The Environmental Politics Reader: Dryzek and David Schlosberg Debating the Earth brings together over 40 essential readings that illustrate the diversity of political responses to environmental issues. They are organized in a way that emphasizes the differences and debates across the various schools of thought on environmental affairs and there is a mixture of classic pieces and cutting-edge essays. The key debates that are covered include the severity of environmental problems, reformist responses to environmental issues, the environment and economics and green critiques. This text is aimed at undergraduate students studying environmental politics, environmental policy, environmental studies, and environmental philosophy and ethics. It will also appeal to general readers with an interest in environmental issues. Wilson- Professor of human geography, Plymouth University.
