In keeping with tradition, the event focused on thanking and recognizing donors and community partners for their impact on the college. Other highlights of the dinner event included remarks from an international student, who offered a glimpse of how the Franklin experience has transformed his life. Then, President Thomas J. The first important project is a diversity and inclusion center that will be located in what is now the Quiet Lounge on the second floor of the Napolitan Student Center. Over Winter Term, the lounge will be upgraded and rebranded. Our students have to leave Franklin ready to work in a global business environment and with people from many, many backgrounds. Students also need understanding that diverse groups make better decisions – simple truth demonstrated by social science around the matter. This is more than pretty brochures and advertising, more than better sales of what we already do. This is more than official school colors and logos; this is about shaping our product, and about telling the story of what makes Franklin, Franklin. Such enrollment will make continued support for scholarships critical. A third important project is the science center See related article on Page 6. The board of trustees in October approved moving forward with construction and redevelopment of the science center, and two anonymous trustees made significant gifts toward reinvigorating the effort. Plans are to break ground in May and launch construction no later than June. Your critical philanthropic support has made this possible. But we continue to seek additional support for the project in order to make it possible. SPARC members are working with the faculty in an attempt to identify new approaches to delivering curriculum in ways built around high-impact educational practices, including internships, undergraduate research and study-away programs. SPARC is charged with facilitating the development of a model of teaching and learning that will help strengthen the college brand that already exists around effective immersive and engaged learning. Minar thanked the Branigin Foundation for giving generously in support of engaged learning and of student opportunities in engaged learning. Franklin College is a transformational place. That is who we are, and that is the most important thing we can be, in my assessment. She then recognized some special donors for their lifetime support: New members in the Old Main Society: He also holds 21 gold medals and is the most decorated swimmer of all time in the Liberal Arts Swimming and Diving Championships; he has never lost a race. Schneider shared how his first contact at the college, swimming and diving coach Andy Hendricks, has made a lasting impact. It was his confidence, his commitment and his passion that helped me make my decision to come to Franklin College. Schneider also recognized biology professor Steve Browder, Ph. Schneider also expressed gratitude for the scholarships that have made so many of his high-impact experiences possible; they include the Hibbs Pre-Medical Endowed Scholarship, the Raymond and Catherine Cowan Endowed Scholarship and the Raymond D. It has made me who I am today. Following in the footsteps of relatives who are attending or have graduated from Franklin College is a family tradition for many students. Within a family, the custom may even span multiple generations. Your gifts are fueling an exciting time of innovation and facilitating projects that inspire us to think forward and achieve at new levels. I am thrilled that in October the board of trustees approved moving forward with the redevelopment of Barnes Hall into a science center, where students will have greater opportunities for project-based learning, cross-functional collaboration and undergraduate research. These experiences coupled with exemplary classroom instruction will help students build the skill sets employers in the life sciences and emerging industries demand. Our momentum to meet the evolving needs of students and realize the science center is strong, but your continued philanthropic support is critical to maintaining our timeline and opening the science center for classes in the fall of The science center is one way our college is striving to meet the needs and dreams of a diverse group of students who come from a variety of socioeconomic backgrounds. Faculty also recently updated the liberal arts curriculum to include material on

WORKPLACE ENRICHMENT ACTIVITIES FOR HOGGATT/SHANKS CENTURY 21? COMPUTER APPLICATIONS AND KEYBOARDING pdf

recognizing and valuing forms of diversity and approved measures to ensure every student will complete a diversity course addressing how differences and uneven distribution of power and privilege shape perspective and life 22 experiences. Additionally, we are excited about receiving donor gifts directed toward converting a space on the second floor of the Napolitan Student Center into a center for diversity and inclusion. Addressing diversity is important and challenging work, and we are making solid strides with your help. In fact, last year, 99 percent of our full-time students received some type of financial assistance. Your generosity to the Franklin Fund was the key to providing scholarships that helped make college affordable for the first-generation scholars and many others who continue to benefit tremendously from our individualized approach to education and high-impact practices such as internship assistance, studyaway placements and faculty-guided undergraduate research. We are pleased that this publication offers a glimpse of some students who are taking advantage of the opportunities your gifts provide, and we are grateful for your partnership in producing so many successful outcomes. As a Franklin College alumna and the board of trustees chair, I believe in the strength and the future of this institution, and I believe we are on our way to new levels of excellence. Here are a few reasons we donors should be proud to be engaged in higher education at Franklin College: With its average acceptance rate of only 6 percent, the entrepreneurial fellowship program recruits top college seniors from the Midwest, and we are so proud that Brody is one of them. Cardozo School of Law student, also are a reflection of the distinct way in which Franklin College helps individuals learn, grow and find their way in this world. And they all are a reflection of the value you help give to the Franklin experience. Thank you for being part of our college community, for caring about students and for enhancing their collegiate experiences. Franklin College President n Franklin College was ranked number one liberal arts college in Indiana and 44th national liberal arts college in the country by Washington Monthly. Several planning groups were charged with identifying and analyzing the challenges Franklin faces and finding opportunities to excel over the next 10 years. View the plan on the college website www. We anticipate breaking ground in May and launching construction in June , with completion planned by fall The project will help support our outstanding premedical and other science programs and greatly enhance student research and classroom experiences. Meanwhile, developmental work continues toward the creation of the Master of Physician Assistant Studies program. In addition to these institutional milestones, we have many individual accomplishments among Franklin students and alumni to celebrate; you can read about some of them in this annual report. As donors, these are the impressive accomplishments we help make possible through our shared commitment to the college. Thank you for investing in Franklin students, past and present, and for believing we can do even more together. The Investment Committee of the board directs and reviews the endowment investment policies and performance. The majority of the assets are designated to the endowment pool; others are invested individually due to donor restrictions. Twenty-one investment managers are used to invest the endowment pool. No longer is it uncommon for kids to be accomplished users of technology even before they can read. Computers are commonplace in most public education classrooms from the primary grades through high school. Various technological devices permeate the lives of college students as indispensable tools for education. Even most blue collar jobs require rudimentary computer skills at the very least. Technology of all kinds has completely saturated our culture at nearly every level. Despite recent advances in such alternative input technologies as handwriting recognition and speech recognition, the manual QWERTY keyboard remains the primary input device of the vast majority of computer systems. Given the rapid proliferation of technology as well as the ubiquitous presence of the QWERTY keyboard, educators must ask themselves what responsibilities they have in preparing students for the technological realities of the future. Since a keyboard is required to operate almost any computer, should keyboarding as a skill be taught as part of the curriculum? If it is taught, at what age is it appropriate to begin keyboarding instruction? Which methods of teaching keyboarding are most effective? This study will outline a plan to find answers to these questions. This study will be conducted at the middle school located in Sullivan, Missouri, a small town of approximately 1,000 people in the east central part of the state. For several years, middle school students have been required to complete at least one semester of a daily minute keyboarding class before leaving for high school. The instructor bases the keyboarding curriculum on the MicroType 4 software, but also utilizes a textbook titled Century 21 Jr: No Keyboard Covers of any kind are currently being used on the computer lab's 22 student workstations.

Area of Focus Statement The purpose of this study is to examine the relevance and most effective methods of keyboarding instruction for middle school students. Does keyboarding instruction help students in their general coursework as they progress through middle school? Which is more effective in developing touch-keying skills: Every subject taught at every level, including kindergarten, includes computer based lessons. Children in grade school spend an ever-increasing amount of time on computers Nicols, ; Hoggatt, Computer based learning is becoming more accepted as both a primary instructional tool and as a support for the classroom teacher. However, despite the extensive early exposure, many students are entering middle school with computer literacy but without accompanying keyboarding skills Reagan, Many studies agree that touch-typing is a key basic lifelong skill Nichols, Learning correct touch-typing technique also assists students in other subject areas such as spelling, grammar and even foreign language Haigh, It is generally accepted that keyboarding skills, touch-typing specifically, is a key requirement to learning. So the question is, what is the best way to teach young students to touch type, and eliminate the need to look at their hands? There are two readily accepted methods of touchtyping instruction: Teacher intensive meaning the teacher has developed their own instruction based on experience and research. Software tutorials in which computer programs guide students through keyboarding lessons and monitors student progress. Nichols, Some researchers state that elementary age students need a minimum of 4 to 6 weeks of minute daily instruction to achieve touch-typing mastery Sormunen, ; Nichols, However, with increasing demands on classroom instruction time, most teachers must adopt a best practices approach developed through years of experience and observation of keyboard instruction Nichols, , p. For middle school students an approach combining keyboard covers, drill and practice and typing software that incorporates typing games for motivation has delivered excellent results Reagan, In general, most studies seem to indicate that touch-typing is an essential skill that will help students in many disciplines. Description of Intervention or Innovation As mentioned above, keyboarding skills are already being taught at Sullivan Middle School in a semester long class. No intervention will be necessary to determine the benefits of keyboarding instruction on general coursework. The

WORKPLACE ENRICHMENT ACTIVITIES FOR HOGGATT/SHANKS CENTURY 21? COMPUTER APPLICATIONS AND KEYBOARDING pdf

same is true in examining how age and maturity affects keyboarding performance. In these two areas the study will primarily focus on evaluating the effectiveness of the existing system. Since no covers of any kind are currently being used on the computer workstations, covers will need to be introduced for the purpose of this study. Visual shields and skins are easily added and removed so different methods will be used for each group. Groups will consist of two classes each. One group will use visual shields, another will use keyboard skins and the third group will act as a control using no apparatus. As such, surveys and checklists will be used to provide qualitative data while typing tests and grade reports will supply quantitative data. Due to the fact that the Keyboarding instructor will be conducting the majority of this research, some bias will likely be introduced to the study. However, the wide variety of data sources as 5 Page 5 of 14 well as the concrete nature of the qualitative data should provide a broad enough picture to minimize the influence of bias. Questions will be designed to determine how these students feel their keyboarding instruction has helped them in school. Some questions will also be asked to evaluate whether these past students are still using correct keyboarding techniques. Half of the selected students will be those who have taken Keyboarding during a previous school year and half will be students who have not yet taken the course. The questions will help establish how students feel about Keyboarding class and also whether the students are using correct keyboarding technique. Half of the selected students will be those who have never had Keyboarding class. The remaining students will have had Keyboarding at some point while attending Sullivan Middle School, but not necessarily during the current school year. Using the MicroType 4 software, students will complete several lines of typing and also a full paragraph to determine their speed and 6 Page 6 of 14 accuracy. No covers of any kind will be used on the pretest. On the post-test, students will use the same innovations they studied with throughout the semester. Touch-Typing Test Research Question 4 Administered at mid-semester after-all alphabetic keys have been introduced and practiced , this test will consist of 1-minute of typing with the hands completely covered. All students will type the same sentences. The focus of this test will be on accuracy, though students are expected to get through at least one full sentence before time expires. Teacher Checklist Research Questions 2, 3, 4 The checklist is designed to help facilitate teacher observations of keyboarding technique. Each student will be observed three times: Data Analysis Plans Opinion Survey Research Question 1 - For each item on the survey, the mean score will be calculated and compared to identify in which areas students feel keyboarding has been most and least beneficial. The survey data will also be used to calculate the percentage of former students who are still using correct keyboarding techniques when typing. The students will then be grouped according to whether they have taken keyboarding and the mean semantic differential score will be calculated for each group. The group scores will be compared and analyzed. For the grade level groups, the mean score for each item on the Likert scale will be determined. Results will be used to identify general attitudes and keyboarding techniques for the grade level groups. Using the cumulative grade point averages for the current school year, the mean GPA for each group will be calculated then compared to determine which group was more academically successful. For each group, the mean speed and accuracy score will be calculated and compared. Touch-Typing Test Research Question 4 Test results will be grouped by practice method skins, shields, no apparatus. The mean accuracy score as a percentage for each group will be determined and compared to establish which practice method was most effective in increasing accuracy. Teacher Checklist Research Questions 2, 3, 4 Checklists will also be grouped by practice method skins, shields, no apparatus. The mean score for each item on the checklist will be calculated for each group. Comparing the results by group should determine which practice method produced the best technique results. At this point, it is anticipated that only the Keyboarding teacher will be involved in this action research project, not including the 8 th grade teachers who will be completing a survey. However, if the project goes well, it is possible to expand it to other campuses in the Sullivan School District, particularly the Elementary School where they also teach some keyboarding skills during computer lab time. Parent permission would not be required because all of the methods being tested are appropriate approaches being used in other school districts. The purpose of this study is to determine which method of those being used is the best for our students. Also, while grade reports will be

WORKPLACE ENRICHMENT ACTIVITIES FOR HOGGATT/SHANKS CENTURY 21? COMPUTER APPLICATIONS AND KEYBOARDING pdf

used, these records are openly available to all teachers in the building. Student names and their participation will not be made public. The project will encompass all of the school year. The data collected from keyboarding performance tests and observations would primarily be gathered during the first semester when the most Keyboarding courses are being offered. However, some of the surveys would not be given until the end of the school year and the grade reports will also be at the end of the school year. Analyzing and interpreting of data will be an ongoing process as the data becomes available. The final write-up would be completed during the summer of Recommend actions would be in place for the school year. Since the study would be mostly self-contained in the Keyboarding classroom environment, recommendations would be implemented by the Keyboarding teacher who conducted the research. The only exception would be if major changes to curriculum would be required which would necessitate greater involvement by administrative personnel. School culture should not be a factor. To monitor the effectiveness of recommended actions, quantitative data in the form of performance tests would continue to be gathered each semester. If there appears to be a reduction in effectiveness over time, the study will need to be revisited and further research will be conducted. Skills at their fingertips. The Times Educational Supplement. Does the use of keyboard covers make a difference? Increasing touch-keyboarding skills in the middle school student: Type To Learn, Hand covers vs. The effects of color-coding on keyboarding instruction of third grader students. Keys at their fingertips: A study supporting development of a resource package for the teaching of touch-keyboard skills in upper elementary classrooms equipped with portable keyboards. The purpose of this study is to examine the relevance and most effective methods of keyboarding instruction for middle school students. Research Data Source Questions Does keyboarding benefit general coursework? Which method is best in developing touchkeying? Please circle the one response that most closely reflects your opinion.

Simply contact your sales consultant or call our Customer Service Team at 11 19 These tips will help you navigate. And wherever we find them, they reflect the magic of water: A rain-colored heron rising from the creek bank. One astonishing morning, we had a visitation of frogs. It seemed to mark the dawning of some new aqueous age. On another day we met a snapping turtle in his primordial olive drab armor. Normally this is a pond-locked creature, but some murky ambition had moved him onto our gravel lane, using the rainy week as a passport from our farm to somewhere else. The little, nameless creek tumbling through our hollow holds us in thrall. Before we came to southern Appalachia, we lived for years in Arizona, where a permanent runnel of that size would merit a nature preserve. In the Grand Canyon State, every license plate reminded us that water changes the face of the land, splitting open rock desert like a peach, leaving mile-deep gashes of infinite hue. Cities there function like space stations, importing every ounce of fresh water from distant rivers or fossil aquifers. Retirees from rainier climes irrigate green lawns that impersonate the grasslands they left behind. The truth encroaches on all the fantasies, though, when desert residents wait months between rains, watching cacti tighten their belts and road-runners skirmish over precious beads from a dripping garden faucet. National Geographic Magazine, April The morality of an act is a function of the state of the system at the time it is performed. Retirees from rainier climes irrigate green lawns that impersonate the grasslands they left encroaches on all the fantasies, though, when desert residents wait months between rains, watching cacti tighten their belts and road-runners skirmish over precious beads from a dripping garden faucet. That the grasslands they left behind. That the grasslands they left encroaches on all the fantasies, though, when desert residents wait months between rains, watching cacti tighten their belts and road-runners skirmish over precious beads from a dripping garden faucet. Extensive activities within the text bring realism to the course and let users learn by doing. Students will learn the importance of planning for their financial futures, in addition to applying and reinforcing their math skills. Contemporary Economics, 3e blends economic expertise and educational insights with comprehensive content, sound instructional design, and extensive print and media teaching tools. A wealth of print, video, electronic, and online resources make it simple to address varied learning styles, use formal and informal assessment, and integrate technology where it makes sense to you. Students will learn and apply each skill as it is presented throughout the text. An all new EOC activity called digging deeper will encourage students to investigate economic topics further. Organized into class-length lessons, each chapter contains features to capture and maintain student interest, such as Consumer Alert, Vote Your Wallet, Inside the numbers, Math of Money, What in the World?

Century 21 Computer Applications & Keyboarding 7E, a revision of Century 21 Keyboarding & Information processing, reflects the changing keyboarding course. New key learning is still included, its just moved to the Resources section.

7: Full text of "Antioch News 05/05/"

Century 21 Computer Keyboarding, available in soft- or hard-cover versions, includes the 75 keyboarding and word processing lessons. Review "I really liked the content and updated material contained in the Skill Builders and I thought that they were relevant to today's students.

8: Solution Manual | We Provide Over 10, Solution Manual and Test Bank | Page 31

Computer keyboarding is emphasized as touch typing is learned and business-correct documents needed for every workplace are produced. This revised edition includes new cross-curricular activities and is written to support and align with the new-key instruction and word processing features in South-Western's MicroType keyboarding software.
