

### 1: Weird But True Weather - Booksource

*Most weird weather books show similar phenomena -- tornadoes, hurricanes, hail. This book will blow your socks off -- such interesting weather.*

After rummaging around assorted restaurant rubbish, he dunked a tube into a smelly storage bin and, the police said, vacuumed out about gallons of grease. The man was caught before he could slip away. In his truck, the police found 2, gallons of used fryer grease, indicating that the Burger King had not been his first fast-food craving of the day. Outside Seattle, cooking oil rustling has become such a problem that the owners of the Olympia Pizza and Pasta Restaurant in Arlington, Wash. Nick Damianidis, an owner, said the barrel had been hit seven or eight times since last summer by siphoners who strike in the night. Damianidis and many other people, processed fryer oil, which is called yellow grease, is actually not trash. The grease is traded on the booming commodities market. Its value has increased in recent months to historic highs, driven by the even higher prices of gas and ethanol, making it an ever more popular form of biodiesel to fuel cars and trucks. In , yellow grease was trading for 7. Biodiesel is derived by processing vegetable oil or animal fat with alcohol. It is increasingly available around the country, but it is expensive. With the right kind of conversion kit easily found on the Internet anyone can turn discarded cooking oil into a usable engine fuel that can burn on its own, or as a cheap additive to regular diesel. Damianidis, who fries chicken wings and cheese sticks. The suspects in a growing number of grease infractions fall into a range of categories, people interviewed on the matter said, as grease theft is a crime of opportunity. He said thefts occur outside at least a couple of restaurants there each week. Griffin, whose family owns Griffin Industries, one of the largest grease collection and rendering companies in the country. The problem has gotten so bad, Mr. Griffin has hired two detectives to investigate thefts around the country. Griffin, who is based in Cold Spring, Ky. The large-scale producers of grease, restaurants mostly, own their old oil and in recent months have even made a small profit by selling it to collectors. Jaworski, a lawyer in Houston who represents accused grease thieves. Rosenzweig said he knew the man who holds the Burger King grease account, so he called him. A typical fast-food restaurant produces to pounds of grease a week. Many do not even know when a theft occurs because it usually happens overnight. Most security cameras and night watchmen are focused on cash registers, not the trash. As the price goes up, you can afford to spend a little more to protect your interest. The City of San Francisco has its own grease recycling program run through the Public Utilities Commission called SFGreasecycle, which collects discarded vegetable oil from city restaurants at no charge and recycles it into biodiesel for use in the city fleet. Healy Biodiesel, a company in Sedgwick, Kan. Ben Healy, the owner, has contracts to collect the raw grease from several franchises around town. Damianidis, who now sells his grease for a small monthly fee, finds the problem of stolen fryer oil quite annoying and distracting. And he wants to stop the thefts. He is leaning toward a security camera and hoping for the best.
