Meanwhile, Prince Kai has been sent back to Earth after being kidnapped and recruited by Cinder and is now part of the plan to overthrow Queen Levana. They are noticed by Levana and she locks down the Ports and they barely make it away, forced to leave Cress behind as she secures their getaway by hacking the security systems. She hides behind a crate and is spotted by Winter. Winter puts on a show and manages to smuggle Cress into a crate without being spotted. Winter convinces Jacin to keep Cress safe in the guard dormitories. He does his best to ignore her, but she eventually convinces him to walk through a village with her, where she receives a flower crown. When Winter refuses to marry Aimery, Levana believes she is of no more use. Cress had planned to go with Winter and Scarlet but realized she was needed to stay behind to secure the way for Scarlet and Winter. They snuck into the mining center easily and unrecognized. Wolf scents Scarlet and the group reunites. Thorne, Iko, and Wolf break into a control room, Thorne disguised as a guard. Cinder then uses the program made by Cress to hack into all the sectors to display her video proclaiming to be Princess Selene and asking for the people to become her army. When RM9 begins to take over the guards, intending to kill them, she runs out to stop them. This lets Levana find her, and she sends her guards and thaumaturges to RM9. In the confrontation, Cinder gives herself up, Wolf is taken, and Maha is murdered by Aimery for having housed them. Jacin and Cress are informed by Kinney that Jacin is in trouble for not killing Winter. He is pleased to see she can be hurt. At the wedding dinner, the entertainment is the Trial of Pearl, Adri and Cinder Pearl and Adri having been brought to Luna for "aiding" Cinder in kidnapping Kai by using their stolen tickets. She decides to keep them as pets. Cinder announces to the room, and live-feeds to Luna, that she is Princess Selene, and that Levana is a traitor to the crown for trying to murder her as a baby. Levana loses control of the guards for a second and Cinder takes control. In the battle, which is being viewed throughout Luna still, all of the thaumaturges are killed, most of the guards controlled by Cinder are slain, and the wolf soldiers have attacked anyone they could get. Cinder dives off the tower into the lake. Her systems are damaged and she almost drowns but is saved by Thorne and Jacin. Levana, in a bid to quell the uprising from the disastrous trial, announces Cinder is dead with a fake body to prove it. Cinder, Jacin, Thorne, Iko, and Cress take up refuge in an old mansion, fixing Cinder to the best of their abilities. They raid the closets for a disguise outfit for Cress and Thorne, who will sneak into the coronation. Meanwhile, Scarlet and Winter find the wolf soldiers, and they barely convince them not to eat them. However, the soldiers realize that Winter has sacrificed part of her sanity in a vow to never use Lunar manipulation again. The soldiers decide to join Winter and Scarlet and go topside to find supporters to rally. However, the petite is laced with letumosis currently the most serious and incurable plague, mutated strain from Erland, and Winter faints. After Scarlet tries to help, she gets infected too. Many soldiers are also infected just by being around them. Winter is put into a suspension tank. Wolf wakes up after being transformed into a "mostly-wolf" soldier. A thaumaturge gives him food, only to punish him as he tries to take it to teach him obedience. His memories seem to be tampered with and has vague, twisted memories of Scarlet. They become trapped in the room with all of the antidotes, and Iko gives a distraction to a thaumaturge and guards so that Jacin and Cinder can get out the vials. They transport the vials to LW, where Winter and Scarlet are. All but seven of the infected get the cure, those seven dying before they could be helped, and Jacin pulls Winter out of the suspension tank to give her hers. Cress and Thorne go to the coronation at the palace. As they attempt to sneak into the control room, they are stopped in the hallway by a Lunar woman. After the Lunar woman manipulates Thorne to kiss her and say he loves her, Cress is heartbroken. Hearing guards, they run and hide in a dark garden-like room. Cress is still upset, and admits her frustration with Thorne never seeing her as he does other girls. He proceeds to kiss her, and tells her that the girl must have glamoured herself to look like Cress, because he thought he was kissing

her. They get interrupted by guards who fail to recognize them and move on. They are spotted by guards as they hurry down a hallway, and Thorne distracts them while Cress hides in a closet. They get separated and Cress wills herself to keep going. Cress continues to the Security Center. She finds Kai in a hallway, who helps her by distracting a guard he asks to be let into a vault so she can pass. Jacin and Winter are to go in the terrain-speeder to already revolting sectors to rally. Cinder starts a revolution. She goes down to the gates to meet everyone, where Cress has successfully opened the gates. They swarm around the front of the palace. Though he fails to kill her, he slices her neck. They go down to the front gates to meet Cinder and her people. Iko shoots at the queen, who ducks and it hits Wolf. A fight ensues, and Cinder and Iko struggle Wolf attacks Iko. Cinder and Iko who is severely injured hurry into the palace in search of Levana. They find Kinney outside of the coronation room he tells Cinder to try the throne room, and Cinder sends him and Iko in to help Kai. Nobody is left in the room aside from Lunars, and they are told Kai is headed to the ports with the Earthens after forcing the Lunars to help him with his bomb threat. They go down the servant halls and find Kai, and Kinney offers to be a pilot. Winter claims Scarlet before Aimery can and forces her to stab Aimery. Jacin tackles Scarlet to make her stop once Aimery is dead. Cinder proceeds to find Levana, who has Thorne in the throne room, tied up by the balcony. Every step forward Cinder takes, Thorne is forced to take one back. She then demands Cinder relinquish all claims to the throne or she kills Thorne. When Thorne calls her bluff, Levana has him jump, with Cinder catching him at the last moment. Still being controlled by Levana, Thorne stabs Cress in the stomach. As Cinder is distracted with trying to kill Levana, Thorne stabs Cinder in the thigh apologizing to everyone the entire time. Scarlet and Wolf show up, Scarlet gets controlled by Levana and Cinder is forced to knock her out. Wolf rushes to her aid and as the only one not able to be controlled, helps Scarlet and Cress. Levana and Cinder battle it out, both turning their own guns on themselves. Levana feigns penance, then stabs Cinder in the chest, who in turn shoots her. Levana dies, while Cinder survives due to being a cyborg. Scarlet asks him to come back to the farm with her, and he accepts. She tells him he is wrong, but the village kids may be scared of him for a while. They kiss and are laying in bed when Iko barges in to say Cinder is awake. Cinder awakens, her cyborg system rebooting. Kai is there with a doctor, who is fixing her hand. Kai confirms for her that Levana is dead, then tells her how to his relief he and Levana did not consummate to make the marriage official, which means he is technically not the king of Luna. Cinder is grateful, and Kai changes the subject to tell her how Cress is stable, Scarlet has a concussion, and Thorne lost two fingers. He tells her she was out for three days. She wants to call a meeting and bring Adri and Pearl to sign the Treaty of Bremen, an alliance with Earth. She is violent in her daze, going as far to bite his shoulder. She is currently in a wakeful coma, restrained on a bed. Giving up on everything but hope, he leans forward and kisses her. Cinder has a meeting with the other rulers of Earthen continents and places her conditions for agreeing to a peace treaty with Earth. They mostly consist of cyborgs and humans being treated equally, and Thorne and the crew be the ones to deliver the cure to earth. One of the leaders, however, makes a point, wondering how they can trust that Lunars will no longer have the desire to possess humans, as this has been a problem between Earth and Luna for decades. Similarly, an Earthen could use it to immunize themselves to the Lunar gift. It had been tested and worked on both herself a Lunar and Michelle Benoit an Earthen. Cress is escorted from the clinic back to her room. He mentions how he is a candidate for a cyborg hand, and apologizes sincerely for stabbing Cress. He then asks her to join his crew, offering to travel the world with her. Wolf and Scarlet are staying on the crew until the disease is under control. She says yes, and he helps her into bed and kisses her. They admit their true feelings to each other, Thorne admitting she is the only girl that he has truly loved.

2: Winter (Audiobook) by Marissa Meyer | www.enganchecubano.com

Marissa Meyer is the USA Today- and New York Times-bestselling author of The Lunar Chronicles: Cinder, Scarlet, Cress, Winter, and Fairest: Levana's Story. She lives in Tacoma, Washington, with her husband.

Plot[edit] The story is set in a futuristic city, New Beijing, when the countries of the world have re-organized to form various new empires and alliances and the moon has been colonized. Asia is now an emperor-ruled country known as the Eastern Commonwealth. Letumosis, a fatal disease started by the Lunars and nicknamed the "Blue Fever," is raging throughout the world and the cure is unknown. The protagonist, Linh Cinder, is a cyborg who operates a mechanic stall at a local street market in New Beijing and lives under the guardianship of her cruel stepmother, Linh Adri along with her two stepsisters, Linh Pearl and Linh Peony. Early in the story, she meets Prince Kai, who asks her to fix a personal android. Cyborgs are treated as second class citizens, so Cinder hides her identity from Kai. Soon, Peony falls sick with letumosis after accompanying Cinder to a junkyard to collect spare parts for a repair. When Cinder is injected with the strain of letumosis, it is discovered that she is immune to the disease. There is pressure to create an alliance between the Earth countries and the Moon country, Luna, led by Queen Levana. The Lunars have the ability to manipulate the bioelectricity of people around them and make them see what they want them to see and even control their thoughts and actions. The proposed alliance is through Emperor Kai marrying Queen Levana, however, Emperor Kai wants to thwart this plan by finding someone else to marry first. He is also searching for information regarding the rightful Lunar heir, which was what his android was looking for before it broke. Earthens believed that somehow Princess Selene, the daughter of the late Lunar Queen Channary Blackburn, survived a nursery fire set up by Queen Levana. To bribe Kai into going through with the marriage, Levana brings one vial of the letumosis antidote, which Cinder attempts to save Peony with, but is too late. Erland reveals to Cinder that she is Lunar, resulting in her immunity to letumosis. However, Cinder displays no Lunar abilities, supposedly making her a shell, or a Lunar without any bioelectricity manipulation abilities. Erland also reveals that he is a Lunar fugitive who has been living on Earth and that the Lunars created the plague to target Earth and weaken them. He had turned against Luna after his newborn shell daughter had been taken away as per the Lunar shell infanticide laws, as shells cannot be controlled by the Lunar abilities and pose a threat to Levana. Through the Lunar chip, which is revealed to be used for direct communication outside the network, Cinder is contacted by a Lunar girl who warns that Levana intends to marry Kai and kill him after she becomes empress. The story culminates with an annual ball, where secrets are discovered and characters have to make a decision on their future. Kai has no choice but to arrest Cinder in the New Beijing Prison and agree to hand her over to Levana to save the Earth from Lunar attack. The badly injured baby Selene was taken to Earth in secret, where she was saved by going through the cybernetic operation. Erland tells Cinder that he has disabled it. Cinder now knows that she is the true queen of Luna, and she must rise up against Levana and take back the throne. Characters[edit] Linh Cinder: A year-old Lunar female, cyborg mechanic, and the main protagonist of The Lunar Chronicles. She is revealed to be Princess Selene Blackburn, the true heir to the Lunar throne. She is based on Cinderella. Crown Prince of Eastern Commonwealth. He meets Cinder when taking his personal android to be repaired and develops feelings for her, however, he must deal with the possibility of being forced to marry Queen Levana of Luna or face war against the Lunars. A Lunar fugitive, who works in the palace as a Letumosis disease researcher, who tells Cinder about her true identity. Daughter of Adri and Garan and older sister of Peony. She regularly degrades and picks on Cinder, her stepsister. She regularly mistreats Cinder and blames her for all the hardships in her life. She is forcibly dismantled by Adri after Cinder is arrested, but luckily her chip survives and Cinder vows to give her a new life. The cruel queen of Luna, the moon colony, and the main antagonist of the story. Not above using terrorist and genocidal tactics to obtain power, she is partially responsible for the existence of the plague on Earth since many of her subjects fled there to escape her influence. She uses a powerful glamour to force people to do her bidding. Royal advisor of Prince Kai Emperor Rikan: She disliked Cinder intensely due to her being a cyborg. Reception[edit] Critical reception to Cinder has been mostly positive, [4] with the Los Angeles Times calling

the book "refreshing" and praising the character of Cinder. Apparently, the first version of Cinderella was written in China in the 9th century this justifies the fact that Cinderella was the only one able to wear the lost shoe: For this reason, Marissa Meyer decided to set her futuristic version in New Beijing, in order to "close the circle" and re-take the story to its original place. In addition to that, the decision to make Cinder a cyborg started from a hilarious thought: Sequels and adaptations[edit] There are four books, a prequel novel, and a collection of novellas in The Lunar Chronicles. Meyer has also released three free short stories via the website Wattpad. The author states the studio is currently searching for a director. Library of Congress lccn.

He is charged with betraying the crown. Jacin claims that he did commit every alleged crime, but that he is not a traitor. He did everything in order to gather intelligence about Cinder and the Rampion crew and report it back to his queen. Liam Kinney, a royal guard, also comes forth with the evidence of a comm that Jacin supposedly sent to Sybil Mira before the ambush on the rooftop in Cress. Jacin is sentenced to thirty self-inflicted lashes and forty hours of penance. That night, Winter pretends to have a hallucination of mutant wolf soldiers in her bedroom. The guards come in, and she sneaks out to visit Jacin and they talk. While Winter and Jacin are walking through AR-2 when some children from a flower shop give Winter a handmade crown. Levana shows him security footage from the incident in AR She tells him to kill Winter. He tells Winter to meet him in the menagerie at closing time. He gives Scarlet a device for identification and asks her if she can fly a Lunar ship, which makes her rightfully suspicious. He meets Winter and she knows that he was sent to kill her but before she dies, she confesses her love. They kiss and instead of killing Winter, he fakes her death right as Cress cuts the lights in the menagerie. He killed Ryu, the white wolf, to cover up the blood. Scarlet finds Winter and they escape to sector RM While on their way to sector RM-9, Winter suffers yet another hallucination. As Scarlet attempts to figure out where the crew might be, Winter disappears. She turns around to find Wolf grabbing Winter and asking her where she got the red hoodie. Scarlet says his name and Wolf walks on over to her and they kiss. Cinder and Throne were running behind Wolf and once they get to the mines, they see Scarlet with Wolf. Maha walks into her house and is shocked to see Princess Winter.

4: Winter (The Lunar Chronicles #4) read online free by Marissa Meyer

Summary. Winter despises her stepmother, and knows Levana won't approve of her feelings for her childhood friend-the handsome palace guard, Jacin.

Goodreads Princess Winter is admired by the Lunar people for her grace and kindness, and despite the scars that mar her face, her beauty is said to be even more breathtaking than that of her stepmother, Queen Levana. Of course, being obsessed means that I would take any opportunity available to read Winter, the conclusion of The Lunar Chronicles early, even breaking my habit of reading a series in a similar format and thus, when I was offered an early copy of the audiobook thanks Greatest Publicist Of All Time Ever I seized it. PS, if you hate capslock and excitement and fun, you should probably stop reading this review right this very second. We start out the book on Luna. Levana, of course is the worst and has Scarlet imprisoned. Winter, who has the kindest soul of all time ever, spends her time keeping Scarlet company in the zoo. Scarlet is right next door to a wolf whose genes were used to enhance the genes of WOLF aka my bae. So, yeah, Winter has also had a long time crush on her guard slash friend Jason. As for the rest of the gang, Cinder and Cress and Iko and Thorne and Wolf are all on the Rampion and trying to figure out a way to crash Luna and begin the resistance, leading an uprising against Levana. Wolf is a sad sack for a lot of the book because he misses Scarlet. I just love how this all plays out. Like, this girl is brimming with bravery and I love it. I for serious love everything about Cinder. Okay, so I know I am full of exaggerations and shouty. Another thing about Winter, her heart is so pure, I love it. Anyways, as you guys can tell, I am a total fangirl for Winter. No spoilers, but I love love love how Winter ends. It is the perfect resolution and I am just so happy and satisfied with it. I think Meyer did a great job of wrapping up all loose threads and not leaving some sort of cliffhanger or unresolved questions. Which, straight up, is something I really hate. I liked that there was such a clear ending. Seriously, Meyer could not have ended The Lunar Chronicles in a more perfect fashion. Rebecca Soler is the narrator and of course, she is new to me. Her narration made me love my favorite character of the series, Scarlet, even more. She does make Winter sound a bit like a space cadet, but given her whole non-use of glamor and how it affects her, that makes sense. The audiobook is mad long 23 hours worth, so if you are looking to rush through this book and do not care about nuance, just want to know what happens, read the physical book. If you want to immerse yourself, I highly, highly recommend you listen to the audiobook of Winter by Marissa Meyer. The very last track is an interview between the narrator and Marissa Meyer and it is so fascinating to listen to.

5: Winter Quotes by Marissa Meyer

*Somewhat to my surprise, I've only written one full-length review of a book from this series, www.enganchecubano.com of the five books, *Fairest*, is a short prequel, and I missed that one, but I've very much enjoyed the main four books (*Cinder*, *Scarlet*, *Cress*, and *Winter*).*

There are no spoilers for The Lunar Chronicles, although Winter is the fourth and last book in the series. Here is the stunning conclusion to the national bestselling Lunar Chronicles, inspired by Snow White. When Princess Winter was thirteen, the rumor around the Lunar court was that her glamour would soon be even more breathtaking than that of her stepmother, Queen Levana. In a fit of jealousy, Levana disfigured Winter. Four years later, Winter has sworn off the use of her glamour altogether. Winter despises her stepmother, but has never dreamed of standing up to her. That is, until she realizes that she may be the only one with the power to confront the queen. Fans will LOVE this amazing conclusion to the series. As consolation, we received *Fairest 3*. Now the question is, was it worth waiting so long for Winter? For one, it takes a lot of time to write pages. It also takes a very long time to edit these pages to perfection. Prior to Winter, my favourite book in the series was *Scarlet 2*, which now ranks as my third favourite book I read in Winter slightly edged it out and took second place. That shows just how much of an epic conclusion this book is to The Lunar Chronicles. Read The Lunar Chronicles! In fact, besides Winter and *Scarlet* placing in my top 3, *Cress 3* and *Fairest* both count to my top 20 reads of thus far. That says a lot for the strength of the entire series. Then I listened to the audiobook and I was sold. Every single book right up to Winter brought me so much joy. The books are innovative in their cross of science fiction and fairytale retellings. Anticipating Winter My anticipation for Winter was so huge, I refused to place an online pre-order. I knew I would read it the moment I laid my hands on it. Even though I own the ebooks of the other titles in the series, I bought a paperback edition of Winter. As soon as it was available at my local bookstore, I placed a reservation and dashed out of the house to get it. I was elated that it was stocked a few days before the official release date. Savouring Every Moment A lot of things happened in Winter to advance and tie up all the intertwining storylines. This means Winter was the fourth main character to be cast in the spotlight. Initially I was afraid that four main characters would be too many. Rare Exclamation Over Feels Me talking about all the feels rarely happens, if at all. This book gave me all the feels, you guys!!! I cared for every one of the protagonists and their deuteragonists ie. The entire gang was just splendid and the ships just made me smile. Some bloomed so beautifully and portrayed complexity of the highest order. A couple of them grew and changed so much from the previous books in the series, they brought fresh perspectives to the conclusion of The Lunar Chronicles. The bottomline of this review:
