Features[edit] The 1. This includes the rostrum behind the pulpit facing the audience, which provides seating at general conference for general authorities and general officers of the church and the voice The Tabernacle Choir at Temple Square. The auditorium is large enough to hold two Boeing s side by side. All seats in the audience have an unobstructed view of the pulpit because the roof is held up by radial trusses. Behind the podium is a 7,pipe and rank Schoenstein pipe organ. Underground is a parking garage that can hold 1, cars. A modernist, three-story chandelier hangs in a skylight in the interior of the building. A waterfall descends from the spire. City Creek flows in a rough-hewn riverbed, complementing the Conference Center. On the third floor of the Conference Center there are busts of current and past presidents of the church and photographs of LDS leaders; photographs of female LDS leaders were added in Twenty-one native grasses were employed to conserve water and showcase local foliage. The landscaping is meant to echo the mountains and meadows of Utah. Conference Center Theater[edit] The Conference Center Theater Attached to the main building on the northwest corner is the seat Conference Center Theater that can be used as a dedicated theater or as an overflow room. The final plans, completed in late , featured 21, seats in the main hall with in the side theater. Contracting for the building was done by three Salt Lake City firms: Jacobsen, Layton, and Okland construction companies which submitted a joint bid in order to compete with national firms. The companies jointly operated under the name "Legacy Constructors" after winning the contract in late Ground was broken July 24, This date coincided with the th anniversary of Mormon pioneers entering the Salt Lake Valley , an event celebrated in Utah as Pioneer Day. Little Cottonwood Canyon controversy[edit] This section does not cite any sources. Please help improve this section by adding citations to reliable sources. Unsourced material may be challenged and removed. September Learn how and when to remove this template message Conference Center from its southwest corner Although the Conference Center is a modern steel truss and rebar-based design without need for masonry support, the LDS Church sought slabs of quartz monzonite , a form of granite, to clad all exterior walls. Specifically, the church wanted granite to match rock quarried more than a hundred years earlier to build the adjacent Salt Lake Temple. The Salt Lake County Commission granted a two-year permit on condition that extraction not interfere with the ski season. Critics of the extraction argued that the quarry harmed the environment and burdened residents while endangering drivers through Little Cottonwood Canyon below. Quarrying began May 28, The quarry location was further up the canyon from where stone was extracted for the Salt Lake Temple. The granite was subsequently cut into slabs at a facility in Idaho Falls and used for the facade of the building. There was not enough granite extracted from the Little Cottonwood Canyon quarry for the entire project, so extra granite was brought in from the mid-west and used for the flooring. Construction cranes toppled at the work site, and four injuries to crew were reported. Otherwise, construction proceeded smoothly and rapidly. Construction was complete enough for the building to be used for the th annual church general conference on April 1 and 2, President Hinckley also related that a black walnut tree that he had planted decades earlier in his backyard provided wood for the pulpit of the new center. The Conference Center was dedicated six months later, on October 8, during the th semiannual general conference. As part of the event, the dedicatory prayer was followed by a " hosanna shout "â€”a show of gratitude that dates to the early days of the Latter Day Saint movement. The shout involves participants waving white handkerchiefs while repeating "Hosanna, hosanna, hosanna, to God and the Lamb" three times. Though it had been used in public before, such as during the capstone ceremony for the Salt Lake Temple and at the church centennial celebration in , before this public broadcast of the hosanna shout, some assumed it was exclusively related to LDS temple dedications, which are inaccessible to non-Mormons. The Conference Center dedication demonstrated that the hosanna shout, although considered sacred by the Latter-day Saints, is not necessarily used exclusively in temple-related settings. The Building of the Schoenstein Organ at the

ZIMMER, GUNSUL, FRASCA pdf

Conference Center by John Longhurst , retired Senior Tabernacle Organist, examines the concept, approval, design, and construction of the Conference center organ seen during general conferences of the church. The book contains color pictures and an audio CD with narrative by the organ builder and music illustrations by the Tabernacle organists.
