## 1: 2nd grade Resources | [www.enganchecubano.com](http://www.enganchecubano.com)

*What Every Parent Needs to Know about 1st, 2nd and 3rd Grades: An Essential Guide to Your Child's Education (Teaching Strategies) [Toni Bickart, Judy Jablon] on [www.enganchecubano.com](http://www.enganchecubano.com) \*FREE\* shipping on qualifying offers.*

Brought to you by Core Knowledge Core Knowledge is all about sharing the knowledge! Our curriculum including many free resources helps build strong foundations grade by grade PreK-8 , because knowledge builds on knowledge—“the more you know, the more you are able to learn. More A good teacher goes beyond teaching students how to score well on standardized tests. A good teacher also looks at the big picture of what students should learn so they can go on to be well-rounded, educated adults. Take a look at some of the key concepts your third graders should know by the end of the year about reading, writing, math, science, geography, history, art and music. To become a stronger writer, it helps to understand different types of sentences. Students should know the four main types of sentences: Have your students practice writing and then reading these out loud to one another. Get to know famous mythical characters. Did you know that the word Thursday is named after Thor, the Norse god of thunder? Another area of mythology to study with students is the planets. Many have been named after ancient gods. To bring mythology into some of your reading units, check out these free resources on Norse myths and stories from ancient Greece and Rome. Learn how prefixes work. It might seem like a fancy term for third graders, but prefixes are definitely a concept they can conquer this year. Take apart words like reuse, untie and disappear as a group to help students understand what the prefix is doing to the word. Then challenge them to find more examples! Learn how to do basic research. Third grade is an excellent year to start teaching research skills in relation to writing. Instead, focus in on a unit of study, and give them a few teacher-approved websites they can go to for their research. Have them look up facts and make some bullet points on their assigned animal before they start writing. Write a story with a beginning, middle and end. This is about the age when students really need to start pulling a story together. Overall pacing will come a little later, but they should start making sure all of their stories have a basic beginning, middle and end. Have them test their stories on each other to check for beginning, middle and end before they turn it in to you. There are many adults who still have a problem with words that sound the same but have different meanings and spellings, so help students learn the correct words early. Some of the most common homophones are: Try a Geography Challenge and turn it into a game. Detail from the World Atlas Rand Mc. Know the major rivers and why rivers are important. For instance, the Nile in Egypt and the Chang Jiang Yangtze in China are both rivers that shaped the development of civilizations in these areas. With more examples like these, you can help students understand that major cities often grow where rivers flow. To help you out, check out this curriculum on world rivers. Know who Caesar is and the importance of Ancient Rome. Julius Caesar is one of the essential leaders to learn about when it comes to Rome and world history. As students are learning about Caesar, broaden the teaching so they understand just how important Ancient Rome was to the rest of the world. Much of our laws, language and architecture have stemmed from Roman civilization, so this is a must-learn unit for this age group. Get a free Ancient Rome curriculum here. Augustus the first emperor of Rome and father of the nation Discover the Vikings. The Scandinavian Vikings are always a popular subject with third graders, and it really helps students understand exploration and the interaction of cultures. As you dive into your Viking unit, have your students do a little bit of role-play. Take on a Viking name, understand their mythical characters, and learn about Viking children and their upbringing. Download several free lesson plans here from Core Knowledge. A Viking longboat sails to new shores for trading and companionship. Learn about Native American cultures. Start by learning about different Native American cultures, people and ways of life in different regions. Help your students understand that tribes and cultures vary a great deal from one area to the next. Check out this free downloadable lesson about Native Americans: Regions and Cultures from Core Knowledge. Explore the 13 colonies. They could even write their findings in verse—“a great opportunity to combine history with a writing unit—”and a fun tie back to the popularity of

Hamilton. The difference between two-dimensional art height, width and three-dimensional art add depth is fun for students to examine in artworks and to put into practice. Learn about American Indian art. History and art are excellent examples of this. As third graders learn about Native Americans in history or geography, help them get inspired by kachina dolls, Navajo blankets and other works of art. Try this sand-painting activity from the blog Kinder Art. Keep a steady beat. In music education, kids are starting to learn more about beats and rhythms. Have them try picking out a beat in a piece of music or song and clapping or tapping their feet along with it. Encourage them to identify instruments in a song that keep the beat. Understand the different instrument families. Introduce them to the families of musical instruments: Listen to recordings and watch videos to help them become familiar with the sound of instruments in each family. MATH Read and write up to six-digit numbers. Students should be able to comprehend numbers up into the six digits. This means reading them, writing them and even rounding up and down if you give them a random number. Knowing big numbers is fun for students—it gives them such a sense of accomplishment. Make change from a dollar bill. Bust out your play money and set up a mock shopping area in the classroom. Encourage students to make change in the simplest way possible. Understand weight and volume. Hands-on activities are key to helping students understand how to weigh and measure in both metric and U. Have them record their results and learn to use common abbreviations such as g and oz. Solve problems with time and temperature. Students should be able to solve problems that ask them to add and subtract in units of time or temperature. How much time has passed since class started? How many degrees warmer is it today than yesterday? Students can graph their day, citing what they did and how the temp changed throughout the day. Begin to master multiplication. At this age, students should know their math facts factors up to 10 x They should also be able to mentally multiply by tens, hundreds and thousands. Try mixing multiplication facts in with word problems too. You can also try this Zap It! You can then look at characteristics of different groups of vertebrates: Get a free lesson on the classification of animals right here. Learn how sight and sound work. Third graders will be amazed learning about the parts of an eye like the cornea, iris and pupil and the ear including the eardrum and tiny bones like the hammer, anvil and stirrup. Download a lesson plan on Light and Sound here. Understand man-made threats to the environment. As they learn about these, be sure to explore how they can be part of the solution. Reach for the stars. The night sky fascinates kids at a young age, and by third grade they should learn to recognize several of the most familiar constellations like the Big and Little Dippers. Then try this activity from Gift of Curiosity to map them! They can also learn how to find the North Star. If you want to tie constellations to history or reading, start reading and learning about mythology too. Looking for more info on what third graders need to know? Learn more about the book here or the starter kits here. Nearly everyone in her family is a teacher. So she decided to be rebellious and write about teachers instead.

## 2: 25 Things Every 3rd Grader Needs to Know - WeAreTeachers

*Be the first to ask a question about What Every Parent Needs to Know about 1st, 2nd, and 3rd Grades Lists with This Book This book is not yet featured on Listopia.*

Samantha Cleaver on July 3, Third graders are roly-poly and rambunctious, but they are also curious elementary schoolers. Start the year with a challenge. Build teamwork at the start of the year with a challenge: Divide students into groups and give each group 56 cups. Then, challenge them to build the tallest or most stable tower. From the third grade teacher blogger Mrs. Take advantage of that with fun ideas for Back-to-School Night or parent-teacher conferences. My students loved it and did a great job following the rules with it. Third graders are not too old for morning meeting. This third grade blogger includes the class rules, a self-reflection What did you do well as a researcher yesterday? Anticipate that third graders will call out. That reminds them to raise their hand with a nonverbal warning. Plan an end-of-the-day check. Students say positive things from their day and a minus if one occurred , an interesting thing from their day, and one thing they learned. Create a warm, welcoming space for third graders. Beach chairs, pillows, and warm, natural light are some ways to create a cozy space for third graders. Add a beach pail filled with bookmarks. We like the above setup from this third grade blogger. Create a classroom carryall. This third grade blogger recommends that you stock a shower caddy with everything you need to manage behavior and small groups to save time and keep the day moving smoothly. You can check out our archive of anchor charts for inspiration here. Put brain break ideas high fives, hokey pokey, etc. Create a call -and-response routine. Read more from this 3rd grade blogger. Send home a classroom brochure. The brochure was easier to look at and it was easier to find the information. It included the behavior plan, information about lunch prices, and pickup and dismissal times. Invest time in teaching 3rd grade students procedures and jobs. It will save you time and you will be amazed at how competent third graders can be. Go for a themed classroom. I had to pull some out to use in small groups with some students who were not quite to grade level. Thought you loved a well-organized to-do list? Your third graders may just have you beat. Stock your room with clipboards and cover your walls with lists to keep your kids organized and as excited about completing each task as you are. However, my policy on them was that if I saw them playing with lead or breaking pieces, they were banned from using it for the rest of the year. I only had to ban a handful of students. If you have students who fiddle with just about anything and teaching 3rd grade, you will , keep their hands occupied with fidget toys so their brains can stay on task. They can be as simple as squishy balls from the party store and maybe, just maybe, it will keep the fidget spinners out of your classroom. Check out more fidget ideas in this roundup post. Talk about emotional bank accounts. Help third graders understand how their words and actions impact others with an ongoing discussion of emotional bank accounts. We love the anchor chart from this 3rd grade blogger. Give yourself a third grade checklist. This list of 25 concepts cuts across subjects and will prepare your students for higher elementary. Plan for lost pencils. I did this for the last 12 weeks of school and gave a prize to the kids who still had their pencils at the end of 6 weeks and 12 weeks. They all loved it! Model, model, and model some more. Third graders are increasingly developing their independence, but they still need modeling and lots of it! Plan to model, and model again during whole group, then be ready to step in with more modeling during centers or small group work. Read more at Scholastic. Third graders love to be read to. We rounded up a great list of read alouds from educators teaching 3rd grade here. You can use interactive notebooks for any subject or unit. Check out these tips for organizing interactive notebooks from another awesome 3rd grade blogger. Insist on full sentences. Third graders are still forming those academic habits, so when they ask questions, talk about their reading, or explain themselves, make them speak in complete sentences. Build an extensive library. Go to garage sales, library sales, Goodwill stores â€ lots of cheap books if you dig around. Stock your shelves with third grade faves. Here are third-grade book recommendations from our community:

## 3: 3rd grade Resources | [www.enganchecubano.com](http://www.enganchecubano.com)

*Get this from a library! What every parent needs to know about 1st, 2nd & 3rd grades: an essential guide to your child's education. [Toni S Bickart; Diane Trister Dodge; Judy R Jablon] -- Discusses how children learn and offers advice on enriching a child's school experience.*

As they continue to apply the basic skills they learned in first and second grade, they begin to do some work independently rather than with the explicit directions given in earlier grade levels. The third-grade curriculum focuses on learning about the past, present, and future. Literature, social studies and even science follow events over time, such as observing the phases of the moon or how rocks erode into sand. Their teacher will introduce many literary genres and a variety of print forms, such as newspapers, magazines, and Web sites. Third graders also learn organizational methods that help them prepare for more complex writing assignments. Math becomes much more challenging in third grade. Students work with larger whole numbers like 3, and with fractions and decimal numbers. Students are asked to do more math work on paper and in their heads, instead of with physical materials. Science investigations become much more detailed in third grade. Students explore more complex natural systems, such as relationships between the sun, Earth, and moon, weather concepts, and living systems like the food chain. Students learn about the natural environment and how groups of people have adapted to or modified the environment. Socially, third graders can better understand the consequences of their behavior. Because they are better at making friends than at keeping them, conflicts can arise so teachers may work on conflict resolution strategies with the class. How Kids Learn in Third Grade Confident Learners Third graders are generally courageous, confident, and open to new experiences at school. They work to understand the reasons things happen. Although most third graders begin to prefer some subject areas over others, they will take pleasure in mastering new skills across the curriculum. At home, however, many third graders start to strive for more independence from their parents which can make talking about school a challenge. They love to discuss the things that they learn about and the books that they read. Their organization, logical thinking and problem solving also improve this year. Group Work In third grade, friendships become extremely important, as children long to be part of a group. In fact, they may be overly sensitive and dramatic about their school friendships. Group work is also a good way for teachers to match students with different strengths and weaknesses. They may get anxious if they feel like they have failed. The increased competitive attitude in the third-grade class can magnify reading struggles and other learning difficulties, and the pressures of standardized testing can sometimes distress a child who is already unsure of her abilities. They should be ready to provide support at home when needed.
