

1: Warren Woods Tower High School Craft Show

"The Warren Woods Public Schools are dedicated to maintaining continuous student achievement within a caring environment that provides for individual excellence for all" Learn More About Our District Achieved January

The text came in early on a crisp and sunny morning in April: But for me, an intermediate skier who has rarely ventured off-trail, the prospect was more terrifying than thrilling. Skiing in the trees, he told me, is all about attitude. Egan had me shift my weight quickly from one ski to the other, lifting the uphill ski for emphasis. If I move slower, I go faster. Then we headed into the woods. The Basinâ€”which has been designated critical habitat for the black bears that feed off nuts from the beech trees growing thereâ€”is open for recreational use in the winter when the bears are hibernating but closed during the seasons when the bears are waking up and actively looking for food. Ellen or back to Sugarbush. He describes how, when teaching either children or adults, instructors will help them perfect a particular skill on familiar terrain, and then will move into woods with the same pitch to work on the same skill there. Anyone who wants to practice skiing on ungroomed terrain can take a Max 4 Adventure Workshop. Skiers and riders can also hire a guide to take them into Slide Brook. Rick Hale, who is one of the instructors for the Mountaineering Blazers program, says skiing in the woodsâ€”and being in the woodsâ€”is an integral part of the adventure and the skills he tries to impart. Every weekend when the conditions are right, the Mountaineering Blazers head out with backpacks and skins for their skis so they can climb up the hills and reach areas not serviced by lifts. Meg Adams, who skied with her family at Sugarbush most weekends this past winter and took lessons with Gould, describes the evolution of her attitude about skiing in the woods, helped along by some skilled coaching. Now it looks so open and flat. Dave always asks how we are feeling, if we want to try something new, and talks a little bit about the topography and how to use it to help slow us down or speed us up. Toward the end of the winter I was in the woods in places that were really remarkable. Extensive knowledge of the mountain and its terrain is essential when skiing in the woods here. We have people who know this place like the back of their hand, and they know not just where the good stashes are but which one would suit this guest with this skill set on this day and in these conditions. For Egan and other instructors, figuring out when the woods are safe to ski is an involved process. I take hikes through my favorite areas and test snow depth. Soon these trips start producing a turn here and there and eventually a first run. But when the snow is right at Sugarbush, there are those who spend all day in and among the trees. We stopped halfway down so Egan could give me some tips. With the more challenging terrain of the woods, I was reverting to my old habit of facing a little sideways rather than down the hill. I took off down through the silent and sun-speckled woods, with no sound other than the wind rustling through the trees and the swish of my skis. Up ahead, I heard Egan whoop. Behind, at my own pace, I felt the same sense of exhilaration. There was a lot more territory for me to explore. A Blazers instructor leads his crew through Slide Brook. Katie Bacon, a writer and editor based in Boston, in the managing editor of Sugarbush Magazine.
