

1: Elementary School Teacher

Why Consider a Career in Education. Selecting a career path is challenging and exciting because there are so many things to consider as you prepare to work in Wisconsin's great public school system, where our high school students have placed at or near the top on the ACT for many years.

It features thousands of Career Stories covering hundreds of careers. Career Stories are real-world career descriptions and insights collected from interviews with working professionals, including hundreds of school teachers, administrators, counselors, special education teachers and other education professionals. CTI Career Search also offers comparative salary and employment data, college listings, and introductory videos for hundreds of careers. Launched in , CityTownInfo. The included interviews are those judged to be most helpful to prospective teachers. The following excerpt- Chapter 3 of the eBook -presents the summary of findings, including: I love meeting new students every year and I thrive in an atmosphere of change and flexibility. Others tried to explain this seeming contradiction. A second grade teacher from the Boston area wrote: It is an awesome responsibility working with small children who can be so easily crushed, but not necessarily so easily motivated. The sum total of their needs is a heavy burden. It is too bad it comes infrequently. Teachers like teaching but mostly when it works and when they can see it succeed, and they are just as frustrated as anyone else would be when they see their energies and talents being squandered. Certification Requirements for U. Parents made an appearance. But the real villain for many of them was the paperwork: Meetings to discuss and plan curriculum and other school related issues were another inescapable irritant and a cause of considerable grumbling, and the two were often lumped together: This will give you a real glimpse into teaching. I would also suggest sticking it out for at least four years. After your fourth year of teaching, it gets so much easier. You know how to read the students better, you have learned to tweak lessons. Pragmatic suggestions included the following: Collaborate with other teachers in the school. Learning from experienced teachers can help you tremendously. The students at this age crave structure and knowing what is next. It is also very important to tell them what you expect from them and never assume they know not to do something!

2: - Elementary School Teachers, Except Special Education

A bachelor's degree in education will prepare you for a job as an elementary or secondary school teacher. However, if, after completing your degree you decide you don't want to teach children after all.

Projected Job Growth Outlook In addition to providing basic first aid in the event of an illness or injury, school nurses educate students about health and wellness. School nurses are often involved in campaigns aimed at reducing illegal drug use and underage drinking. Because there is such a shortage of qualified substitute teachers, some schools are having a difficult time trying to arrange coverage for absent educators. A few states have such severe shortages that they are willing to accept substitute teachers who have not yet completed college. If you meet the minimum education requirements, the next step is usually a background check and fingerprinting. Once you have been cleared for jobs in education, you have to obtain a substitute teacher certification. Some school districts require that you take training courses or pass an exam, but others are willing to grant emergency certification due to a shortage of substitutes. Meet a Teaching Professional Edward Steinhauser High School Teacher Please summarize your academic and professional experience I come from a family of educators, and before I was even aware of it, education was the field I was meant to be in. I graduated from Boston College in with a BA in history and a minor in education. I have been teaching for four years and have had the privilege of working with some of the most innovative and professional educators in the country. While at OCSA, I quickly saw the importance of getting involved in order to work towards improving the academic experience of the students. What factors should students take into account when considering a degree in education? Education is much more than summer vacation. Educators have the privilege of working with the next generation of students to help them grow to be involved citizens, innovators, and compassionate human beings. If you are thinking about becoming a teacher, first ask yourself why you want to become a teacher. While the benefits are good and guaranteed breaks are nice, those things will not make the day-to-day experience enjoyable. If you are someone who wants to make a difference in the lives of others and be a positive role model in the lives of children, many of whom are looking to you for guidance, then you are on the right path. The next question to ask yourself is what you are passionate about. Whether you teach elementary or secondary school, you should enjoy the content that you are paid to teach. However, school is much more than just content acquisition. Think about what made school memorable for you. How can you promote a culture of learning and a growth mindset in your students? Take classes that inspire you and help you grow as a learner. What do you find most fulfilling about teaching? It is hard to narrow it down to just one thing, but I will provide two aspects; one professional and one personal. To see their growth over the course of the year and see them become self-directed learners is a beautiful thing. One of my main objectives as a teacher is to have my students become educated consumers of information and have the critical thinking skills and information gathering skills to be able to come to their own conclusions. As students get better at this skill, the class environment completely changes and they are flying on their own. Personally, teaching gives me the opportunity to get to know my students as human beings. The greatest challenge I have had to face as an educator is that change does not happen fast; change in the classroom, change in the school, or change in the system. What I have learned is that I need to figure out how to navigate these waters, build consensus amongst my peers, and work with my administration and district staff to help them see my perspective and remain positive. As long as we continue to do what is best for students we will always be on the right path. What type of person excels as a teacher? The world of education needs people who are passionate about working with children and helping promote future generations to be more successful than us. Despite the data, testing, standards, grades, and everything that make education very corporate, it is still a social profession where the number one responsibility you have is to be responsible for the well-being of another human being. What additional advice can you give to someone pursuing a teaching career? In many cases, I believe, those are people who did not truthfully answer why they wanted to become a teacher and what they are passionate about. The system also can be a challenge but just like we tell our students, challenges are

opportunities for growth, and successful people have failed more times than they have achieved. I welcome you to a career in education and I look forward to your success! 3: What Can You Do With A Master's in Education? | GetEducated

Kindergarten and elementary school teachers instruct young students in basic subjects, such as math and reading, in order to prepare them for future schooling. The median annual wage for elementary school teachers, except special education was \$57, in May The median annual wage for.

What is it like working as an Elementary School Teacher? Elementary School Teacher in Lodi: Elementary School Teacher in Florida: Working with children, teaching a child to read. Opening the doors in their minds to all the possibilities that come when you make good choices. Not enough paid time to plan. I work an average of 12 hours a day get paid for 7. Lack of parental involvement. Testing the stress of students not advancing because of testing. Seeing a child give up and loose self confidence in 3 rd grade because of testing. It takes the fun out of the job unless you do that. Elementary School Teacher in Chicago: Elementary School Teacher in Salem: People always think they can do better. This field is about constantly reinventing your teaching because the curriculum and expectations are always changing! Elementary School Teacher in Albany: If you want to change the lives of young children, remember that when challenges within the work place arise. Make sure you get validation, support, and acknowledgment for your efforts and hard work. Do not allow modesty to prevent you from getting your just due. Elementary School Teacher in Camp Wood: I love working with children everyday and the ability to have about two months in the summer off for my family. The pay at my job seems cut-rate. I feel that the administration is miserly considering that I teach Math and that is a high-demand area in education. I was told that I would receive an additional stipend for teaching Math and another stipend for being the Math Specialist for our campus. However, those were withheld from me because of "budget concerns.

4: Why I chose education as a career statement

Career Options with an Elementary Education Degree A variety of job opportunities are available for graduates with an elementary education degree, so never feel pigeon-holed into a specific area. Check out the list below for some ideas on how to put your degree to work after you graduate.

Bob Kizlik Men and women in college level teacher preparation programs, in addition to about a hundred other things they are required to do, almost without exception have to write a statement that describes why they want to be teachers. Some colleges call this the "why I chose teaching as a career" statement. In many colleges and schools of education, this statement is included with the application for student teaching. In my role as adviser, I have read and edited many hundreds of such statements. It is obvious that education students sometime struggle to explain themselves and their choices, and often compose awkward statements they believe are what the readers want. It can be stressful and frustrating. The statement below contains grammatically correct, substantive information that conveys, in a generic sense, what many education students try to express. If appropriate, use it for your own purposes, making the personal modifications you believe are necessary. I used the pronoun "he" in the statement only as a device. Please substitute the feminine pronoun "she" as appropriate. Notice that nowhere in the statement below does it say education was chosen as a career because of "loving kids. That is one of the most overworked, and increasingly meaningless phrases in the profession. COM Why I Chose Teaching as a Career When one makes a decision about the work he will do in life, it is important that the decision be based on criteria that reflect his personal values, temperaments, experiences, and skills. My choice of teaching as a career was not made lightly; rather, it was the culmination of a process of reflection about what I wanted to do with my life and my education. When I was a student in elementary, middle, and high school, as well as in college, I found myself paying attention to not only what was being taught, but also to how my teachers actually taught the lessons. It seemed to me then, and still does, that most of my teachers enjoyed what they were doing. Slowly at first, then more quickly, and with increasing clarity and depth, I began to visualize myself as a teacher. The great teachers I have had throughout my education are my heroes and my role models. I began to understand more fully in high school and throughout my time as a college student that great teachers had skills I wanted to learn. I wanted to excel at the things in which they excelled, but I also experienced teachers who were not effective, and they too taught me something. From them I learned what I would not do or even try when I would someday become a teacher. I fully realized that to be a teacher is truly a calling of not just the mind, but the heart as well. I saw that the great teachers were good at explaining content, were patient, yet firm with students, were always fair, set high expectations, knew how to motivate us, and used humor appropriately. They were excellent communicators who had a command of the subject-matter content they taught. I wanted to be like them, to be able to do what they could do, and yet I understood that I would have to forge my own style of teaching that would draw on my strengths, knowledge, skills, values and experiences. I have arrived at that point in my preparation, fully realizing I still have much to learn. I have chosen education as a career because I believe that education is perhaps the most important function performed in our culture, or for that matter, any culture. I believe that teachers individually and collectively can not only change the world, but improve it, and in the process find personal and professional renewal. I want to be part of this noble profession, and someday to be counted among those in whom future preservice teachers found inspiration.

5: What It's Really Like to Be an Elementary School Teacher - Teachingcom

Masters in Elementary Education: Career and Salary Facts Learn about types of graduate programs in elementary education, as well as how a graduate program could benefit you. Also, find out how you can become a licensed elementary school teacher.

Sponsor extracurricular activities, such as clubs, student organizations, and academic contests.

6: Highest Paying Jobs in Education | PayScale

If you are interested in studying educational theory, completing a bachelor's degree in elementary or secondary education gives you a solid foundation for starting your teaching career. If you have a bachelor's degree, you may even be able to apply for an emergency teaching certification if there is a shortage of teachers in your state.

A good place to start is a self-assessment focused on your interests and talents. Ask yourself these questions: Do you have a love for learning that often has you seeking more information about things? Do you enjoy working with children and young adults? Do you receive great satisfaction from helping others learn new things? Do you have good oral and written communication skills? Do you enjoy working collaboratively with others who love learning? Do you enjoy challenges and ever-changing opportunities? Do you want to change the world? If you answered yes to all or most of these questions you probably would enjoy teaching. The challenges are exciting, and the rewards are priceless. So, if you want to inspire and instruct the next generation of musicians, mathematicians, nurses, scientists, astronauts, and philosophers, choose teaching! What is good teaching? Although this was written for college teachers, his ideas apply across all teaching levels. This list first appeared in *The Teaching Professor*. Downloaded from the internet on April 15, Good teaching is as much about passion as it is about reason. Good teaching is about substance and treating students as consumers of knowledge. But knowledge is not confined to scholarly journals. Good teaching is also about bridging the gap between theory and practice. Good teaching is about listening, questioning, being responsive, and remembering that each student and class is different. Good teaching is about not always having a fixed agenda and being rigid, but being flexible, fluid, experimenting, and having the confidence to react and adjust to changing circumstances. Good teaching is about the creative balance between being an authoritarian dictator on the one hand and a pushover on the other. Good teaching is also about style. Should good teaching be entertaining? Does this mean that it lacks in substance? Effective teaching is not about being locked with both hands glued to a podium or having your eyes fixated on a slide projector while you drone on. Good teachers work the room and every student in it. They realize that they are the conductors and the class is the orchestra. All students play different instruments and at varying proficiencies. This is very important – good teaching is about humor. Good teaching is about caring, nurturing, and developing minds and talents. Good teaching is supported by strong and visionary leadership, and very tangible institutional support – resources, personnel, and funds. Good teaching is continually reinforced by an overarching vision that transcends the entire organization – from full professors to part-time instructors – and is reflected in what is said, but more importantly by what is done. Effective teaching should also be rewarded, and poor teaching needs to be remediated through training and development programs. At the end of the day, good teaching is about having fun, experiencing pleasure and intrinsic rewards – like locking eyes with a student in the back row and seeing the synapses and neurons connecting, thoughts being formed, the person becoming better, and a smile cracking across a face as learning all of a sudden happens. Good teachers practice their craft not for the money or because they have to, but because they truly enjoy it and because they want to. Is teaching a good career for the future? This means that we need more male teachers in the elementary grades and more female teachers in subjects such as mathematics and science. When we look at the school-age population in Wisconsin, we find that it is far more diverse than the general population.

7: Teacher Education & Careers | www.enganchecubano.com

Rankings. Elementary School Teachers rank #2 in Best Education www.enganchecubano.com are ranked according to their ability to offer an elusive mix of factors. Read more about how we rank the best jobs.

Is teaching for you? Before you even start researching degree programs, it is important to think long and hard if teaching is the career for you. This is an essential first step for anyone considering a new profession. If you are unsure, visit a school, talk with an elementary school teacher, or read about life on the job. The more you know, the more comfortable you will be with your decision. Consider these qualities that are ideal for an elementary teacher to exhibit: It seems like a no-brainer that anyone who goes into elementary education will love kids, yet they may not always know just how to talk to them. It is been longer than you think since you were in their size 3 shoes. You have to know how to interact with someone who does not yet fully understand the basic principles of a subject, or why they should even listen to you. This can be tough to do without also being condescending. While it may be frustrating at times, they best way to manage this is to be Patient. Again, remember that you are talking with and trying to teach someone decades younger than you. It will not always be easy, but it is definitely possible. This quality is not just beneficial for you and your students, but for coworkers, substitute teachers, teaching assistants, and parents as well. Remember that your job is far from finished when the bell rings. The modern classroom can be a wonderland for kids, with various teaching aids and devices, but can also be difficult at first to understand. Be aware of how the current classroom has changed since you were a kid. You will not always know how to reach that one difficult student. It is okay to admit your failures. Even as a teacher, you are still learning and mistakes are a part of that process. This is a must, especially with young kids who learn in a myriad of ways. College professors can get away with standing at a chalkboard all day. You have to turn the classroom into both an exciting and respectful environment. After you have determined that a career in elementary education is right for you as a person, the messy bureaucracy of it all comes in to play. While this can be a tedious process, ultimately it is in place for a reason. We do not want just any random person teaching the future bright minds of the world. Here are the next steps you will need to take to become a teacher: Choose the right degree program. There are many teacher training programs out there. Each program is different and the amount of time required by you will vary. Make sure whatever degree program you choose provides the necessary training and certification preparation. You also need to decide if you want to take courses online, on campus, or combination of the two. If you are working full-time or have other commitments, an online program will provide flexibility and convenience. Determine where the jobs are. Do you live in an area that needs elementary school teachers? Perhaps you are unsure? Consult The Bureau of Labor Statistics to find out where the demand is. You might not live in a city, or a state for that matter, that needs elementary school teachers. Understanding which places are best suited for growth of the community will also put you in the right place for new schools to be added, thus more teachers to be hired. If you are unable to relocate, you might want to consider tutoring or subbing until a vacancy becomes available. Private schools and daycare centers also need trained educators to create and implement curriculum. Each state has its own teaching certification requirements, and it is up to you to know what requirements you have to fulfill to work as an elementary school teacher. Additionally, certain teaching certifications can increase pay and open more job opportunities. You can find this information by contacting your state Board of Education. Check out the list below for some ideas on how to put your degree to work after you graduate:

8: Teacher Resume Samples & Writing Guide | Resume Genius

Teaching job opportunities for public elementary school teachers are more abundant than for private elementary school teachers, though the job market for both is looking good. With over 72, public elementary schools in the United States, there are almost 35 million elementary school students.

In some regions, it includes kindergarten through eighth grade. In other areas, it goes through the fifth grade, and sixth, seventh and eighth grades are considered middle school. Elementary school teachers interact with students of vastly different age groups, from the early ages of five or six, to the cusp of adolescence at 11 or 12. Students in elementary schools are all at different phases of development, and their needs vary greatly. However, most elementary school teachers focus on a specific grade level, teaching one class of students who are around the same age. In fact, some states require teachers to be certified to teach a particular grade. Elementary school teachers usually have one class and they teach their students several different subjects. The curriculum is usually structured around the fundamental subjects of mathematics, science, social studies, language arts, music, art and reading. The exact structure and pedagogy can vary from school to school, but for the most part, elementary school focuses on building the foundation for a well-rounded education overseen by teachers who follow students closely through their development. Elementary school teachers are expected to be very hands-on, creating fun and enthusiastic atmospheres within their classrooms and adapting to meet the needs of their students. **Jobs For Elementary School Teachers** The demand for teachers is growing as schools try to keep up with increasing trends in student enrollment. Teaching job opportunities for public elementary school teachers are more abundant than for private elementary school teachers, though the job market for both is looking good. With over 72, public elementary schools in the United States, there are almost 35 million elementary school students. On the other hand, there are around 33, private schools in the United States with an estimated 5. **Becoming an Elementary School Teacher** While the standards for teaching can vary on a state-by-state basis, teachers in elementary schools are required to fulfill basic educational requirements. Public school teachers must be licensed to teach in their state. Teacher education programs focus on pedagogy, teaching methods, educational technologies and actual classroom experience as a student teacher. These schools of education center their courses of study around the philosophy of education, psychology of learning, methodology and technology in the classroom. Elementary school teachers must also pass certain standardized tests to demonstrate efficient knowledge and capabilities. Students in this course will engage deeply with the most relevant research on effective teaching methods in the higher education context, while refining their own practices, portfolio, and teaching philosophy.
