not clogd with too much difficulty and expence. Map of the estate, drawn by Washington The tobacco market had declined and many planters in northern Virginia converted to mixed crops. Like them, by Washington had ceased growing tobacco at Mount Vernon and replaced the crop with wheat, corn, and other grains. Besides hemp and flax, he experimented with 60 other crops including cotton and silk. He built and operated a small fishing fleet, permitting Mount Vernon to export fish. Washington also practiced the selective breeding of sheep in an effort to produce better quality wool. The new crops were less labor-intensive than tobacco; hence, the estate had a surplus of slaves. But Washington refused to break up families for sale. Washington began to hire skilled indentured servants from Europe to train the redundant slaves for service on and off the estate. It is estimated that during his two terms as President of the United States " , Washington spent a total of days in residence at Mount Vernon. After his presidency, Washington tended to repairs to the buildings, socializing, and further gardening. Of the slaves at Mount Vernon in , a little less than half, individuals, belonged to George Washington and were set free under the terms of his will. Neither George nor Martha Washington could free these slaves by law. Upon her death, they reverted to the Custis estate and were divided among her grandchildren. By , slaves at Mount Vernon were part of this dower property. Children without parents, or those whose families were too poor or indifferent to see to their education, were to be bound out or apprenticed to masters and mistresses who would teach them reading, writing, and a useful trade, until they were ultimately freed at the age of twenty-five. The slaves finally received their freedom on 1 January He ate his supper later that evening without changing from his wet clothes. The following day, he awoke with a severe sore throat either quinsy or acute epiglottitis and became increasingly hoarse as the day progressed. All the available medical treatments failed to improve his condition, and he died at Mount Vernon at around 10pm on Saturday, 14 December , aged On 18 December , a funeral was held at Mount Vernon, where his body was interred. Southerners who wanted his body to remain at Mount Vernon defeated the measure. This was not executed until , the centennial of his birth. The need for a new tomb was confirmed when an unsuccessful attempt was made to steal his skull See: Southern opposition was intense, exacerbated by an ever-growing rift between North and South. Remove the remains of our venerated Washington from their association with the remains of his consort and his ancestors from Mount Vernon and from his native State, deposit them in this capitol, and then let a severance of the Union occur and behold the remains of Washington on a shore foreign to his native soil. The largest part of his estate, which included both his papers and Mount Vernon, passed to his nephew, Bushrod Washington an Associate Justice of the Supreme Court of the United States. He sold some of his own slaves to gain working capital. After he died in , his wife, Jane Charlotte inherited the estate, but her son began managing it. As his funds dwindled and the wear and tear of hundreds of visitors began to take its toll, Washington could do little to maintain the mansion and its surroundings. Troops from both the Union and the Confederacy toured the building. The two women caretakers asked that the soldiers leave their arms behind and either change to civilian clothes or at least cover their uniforms. They usually did as asked. Using that knowledge, Dodge oversaw the restoration of the site and put in place a number of improvements Washington had planned but never implemented. He oversaw restoration of the house and planted greenery consistent with what was used in the 18th century. In , a campaign he organized was successful in preserving as parkland areas in Maryland across the Potomac River from Mount Vernon, as part of an effort to retain the bucolic vista from the house. Frank Coleman, spokesman for the Distilled Spirits Council that funded the reconstruction, said the distillery "will become the equivalent of a national distillery museum" and serve as a gateway to the American Whiskey Trail. Its income is derived from charitable donations and the sales of tickets, produce and goods to visitors. The Liberty Issue was originally planned to honor six presidents, six famous Americans, and six historic national shrines.

Development and improvement of the estate is an ongoing concern. Vernon was put on the tentative list for World Heritage Site status in the early s. It was submitted but failed to get approved.

Mount Vernon Mount Vernon was the plantation house of George Washington, the first President of the United States, and his wife, Martha Dandridge Custis Washington.

She was the oldest daughter of John Dandridge "Jacky", a Virginia planter and immigrant from England, by his wife Frances Jones, who was of American birth and English, Welsh, and French descent. They had four children together: Daniel, Frances, John, and Martha. In all, she was left in custody of some 17, acres of land and slaves, apart from other investments and cash. During March he visited her twice at the White House; the second time he came away with either an engagement of marriage or at least her promise to think about his proposal. At the time, she was also being courted by the planter Charles Carter, who was even wealthier than Washington. They appeared to have had a solid marriage. Her daughter, nicknamed Patsy, died as a teenager during an epileptic seizure. John Parke "Jacky" Custis returned from college[where? He died of "camp fever" probably epidemic typhus. The two older girls remained with their mother. The Washingtons also provided personal and financial support to nieces, nephews and other family members in both the Dandridge and Washington families. She helped keep up morale among the officers. But Nancy Loane, author of *Following the Drum: Before the revolution began, she had kept close to home; during it, she traveled thousands of miles to be with her husband. Martha Washington traveled ten days and hundreds of miles to join her husband in Pennsylvania. On April 6, Elizabeth Drinker and three friends arrived at Valley Forge to plead with General Washington to release their husbands from jail; the men, all Quakers, had refused to swear a loyalty oath to the United States. Because the commander was not available at first, the women visited with Mrs. Martha Washington was regarded as a matriarch in the camps she visited. Drinker said the dinner with General and Mrs. Washington and fifteen officers was "elegant" but "soon over. During these social evenings, each lady and gentleman present was "called upon in turn for a song" as they sipped tea or coffee. General Washington was said to have worn "a countenance of uncommon delight and complacency. The play was performed by the staff officers for a "very numerous and splendid audience," including many officers and several of their wives. Once he assumed office, as the First Lady a term that was later used she hosted many affairs of state at New York City and Philadelphia during their years as temporary capitals. The socializing became known as "the Republican Court". It was displayed in their home at Mount Vernon in the New Room. The remainder of the income went to a trust held for Jacky Custis until he reached maturity at age Some slaves owned by the Washingtons and the trust married each other, forming linked families. Pennsylvania passed a gradual abolition law in , under which non-residents were allowed to hold slaves in the state for up to six months; after that date, they could claim freedom. There she married and had three children. Patricia Brady, in her biography of Martha Washington, writes: Martha felt a responsibility for the unsophisticated girl under her care, especially since her mother and sister were expecting to see her back at Mount Vernon. What she could never understand was that [Oney had Ona, as she preferred to call herself, wanted to live where she pleased, do what work she pleased, and learn to read and write [Children without parents, or those whose families were too poor or indifferent to see to their education, were to be bound out to masters and mistresses who would teach them reading, writing, and a useful trade, until they were ultimately freed at the age of twenty-five. The document was lost during the American Civil War. In the state in which they were left by the General, to be free at her death, she did not feel as tho her Life was safe in their Hands, many of whom would be told that it was [in] their interest to get rid of her" She therefore was advised to set them all free at the close of the year.*
