3: When God Goes to Starbucks: A Guide to Everyday Apologetics - Paul Copan - Google Books

In When God Goes to Starbucks, renowned apologetics expert Paul Copan tackles these and other vexing questions. He offers wise and relevant answers that will not only help you clarify your own beliefs but empower you to articulate those beliefs to others.

Paul Copan is a familiar name to those formally engaged in the defense of the Christian worldview. He has authored ten books on topics related to Christian apologetics and edited eleven others. When God Goes to Starbucks is but one of a series of four books by Copan which refute relativism. Thus, When God Goes to Starbucks should not be thought of as a comprehensive philosophical and theological guide to Christian apologetics. In other words, God has gone to Starbucks, not the Areopagus. Although the book covers fourteen anti-Christian slogans or objections to the faith with apologetic implications, it does not cover all of them in great depth. In short, the book is a simple preparatory tool to answer very specific apologetic questions. Rather than turn the worldview of the coffee-shop-objector to the Christian worldview upside down, the arguments in When God Goes to Starbucks are intended to send him away from the coffee shop with as Greg Koukl might put it a stone in his shoe. Categories of Thought At least a one of the fourteen anti-Christian slogans which Copan identifies and addresses should be familiar to any Christian whose faith has ever been challenged whether internally or externally. What may not be as familiar or, more accurately, as apparent to such Christians are the categories of thought to which the slogans relate. Copan breaks When God Goes to Starbucks out into three parts that address three categories under which Copan classifies these slogans. Copan addresses the categories progressively, laying a foundation by first addressing slogans having to do with truth and reality, and building upon that foundation by next addressing categories having to do with worldviews and Christianity. Slogans Related to Truth and Reality The slogans addressed in Part I of When God Goes to Starbucks are grounded [5] in moral relativism and, to defend against them, Copan first makes a case that a moral standard is needed in order to move from is to ought. Then, Copan shows that relativistic moral standards are ultimately contradictory. Such statements are ultimately absurd; morality must be objective to be meaningful. Such questions, Copan argues, discount the relevance of motives. The concept of lying, for example, must be separated from the concept of deceiving in the same way that the concept of murder is separated from the concept of killing. Motive and permissibility must be considered in making moral judgments Part II: Slogans Related to Worldviews The slogans addressed in Part II of When God Goes to Starbucks are based in misconceptions about God, misconceptions about miracles, misunderstandings of the ramifications of religious experience, and misunderstandings about sexuality specifically homosexuality. Copan demonstrates that a right understanding of humility and praise, especially as demonstrated by the sacrificial death of Jesus, renders a correct conception of the character of God. God is not, as one slogan accuses Him of being, arrogant and egotistical. Copan demonstrates that, even in scripture, such people were skeptical of miracles. Another, yet very different, claim that does not stand is the claim that all religions are valid because people all religions experience God. In regards to the assertion that people are born gay, Copan notes that such a claim, while strong in political clout, lacks scientific evidence. Copan further points out that, even if such a claim could be proven, ones being born gay would not morally justify any homosexual acts that one commits. Naturally, where the nature of homosexuality comes up, the issue of gay marriage comes up. Copan examines the most popular arguments for gay marriage and notes that many of them are based in an idea of fairness. This raises the question, Why think humans have any rightsâ€”including a right to gay marriageâ€” at all? Moral relativism undermines any appeal to rights; if rights exist, relativism is false. Slogans Related to Christianity The slogans addressed in Part III of When God Goes to Starbucks are based in misconceptions about the imprecatory Psalms, drawing false parallels between Islam and Christianity in regards to Holy Wars, misinterpreting eschatological claims, and misconceptions about the nature of the church. Copan argues, in response the accusation that the imprecatory Psalms are vindictive and hateful, that these Psalms merely seem that way to modern, western readers. The sentiments expressed in these Psalms are consistent to those expressed similar ancient near eastern writings. Jihad is clearly a case of the latter and,

when compared side-by-side with biblical Holy Way, Jihad fares poorly. The last slogan Copan addresses is one that objects to Christianity based on the existences of doctrinal and denominational differences. The book is well-organized and makes clear, concise defenses against the anti-Christian slogans presented. Furthermore, the anti-Christian slogans identified by Copan are fairly typical of those that Christians face in every-day apologetic situations; they are relevant to contemporary Christian apologetics and evangelism. The defenses Copan presents can, in fact, be trusted to put a stone in the shoe of the coffee-shop-objector to Christianity. Unfortunately, the book can also put a stone in the shoe of the reader. Granted, such delineation does exist but, in my opinion, it does not exist to the degree to which Copan claims. I believe it is okay to bluff deceive in a game of chance, but I do not believe it is okay to lie to Nazis. I do not believe that the Psalmists were immoral in their writings, but for other reasons than those given by Copan. It may be the case that if Copan were writing a more in-depth book, he would have taken the time to flesh out the nuances of his arguments in more detail. This is not the case with *When God Goes to Starbucks*. Doing so is not in the scope of the book, and that could pose a problem for readers who stop their study at the popular level. Eventually some of the philosophers at the Areopagus are going to want their caffeine fix. For this reason, I would not recommend this book to someone with a popular-level interest in Christian apologetics. I would recommend it, however, to someone with a serious dedication to apologetic and theological study. Copan makes many able defenses for the Christian worldview and shows how to present them in an efficient and effective manner. *When God Goes to Starbucks: A Guide to Everyday Apologetics*.
